This "PPG Refinish Products Containing Lead (Pb), Chromium (Cr), Cadmium (Cd), Manganese (Mn) and/or Nickel (Ni)" chart is intended to provide INFORMATION for review by PPG's customers operating under a 6H Rule exemption. The coatings chart includes commonly used products that contain specified metals and alternatives to those products for customers, RE-SELLERS and END USERS operating under a 6H Rule exemption. This chart does NOT include a complete list of such products and alternatives. In providing this document, PPG makes no separate or additional warranties, express or implied, and assumes no liability or responsibility arising out of its use. It is the responsibility of each customer, RE-SELLER AND END USER of PPG's products to independently ascertain that their practices are legal, appropriate and constitute sound product stewardship. This "PPG Refinish Products Containing Lead (Pb), Chromium (Cr), Cadmium (Cd), Manganese (Mn) and/or Nickel (Ni)" chart is general in nature and is not intended to address site OR PRODUCT-specific issues. Approaches to different issues may vary depending on individual circumstances. This document is not INTENDED to define or create legal rights or obligations. It is the responsibility of each customer, RE-SELLER AND END USER to comply with federal state and local laws.

An exemption eliminates only the obligation to comply with other 6H National Area Source Rule requirements. Exempt facilities must still comply with air permits and all other applicable local, state and federal environmental requirements (including any that require operation within a spray booth), worker health and safety laws and regulations, and NFPA and local building codes.
