

THE ARB MULTILANE DIVIDER S7050 MAKES A BIG IMPACT IN A SMALL FOOTPRINT

Developed from proven Intralox® technology, the Activated Roller Belt™ (ARB™) Multilane Divider S7050 efficiently manipulates packages to balance flow between the packer and tray packer. It gently divides or merges multiple lanes simultaneously to provide a balanced output at high speeds in a market-leading footprint. This solution combines the flexibility to handle multiple SKUs in the beverage package mix with a modular design that enables adaptability for future packaging needs.

Features and Benefits

- **Switches or merges up to four lanes in and four lanes out, up to 600 packages per minute**
- **Balances outfeed lanes via built-in controls even if the receiving infeed lanes are running at different rates**
- **Handles different product types, sizes, and weights on the same line, as small as 4 in x 4 in (100 mm x 100 mm) per package**
- **Eliminates changeover time with pushbutton interface**
- **Flexible, gentle handling greatly reduces damage to products and packaging**
- **Small footprint of approximately 3 ft x 8 ft (1 m x 2.5 m)**
