

FAST FLEET WHEEL REFURBS

SMART SOLUTIONS TO KEEP YOUR FLEET
LOOKING GOOD ON THE ROAD

In today's competitive commercial fleet environment, factors such as brand image and time are precious commodities to your business. How your truck looks says something about your brand and every day spent in a repair facility directly impacts your bottom line.

One of the most common issues facing hardworking fleet businesses today are wheels that have become corroded or rusty and there is not enough time or budget to send them out for refurbishment. The good news is PPG has developed an affordable solution for fast wheel refurbishments, with consistent quality, and without the use of a paint booth.

READY TO GO & EASY TO APPLY

THE PPG SOLUTION LEVERAGES AEROSOL PRODUCTS TO DELIVER A FAST, EFFICIENT AND AFFORDABLE ALTERNATIVE TO OUTSOURCING THE REFURBISHING OF CORRODED WHEELS.

1 STEP
Abrade wheel surface to remove corrosion using a drill with a wire or flap abrasive wheel. Scuff the rest of the wheel using a SCOTCH-BRITE™ pad.

2 STEP
Clean the wheel surface with ONECHOICE® SXA330 Wax and Grease Remover.

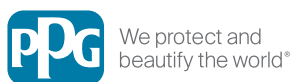

3 STEP
Apply 2 double wet coats of CPC-SP8150 gray primer. Allow to flash for 15 minutes between coats.

4 STEP
Apply 2 wet coats of CPC-SP8047 (white) or CPC-SP8050 (black) topcoat. Allow to flash for 15 minutes between coats.
