

## BEM BRASIL OPTIMIZES POTATO WASHER OUTFEED BELT WITH INTRALOX S1750 BELTING

By replacing their potato washer outfeed's chain-driven, rodded belt with abrasion-resistant Intralox® Series 1750 belting, Bem Brasil's Minas Gerais plant:

**Reduced downtime** related to belt failures and maintenance

**Improved drainage** with large openings that allow for high-volume water flow

**Simplified complex repairs** associated with traditional belting

Visit <https://ilox.co/3USDjQJ> or scan QR code to learn more about how our S1750 belting transformed Bem Brasil's line.

**“Intralox’s approach to tackling this challenge was remarkable, with particular emphasis on the application engineering team being extremely assertive and committed to solving our problem. Their experience, clear, and effective communication were crucial to the success of the retrofit.**

**We greatly appreciate the dedication and quality of the work performed. We are very satisfied with the results and continue to place full trust in Intralox for future projects and challenges.”**

Lucas Oliveira  
Project Design Engineer at Bem Brasil Alimentos
