Data Summit Game Sheet

Complete both activities and bring it to the prize table for a small thank-you prize.

You do not need to be a data expert. Use the clues, the presentations, and your table conversations to learn the language of Ryan White planning together.

1. CROSSWORD: Ryan White Planning Terms

Use the clues to fill in the crossword.

Across

2. Information from surveys, data, and community input that helps identify what services are required.

4. Ryan White funding initiative focused on improving access and outcomes for racial and ethnic minority communities.

6. Goal when HIV is controlled in the body; a key health outcome in the care continuum.

12. Moving funds between approved service categories during the program year.

13. Amount or percentage of funds assigned to a service category.

14. The system's ability to deliver services, including staffing, provider availability, and infrastructure.

15. Consumers, providers, partners, and public voices that help explain what the numbers may miss.

Down

1. Guidance to the Recipient on how to address service needs, gaps, barriers, or priorities.

3. Fairness in planning, with attention to disparities and communities most impacted.

5. New HIV diagnoses or cases during a specific period of time.

7. Funds spent in a service category.

8. Number of people living with HIV at a specific point or during a period of time.

9. How much a service is actually used.

10. Federal HIV program that supports care, treatment, and support services for people with HIV.

11. Priority Setting and Resource Allocation: the process used to rank services and assign funds.

2. DATA DETECTIVE SCENARIO

Read the scenario below and answer the questions in plain language.

Scenario: The Commission on HIV received strong feedback from consumers about the need for mental health services for people living with HIV.

Data show that utilization for mental health services is lower than expected and funds are under-spent.

Providers report staff vacancies and long wait times. Several Black and Latinx communities report the biggest gaps.

1 What questions should we ask the data?

2 What might be causing the low utilization?

TIP: Look at the whole picture—data, community voice, and provider input!

3 What data or information would help?

4 What action steps could we consider?
