

Undercoats

Strong Adhesion. Superior Protection.

Matthews Paint offers primers for most substrates including aluminum, steel, brass, copper, bronze, acrylic, polycarbonate, PVC, photopolymers and sign foam.

Non-Chromate Compliant Low VOC & 6H Primers

Our chromate free and low VOC primers provide excellent paint adhesion and increased paint durability, do not contain target-HAPs (Hazardous Air Pollutants) and comply with the EPA 6H Rule.

Adhesion Promoters

These single component sprays provide excellent adhesion over specified substrates including hard-to-adhere metals and various plastics.

2.1 VOC Epoxy Primers

- 2.1 VOC compliant
- Available in: 274528SP/01 Gray, 274530SP/01 White, 274531SP/01 Black
- Extremely fast dry times
- Corrosion resistant
- Can be applied to properly prepared Stainless Steel and many other substrates
- Allow 8-12 hours dry time before sanding, if necessary

Substrate Preparation

Proper substrate preparation is critical for proper paint adhesion. For step-by-step recommendations, refer to the Matthews Paint Substrate Preparation Guide available at matthewspaint.com.
