

INCREASE BELT LIFE IN CHALLENGING CONDITIONING ENVIRONMENTS WITH INTRALOX S2900 AND S2950 STAINLESS STEEL LINK BELTS

Intralox® Series 2900 and 2950 Stainless Steel Link (SSL) belts combine the benefits of our modular plastic belting with added durability for high-temperature and high-moisture spiral applications. Featuring stainless steel outer edge links and rods, S2900 SSL and S2950 SSL belts resist edge degradation for longer belt life in pasteurizers, hydrochillers, and spiral immersion systems. Plus, as part of our revolutionary DirectDrive™ System, they're simple, drop-in replacements for existing belts in those conditioning applications.

S2900 SSL

S2950 SSL

Features and Benefits

Low-tension DirectDrive technology delivers reliably smooth operation

Hybrid belt design provides a robust spiral solution while retaining modularity

Stainless steel links and rods increase belt life in high-temperature and high-moisture applications

Drop-in compatibility simplifies installation in pasteurizers, hydrochillers, and spiral immersion systems
