

# Trust the original: ThermoLace Heavy-Duty Edge

Our original ThermoDrive® Heavy-Duty Edge (HDE), ThermoLace™ HDE revolutionized thermoplastic belt hinges. Time tested and field proven, ThermoLace HDE is the foundation ZeroSplice™ technology used to set a new global standard—and leave splicing behind.

## Features and Benefits

- **Heavy-Duty Edge design:** Fully enclosed edge eliminates rod migration risk and ensuing catchpoint failures.
- **Easy drop-in replacement for existing ThermoLace belts:** Upgrading to ThermoLace HDE belting requires no changes to the conveyor frame and no price increase.

### POWERING OUR ZEROSPlice TECHNOLOGY:

## Leave Splicing Behind

ZeroSplice technology—available exclusively from Intralox—introduces modularity to thermoplastic, positive-drive belting. It enables food processors to quickly connect sections of ThermoDrive belting intuitively, safely, and reliably—without the training or equipment needed for field splicing.
