

# Navigating I-MED Online

## How-to guide

Visit [portal.i-medonline.com.au](https://portal.i-medonline.com.au)

Use this guide to help you perform these key functions within I-MED Online:

1. How to find a patient
2. How to save a search query
3. How to view a report
4. How to view images
5. How to break glass
6. How to view/make upcoming appointment
7. How to send an e-Referral
8. How to order referral pads

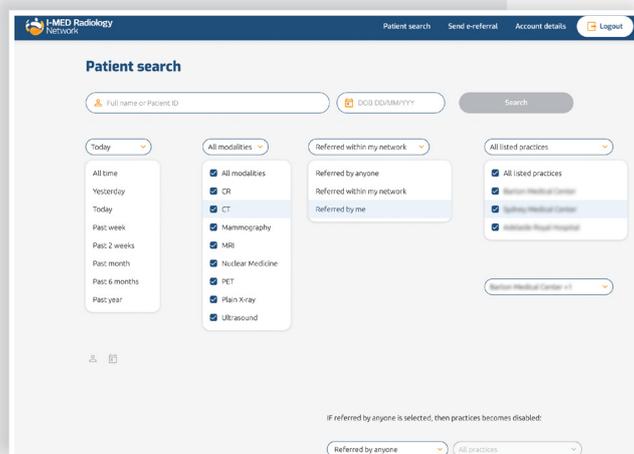

### 1. How to find a patient

I-MED Online features enhanced security and accuracy in patient search. You are required to enter your patient's full name/patient ID and date of birth to generate search results.

To adjust your search parameters, use the drop-down lists below the patient name and DOB fields. These will give you the flexibility to narrow or expand your results.

These additional filters enable you to refine your search results based on the following details:

- Date of study
- Modality
- Referrer status
- Linked Practices (added during account set-up)

### Definition of search terms

**'Referred by anyone'** - will search for studies that were referred by you, practitioners in your network and by someone outside your practice network (relevant when you want to break glass).

**'Referred within my network'** - will find studies that were referred by yourself and another practitioner in your listed network of practices.

**'Referred by me'** - your search will only show results of studies that were originally referred by you.

Note: your "practice network" is the list of practices that you are "linked to" i.e. those practices that are associated with your provider number.

## Default search settings

Each time you log in, the search criteria will default to find studies from the 'Past week', across 'All modalities', that are 'Referrer by me'.

The screenshot shows the 'Patient search' page with the following default settings:

- Search input: Full name or Patient ID
- DOB input: DD/MM/YYYY
- Time filter: Past week
- Modality filter: All modalities
- Referrer filter: Referred by me
- Practice filter: All listed practices

You can modify these filters in each instance to suit your search criteria (or save a frequently searched query – see below). The orange drop-down arrows beside the patient's name will expand to identify the specific study details, including modality, date of study, referring practitioner name, along with links to view the associated report and images.

Results will always appear in chronological order, where the latest study appears first.

The screenshot shows the search results table with the following data:

Name	DOB	Patient ID	Latest study
▼ LAMB, Cassandra	02/07/2001	61192735	20/08/2021
▼ LAMB, Cassandra	18/07/1962	61192735	20/08/2021
▼ LAMB, Cassandra	27/11/1974	76120108	20/08/2021

## 2. How to save a search query

1. You can **save** your most frequently used search queries via the existing "Patient Search" function.
2. For example, save "Today", "All modalities", "Referred by me" and "All listed practices" as your default search terms – which will then apply to all future searches.
3. To do this, simply click "Save filters as default" and all new searches will have those same parameters. The greyed out button denotes that the filters have been saved as default filters.
4. To remove a saved search query, click "Reset".

The screenshot shows the 'Patient Search' page with the following settings and actions:

- Time filter: Today
- Modality filter: All modalities
- Referrer filter: Referred by me
- Practice filter: All listed practices
- Buttons: Reset, Save filters as default (greyed out)

Name	DOB	Patient ID	Latest study
▼ TEST, Mrs Test	01/01/2000	77479438	01/11/2023
▼ HARRIS, Mr David	16/11/1958	77479438	16/05/2022
▼ HARRIS, Mr David	16/11/1958	77479438	10/05/2022
▼ HARRIS, Mr David	16/11/1958	77479438	27/04/2022
▼ HARRIS, Mr David	16/11/1958	77479438	11/04/2022
▼ HARRIS, Mr David	16/11/1958	77479438	07/04/2022
▼ HARRIS, Mr David	16/11/1958	77479438	31/03/2022
▼ HARRIS, Mr David	16/11/1958	77479438	21/03/2022
▼ HARRIS, Mr David	16/11/1958	77479438	08/03/2022

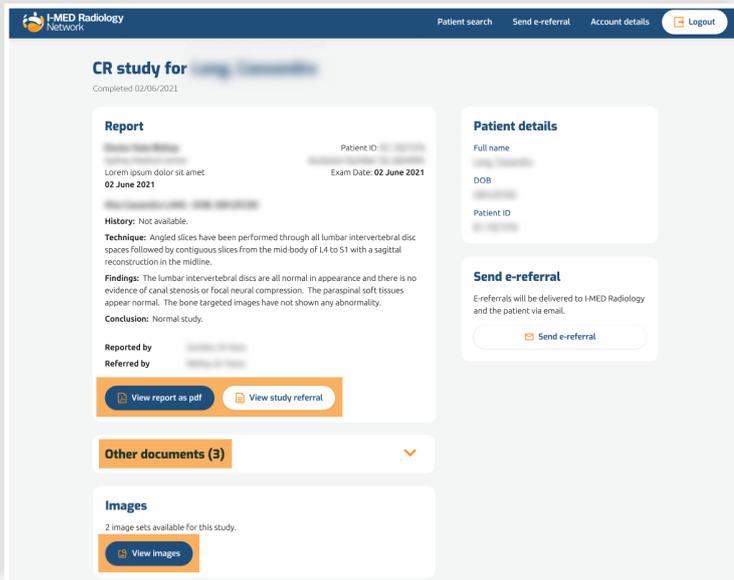

## 3. How to view a report

When looking at an expanded view of your patient's search results, you will be able to view the report by clicking the hyperlink at the end of each row.

If the report is not ready, it will say 'In progress' and once finalised and approved by the I-MED radiologist, will convert to 'View report' so you can open it without going back to the homepage.

The screenshot shows the search results table with the following data:

Name	DOB	Patient ID	Latest study			
▲ LAMB, Cassandra	02/07/2001	61192735	20/08/2021			
Study date	Modality	Description	Referrer	Accession num.	Images	Report
04/07/2021	CR, US	XR right hand and wrist, XR rL...	Referral Dr Lamb	77479438	Booked	-
01/06/2021	CR	XR right hand and wrist, XR rL...	Referral Dr Lamb	77479438	View images	In progress
19/10/2017	CR	X-ray of chest	Referral Dr Lamb	77479438	View images	View report

When you open the report, it will appear on screen. You also have the option to:

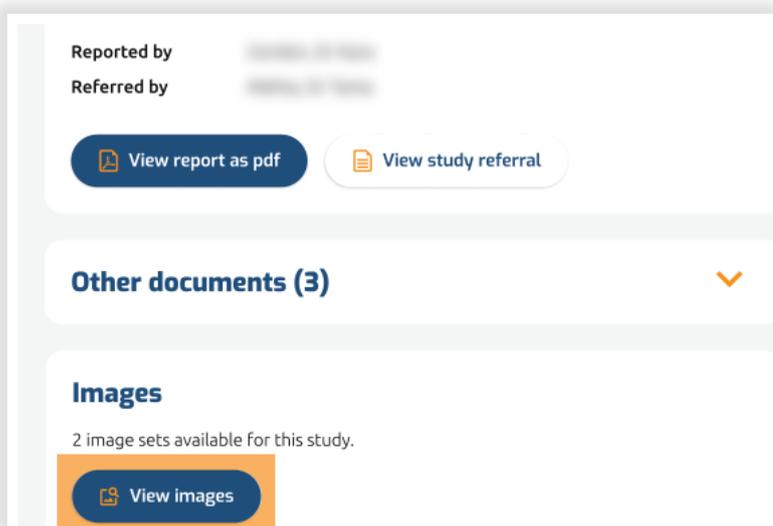

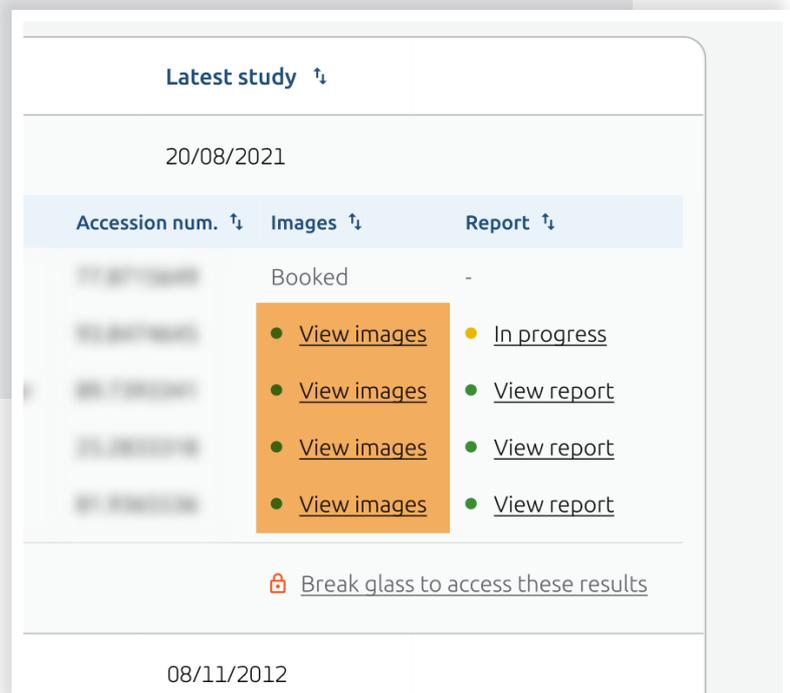

- Download a pdf version
- View the original study referral
- View other scanned documents
- Navigate directly to the 'View images' page without going back to the homepage

## 4. How to view images

You can navigate to your patient's images in two ways, depending on your preference or what actions you have already taken on the platform.

### From the patient search screen-

click on the 'View images' hyperlinks associated to each accession number.

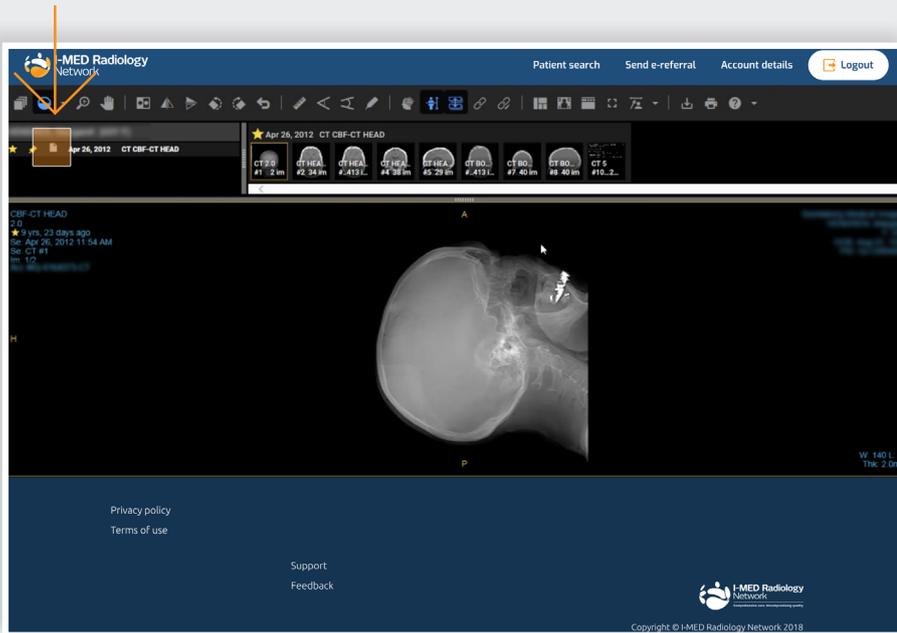

### From the report -

select the 'View images' button at the end of the report. This will avoid you having to navigate back to the homepage.

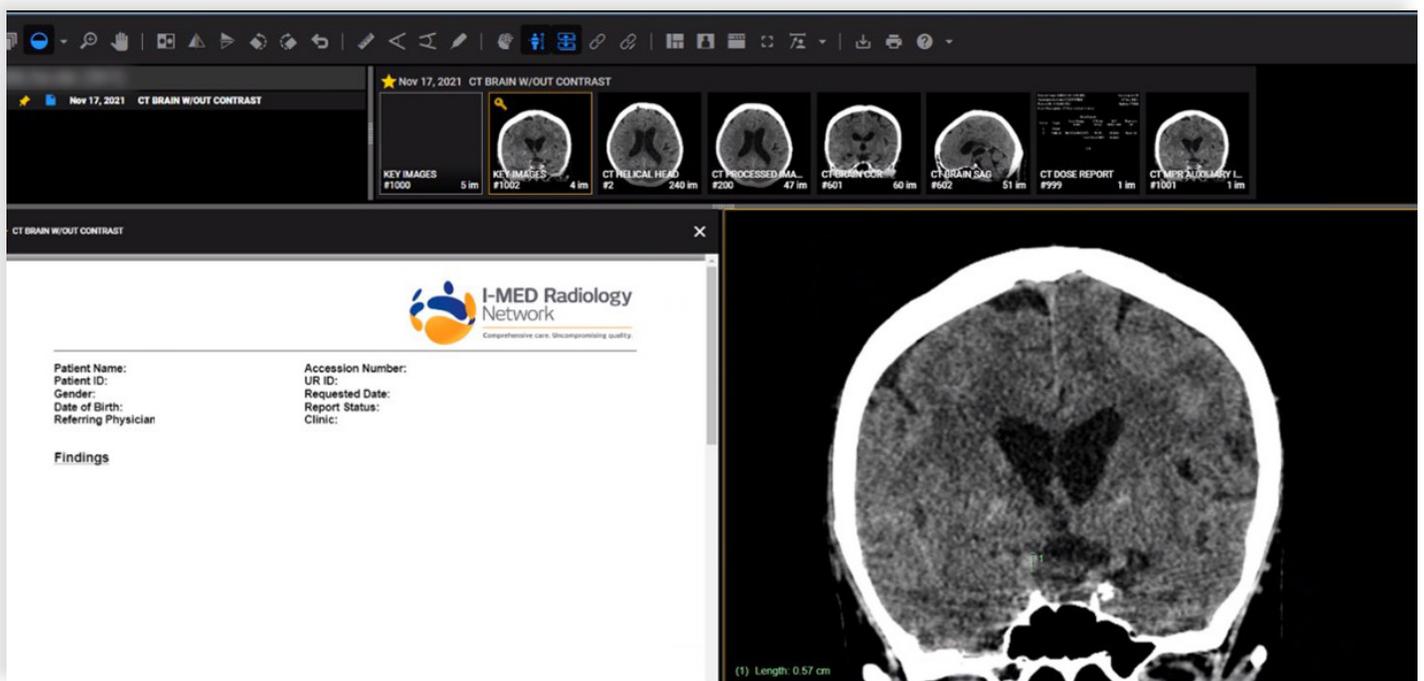

When using either approach, the image viewer will open and showcase all available radiology images associated with the accession number.

As most studies will contain multiple images, use the image library, above the selected image, to click through and view the rest of the study.

## View images and report together

Click on the report icon within the image viewer to open the report within the same window, to analyze the images against the radiologist's interpretation.

## 5. How to break glass

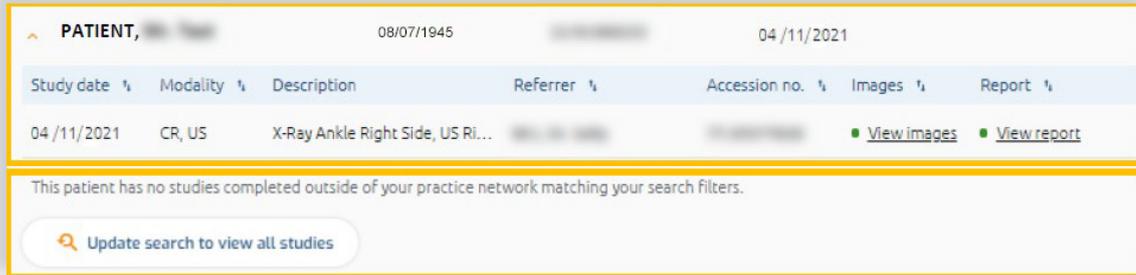

Accessing external studies is now much easier with this version of I-MED Online. Messages that appear underneath your patient search results will prompt you to find and then break the glass to access these hidden studies.

### System prompt: your search parameters need to be updated

If your search filters (within the top menu) are too narrow, the following message appears underneath your search results:

This patient has no studies completed outside of your practice network matching your search filters.

To adjust this setting, click the hyperlink below, 'Update search to view all studies' to broaden your results and access what is hidden by the glass wall.

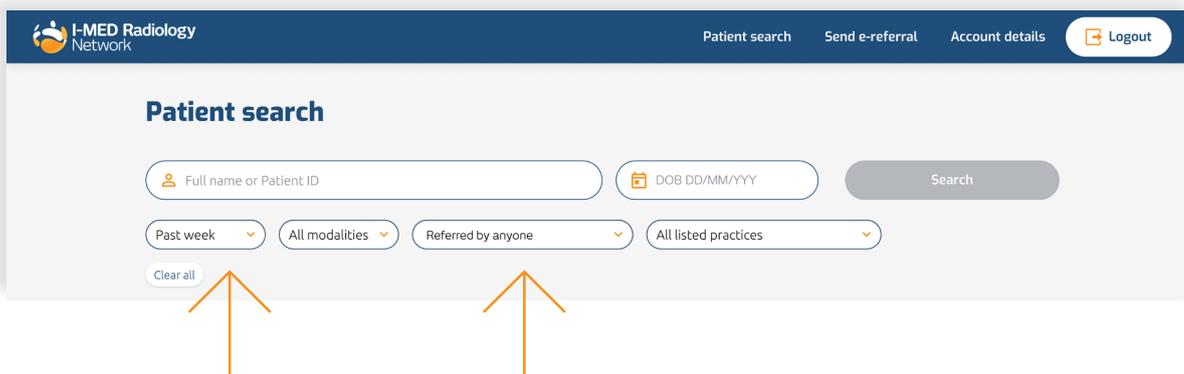

The screenshot shows a patient search result for a patient with ID 08/07/1945 and DOB 04/11/2021. The search results table has columns for Study date, Modality, Description, Referrer, Accession no., Images, and Report. A row shows a study from 04/11/2021 with modality CR, US, and description X-Ray Ankle Right Side, US Ri... with links for View images and View report. Below the table, a message states: "This patient has no studies completed outside of your practice network matching your search filters." A button labeled "Update search to view all studies" is located below the message.

## Update search filters manually

Alternatively, you can update your search filters by changing the third drop down field in your patient search menu to 'Referred by anyone'.

Check that your time frame is appropriate to capture outside studies, as it may default to 'Past week' and therefore restrict your search results.

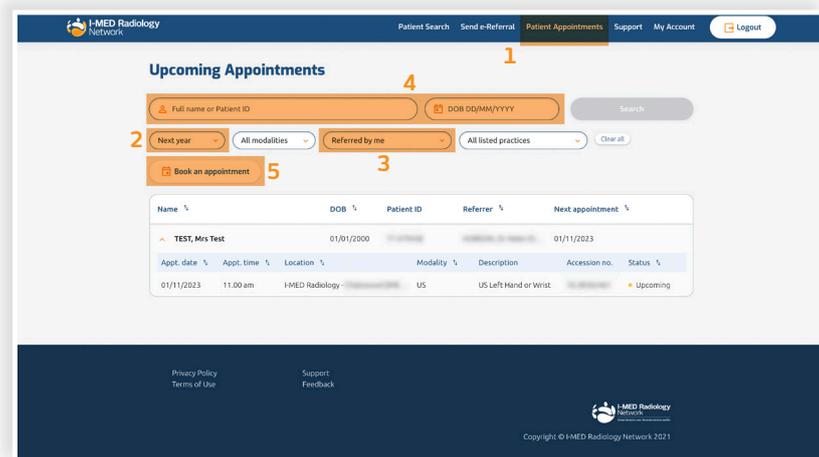

The screenshot shows the I-MED Radiology Network patient search interface. The search bar contains "Full name or Patient ID" and "DOB DD/MM/YYYY". The search button is labeled "Search". Below the search bar, there are four dropdown filters: "Past week", "All modalities", "Referred by anyone", and "All listed practices". A "Clear all" button is located below the filters. Two orange arrows point to the "Past week" and "Referred by anyone" filters.

## 6. How to view/make an upcoming appointment

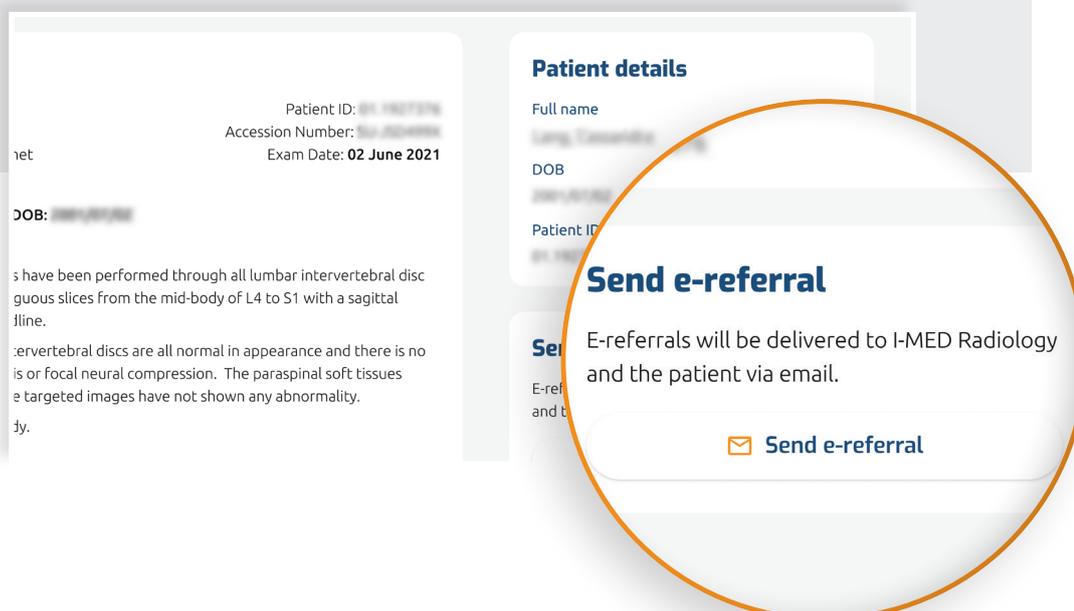

1. By clicking on the "Patient Appointments" link on the top menu, you can view upcoming I-MED appointments for your patients.
2. You do not need to enter patient details in the search fields. If future appointments exist, they will populate automatically on the page.
3. Results will default to appointments "Today" and "Referred by me".
4. To search beyond appointments scheduled "Today", change the date filter to your preferred time point. e.g. "Tomorrow:", "Next Week", "Next month" etc.
5. You can also book an appointment on behalf of your patients. Clicking on "Book an appointment" will take you to the I-MED patient booking platform.

## 7. How to send an e-Referral

e-Referrals can now be completed simply and efficiently from within I-MED Online. You can open the e-Referral template in 2 ways:

1. Via the navigation menu link at the top of the page
2. From within the patient report itself

## The template is divided into these four key steps:

1. Patient details
2. Examination and clinical details
3. Referring practitioner
4. Confirm and send

All known patient and referring practitioner details will pre-populate into the relevant fields during steps one and three above. This will result in fewer errors and will make the process faster for the user as they do not need to re-enter information.

Each step must be completed in the sequence above.

**Send e-referral**  
This form will be emailed to I-MED Radiology and the patient once all steps are complete. If you leave before completing all steps in this form, the e-referral will not be sent.

**Patient details**  
All fields must be completed before continuing.

Full name  DOB  Gender

Mobile number  Patient will receive SMS with booking details  
Email address (optional)  Patient will be emailed a copy of the request

Address

Suburb  Postcode  State

**Examination and clinical details**  
All fields must be completed before continuing.

Exam description

Clinical description

IV Contrast Alert (optional)  
Please indicate whether contrast allergy, renal disease or diabetes metformin treatment apply

Continue

## 8. How to order referral pads

1. To easily order referral pads through I-MED Online, click "My Account" in the top menu.
2. Select "Click here to order" - which will redirect you to the dedicated section on the I-MED website.
