## **Please Follow Steps for Bed Bug Preparation Treatment Heat Treatments**

**Before Treatment:: For Heat Treatments (All Heat sensitive items need to be removed from dwelling)**

- All sheets, linens, bedding material and pillows in dwelling should be placed in bags for laundering or heated for 30 minutes in dryer at high temperature to kill bed bugs.
- All clothing and drapery needs to be removed from all closets and drawers/shelves and placed in bags for laundering or heated for 30 minutes in dryer at high temperature to kill bed bugs.
- Infested rooms- closets needs to be 100% empty.
- Move all items on the floor away from baseboards, at minimum 1 foot (12 inches), for proper bed bug treatment.
- All electricity plug outlet plates need to be removed for proper dusting in walls.
- Vacuum carpets and floors, 1 day before and after treatment for 7 days. Seal and throw away vacuum bag right after vacuuming.
- All persons, pets and all animals need to be removed from dwelling for 4-6 hours during and after treatment. This includes but not limited to birds, cats, dogs, fish and lizards.

**After Bed Bug Treatment::**

- Wash, Dry and launder all clothing, drapery, beddings, blankets, everything before or after bed bug treatment.
- Vacuum all floors and carpets for 7 days, everyday after initial treatment.
- Record and report all bites and bed bug sightings.
- Follow – up 14 days after initial treatment, if second treatment is needed, bed bug preparations is needed to be performed again.
