

# INTRALOX AIM GLIDE: A GENTLE, HYGIENIC AUTOMATION SOLUTION FOR BAKERY

Intralox's new Active Integrated Motion (AIM) Glide™ is a gentle, hygienic automation solution that eliminates unscheduled downtime and jams while requiring 75% less maintenance and 50% less cleaning time than metal slat switches. Easy to clean and operationally safe, the AIM Glide does not need lubrication and prevents the need for rework labor to clear jams and realign your product.

## Benefits

### Reliable, Zero-jam Automation

- Decreases total maintenance by 75%
- Offers zero unscheduled downtime
- Gently handles your products, maintaining their orientation

### Hygienic, Food-safe Design

- Cuts cleaning time by 50%
- Requires no lubrication

### Simplified Modular Structure

- Removes the need for guarding
- Makes less noise compared to mechanical arms
- Requires fewer moving parts and engineering time
