

## Solvent and Hardener Information

**Two epoxy primers** – one hardener, one reducer, shared (F8800, reducer 1)

**Urethane primers** (urethane primer, sealer, surfacer) - one hardener, one reducer, shared (E, 2) – Sealer can also use hardener B but E is preferred for appearance and mix ratio

**DG** – three hardeners, three reducers (hardeners A, B, C; reducers 2, 3, 4) – Hardener E will not work with DG – kills gloss and has very short potlife
