

ENHANCE PRODUCT QUALITY AND WORKER SAFETY WITH INTRALOX MODULAR PLASTIC BELTING

Intralox® Series 900 Large Roller modular plastic belting (MPB) decreases product damage and maintenance while improving worker safety in your bread slicer infeed conveyors. FDA compliant and proven in installations worldwide, S900 belting eliminates back pressure, dead zones, and pinch points—and doubles belt life compared to “magic carpet” roller belts. Plus, all our MPB lowers your risk of production breakdowns and simplifies repairs when they occur. It’s been setting industry standards in reliability since we invented it more than 50 years ago.

Benefits and Features

Modular design simplifies maintenance and allows personnel to focus on other plant areas

Plastic components' low friction operates more quietly than metal belts

Roller Top™ belt surface eliminates back pressure to prevent product damage

Doubles belt life compared to “magic carpet” roller belts

FDA-compliant rollers don't bend or get stuck, eliminating dead zones on the belt

Eliminates pinch points to improve worker safety

2x | LONGER BELT LIFE
