

MAGNETIC PAN HANDLING SOLUTIONS: **PROTRAX RADIUS BELTING**

Challenging applications—such as the de-lidder, pan indexer, and pan radius inclines and declines—require the stable performance and extraordinary life of ProTrax™ belting, whether straight running or radius. ProTrax belting's dual magnetic modules retain strength in hot, dry, and oily environments, reducing downtime and eliminating pan jams.

Benefits

- Extend belt and pan life
- Reduce risk of product contamination
- Increase pan conveyance versatility
- Eliminate pan jams

Design Features

- Dark brown nylon
- Metal-detectable caps
- Available with hold down tabs
- Two strong, rare Earth magnets per module
- Patent-pending design
