Shed visualizer

See virtual PPG colors in action on shed photos

Seeing a color chip and imagining how it will actually appear on a shed can be a challenge for both you and your customers. PPG's game-changing web-based color visualizer is here to help. Everyone can now see how over 1,800 colors and four custom palettes look on ready-to-color sample sheds or user-uploaded photos – all with a few clicks.

You and your customers can play with different color combinations and shed styles to see how they'll look in action. As a shed retailer, you can link the visualizer to your website and enhance your customer's experience.

To learn more, visit visualizecolor.com/ppgshedcoatings or please call **1.888.638.9795**.

Ability to load your own shed photos

Access to over 1,800 PPG colors and four unique color collections
