

INCREASE SAFETY, FLEXIBILITY, AND PRODUCTIVITY WITH THE LOW PROFILE PEOPLEVEYOR

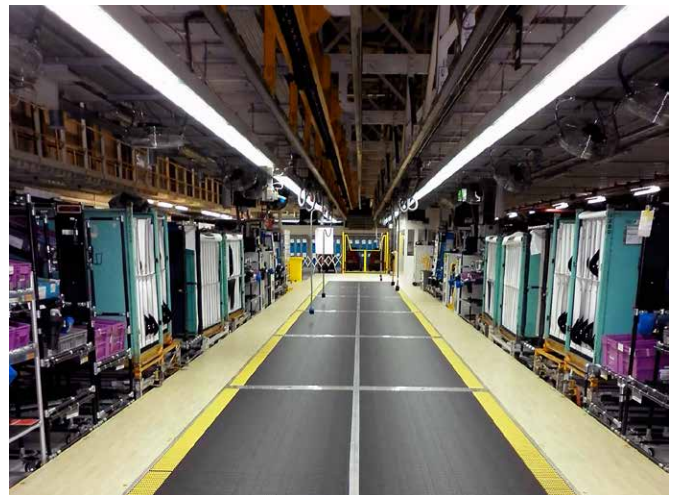

The Low Profile PeopleVeyor™ uses Intralox® Series 1000 Non Skid Raised Rib belts to safely move personnel while reducing civil work and increasing flexibility. The belt's 120-mm height maintains a low profile that eliminates the need to dig pits, and its 0.6-in (15.24-mm) pitch allows for use in conveyors as short as 5 in (127 mm) in most cases.

PeopleVeyor Features

- Minimized height and pitch reduce civil work and increase flexibility
- Non Skid Raised Rib surface increases traction and collects debris instantly
- Finger transfer plates ensure safe transfers
- Flat bottom improves performance with roller-based carryways

PeopleVeyor Benefits

- Reduces employee walking on the line by 40–60%
- Lowers worker fatigue and increases productivity
- Minimizes injury risk and decreases absenteeism
- Ensures product quality and reduces rework costs
- Improves assembly line synchronization and lowers takt time

IN ADDITION TO CIVIL WORK SAVINGS, THESE BENEFITS AMOUNT TO A 20–30% REDUCTION IN CONVEYOR COSTS.
