Tools and Components Direct from Intralox

Innovation Directly from the Source

Innovation Directly from the Source

Intralox's OneTrack™ suite of tools and components was developed to help our partners simplify orders, standardize maintenance, accelerate installation, and optimize performance. This comprehensive portfolio of belt path components, maintenance tools, and more brings together everything our food partners need to install and run their modular plastic belting (MPB) or ThermoDrive® belting at peak performance.

- Simplify projects and orders with a single source for all conveyor needs
- Optimize belt installation and repairs with easy-to-use maintenance tools
- Compatible with both MPB and ThermoDrive belting
- Backed by Intralox's expertise, services, and guarantees

Each OneTrack component or tool available within The Intralox® FoodSafe™ System has been developed by hygienic design–certified Intralox Engineers.

OneTrack Tech Spotlight

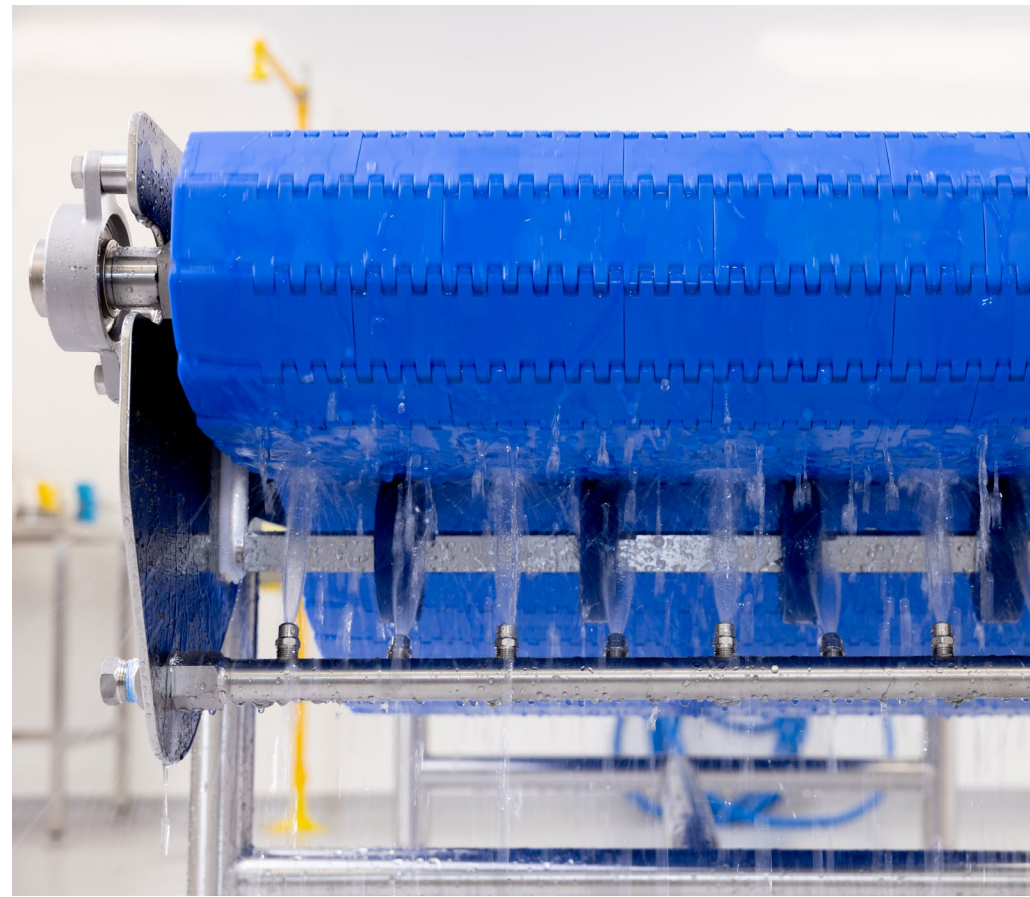

The Perfect Hygienic Pair

When OneTrack products work together on your line, everything gets simpler. Maintenance becomes **fast**. Cleaning becomes **easy**. And uptime becomes **consistent**. Here's one of our favorite pairings.

Ensure Simple, Consistent Setup and Cleaning with CleanLock Sprockets

Intralox CleanLock™ sprockets eliminate belt breakage, foreign material contamination (FMC) risk, and downtime caused by sprocket migration. This patented technology maintains its alignment on the shaft without retaining components, ensuring simple cleaning and proper belt tracking. Plus, CleanLock sprockets are quickly and easily installed onto a specially machined shaft—available from Intralox—using just a screwdriver.

Pair with Heavy-Duty Edge Belting to Get the Most Out of Our Hygienic Designs

Intralox® FoodSafe™ Heavy-Duty Edge (HDE) belting was built to withstand your toughest conveyance challenges. Combining its durability and fault-tolerance with CleanLock sprockets' low-maintenance and reliable placement means two things:

- There are no catchpoints for your operators or products to worry about
- Your setup is solid enough to withstand thorough cleaning with no adjustments needed afterward
