

CHOOSING THE BEST CUSTOM HEAT TRANSFER TYPE

All Transfer Types

Heat Press

- Transfers apply with a heat press
- Investment
- Do your research

Types of Heat Transfers

Vinyl

- Cut from vinyl material with a cutter
- Print/Cut Vinyl
- Available from www.stahls.com

Types of Heat Transfers

Sublimation

- Applies to 100% polyester
- Applies to white apparel and hard goods
- Investment in sublimated printer needed
- Full Color

Types of Heat Transfers

Ink Jet/Laser Jet

- Full color
- Use Home printer
- Can do just one
- Perfect for gifts/hobby
- Applies to white apparel
- Entire sheet is adhesive so trimming is needed or you will see the clear square
- Paper sold at www.stahls.com

Types of Heat Transfers

Rhinestone

- Applies to cotton, polyester and poly/cotton blends
- Adds fashion bling
- Stock and custom available at Transfer Express
- www.TheWildSide.com has a large selection of stock rhinestone transfers

Types of Heat Transfers

Screen Printed

- Plastisol ink
- Most widely used
- 5 sheet minimum
- Sold by the sheet
- No weeding, ready to apply
- Multi-color prints are on one sheet, no alignment unlike vinyl. One application no matter how many colors are used.

The Screen Printed Sheet

- 11.25 x 14
- Just cut the images on release paper apart and apply ink side down
- Economizes print cost, each sheet can print multiple items

Questions that Dictate Your Choice

- colors: spot vs CMYK
- photos

Questions that Dictate Your Choice

- Fabric Content

What transfer do I use for?

- cotton
- polyester
- performance wear
- rayon
- slub tee

Screen Printed Transfer Formulas

Goof Proof®

- Best Seller!!!
- 4 Second Application
- Forgiving - best if using imported heat presses
- 1-3 Spot Colors
- Perfect for all colors of apparel
- Adheres to cotton, polyester and poly/cotton blends
- Not recommended for heat sensitive polyester
- Names and Numbers are available in Goof Proof

Screen Printed Transfer Formulas

Polytrans

- Same product as Goof Proof
- Alternative application technique for one color orders-applied at 340
- 1-3 Spot Colors
- Perfect for all colors of apparel
- Adheres to cotton, polyester and poly/cotton blends

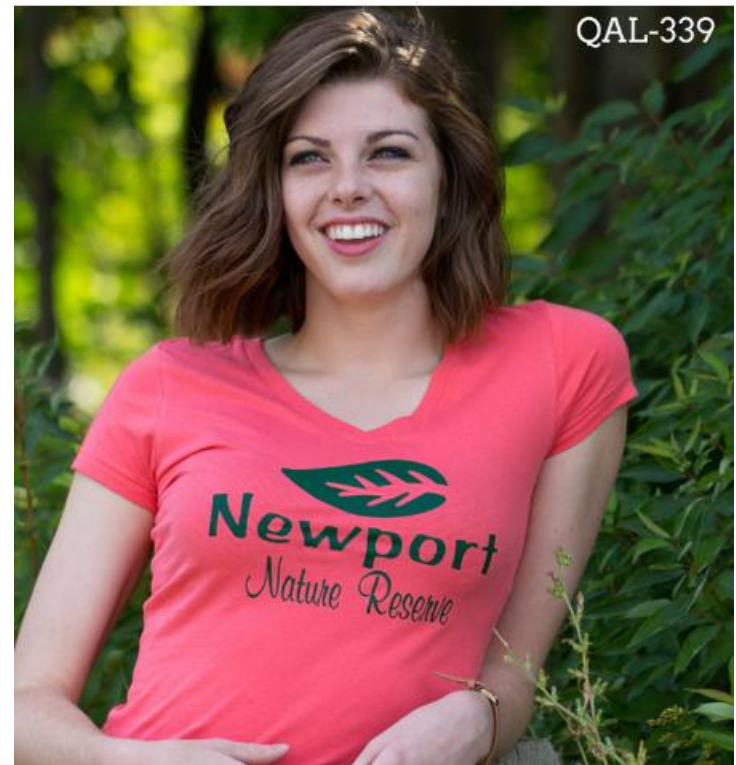

Screen Printed Transfer Formulas

Hot Split

- Softer feel, no adhesive
- Time, temperature and pressure critical, best for use with high end heat presses like Hotronix
- Best for use when the ink color is darker than the shirt color
- Not recommended when using gold or neon ink colors

Screen Printed Transfer Formulas

Elasti Prints®

- Best transfer type for heat sensitive polyester, 1-3 spot colors
- can also be applied to cotton, and poly/cotton blends
- Cold peel transfer
- Perfect for 100% Polyester dri-fit, moisture wicking performance apparel
- When using more than one color, one of the color must outline all the others
- Numbers available in Elasti Prints
- Express names can be applied at this low temperature

Screen Printed Transfer Formulas

Glitter

- Applies to polyester, cotton and poly/cotton blends
- Best with bold designs for better effect
- Limited detail
- Ideal for cheer teams, dance teams, gymnastics, and spirit wear

Screen Printed Transfer Formulas

New: Glow-in-the-Dark

- Applies to polyester, cotton and poly/cotton blends
- Works best on dark color apparel
- Frosted off white in daylight
- Needs recharged before glowing at night

Screen Printed Transfer Formulas

New: Puff

- Applies to polyester, cotton and poly/cotton blends
- Recommended for large bold art and fonts
- Not recommended for high detail
- Show thru text is not recommended

Screen Printed Transfer Formulas

New: Pearl Prints™

- Applies to polyester, cotton and poly/cotton blends
- Metallic option for red, blue, green, copper, pink, purple

Stretch Litho™

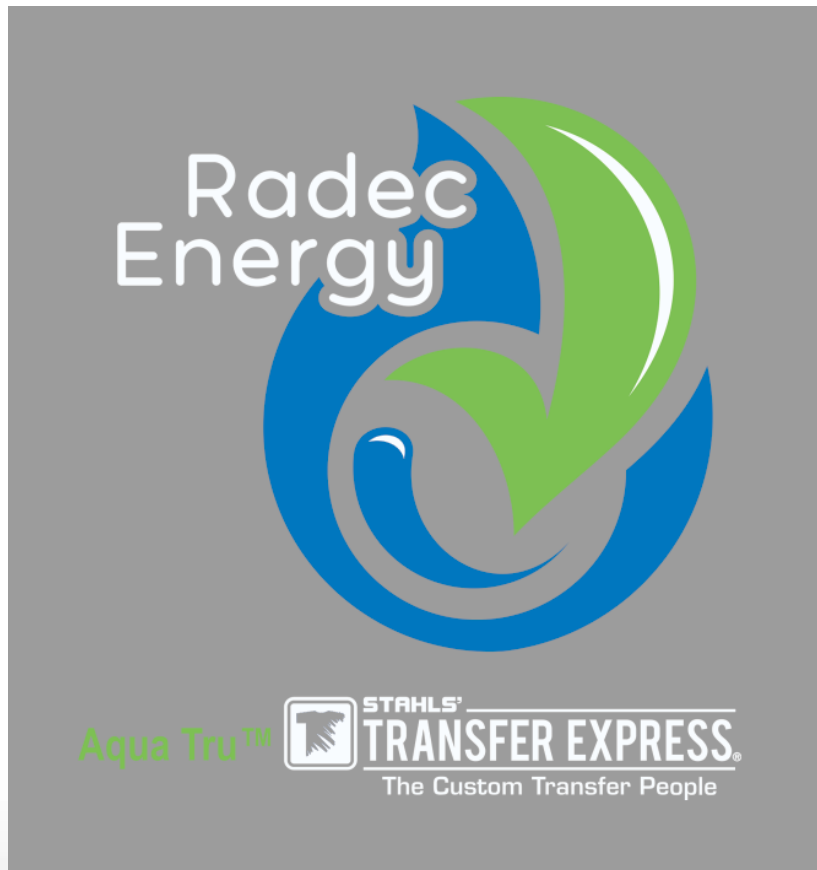

(combines digital and screen printed process)

- Printed in CMYK
- Best if using 4 or more spot colors or full color CMYK art
- Applies to cotton, polyester and poly/cotton blends
- Applies at low temp for heat sensitive 100% polyester

Sneak Peak - Coming Soon!

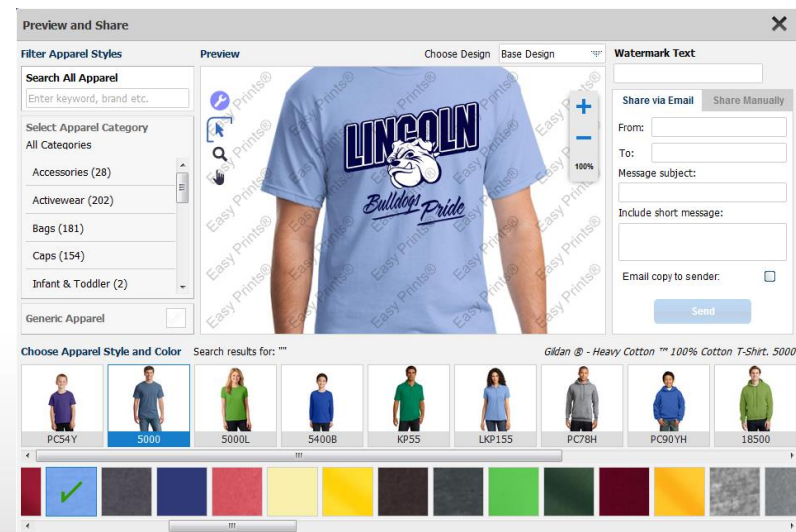

- Environmentally friendly water base transfers
- Aqua Tru™
