PEARLS & EFFECTS

FLAKE SIZE	TONER	CHARACTERISTICS
	F7800 Silver Pearl	Pure white mica.
	F7801 Blue Pearl	Interference blue mica with a yellow flop.
	F7802 Russet Pearl	Pure opaque red mica.
	F7803 Gold Pearl	Interference gold mica with a blue flop.
	F7804 Copper Pearl	Pure opaque copper mica.
	F7805 Green Pearl	Interference green mica with a red flop.
	F7806 Red Pearl	Interference red mica with a blue flop.
	F7807 Violet Pearl	Interference violet mica with a green-yellow flop.
	F7808 Crystal Silver	Silver metal-coated glass flake, used to create bright colors with intense sparkle and flare.

FLOP ADJUSTERS

TONER SYMBOL	TONER	CHARACTERISTICS
	F8700 Flop Adjuster	Micronized white can be used in combination with metallic and effect pigments to create a gold/yellow face and light blue flop.
	F8701 Flop Adjuster	Metallic control additive that increases the sparkle and visual particle flake size as well as contributes to a light flop characteristic.
	F8109 Matte Binder	Gives a coarser appearance and lightens the flop.
	F8710 Metallic Additive	Metallic control additive that decreases the sparkle and visual particle flake size as well as contributes to a dark flop characteristic.

METALLICS

FLAKE SIZE	TONER SYMBOL	TONER	CHARACTERISTICS
	F7705	Extra Fine Aluminum	Extra fine bright aluminum.
	F7704	Fine Aluminum	Fine bright aluminum. Coarser than F7705.
	F7703	Medium Aluminum	Medium bright aluminum.
	F7701	Coarse Aluminum	Medium bright aluminum. Coarser than F7703.
	F7702	Medium Coarse Aluminum	Medium coarse, bright aluminum.
	F7700	Extra Coarse Aluminum	Very coarse, bright aluminum. Coarser than F7702.
