

School Health and Related Services: Random Moment Time Study & Funding

Angela Foote, MEd
Dept. of Financial Compliance
Texas Education Agency

1

Topics for Discussion

- What is the Random Moment Time Study (RMTS)?
- RMTS Process- Medical vs Educational
- What has changed & What has not?
- Spec Ed Dept Activities
- Contact Information

2

What is the Random Moment Time Study (RMTS)?

States must identify the time and activities of a school-based health program.

Texas uses random moment sampling to show time and activities performed (whether allocable or allowable under Medicaid) by employees.

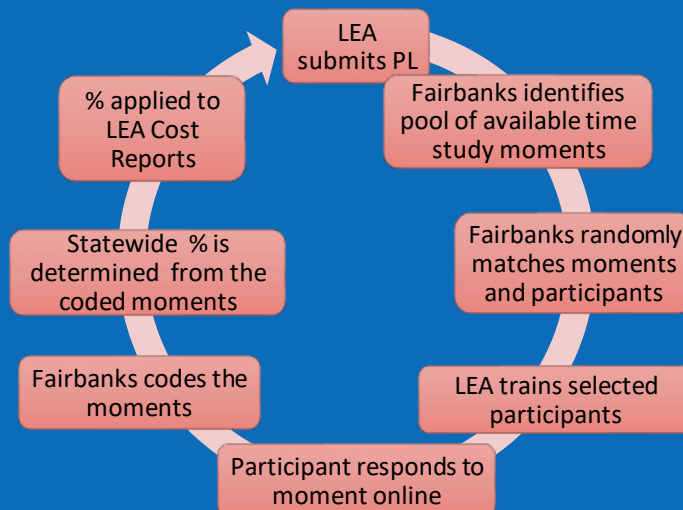

The resulting statewide proportion is used in developing the LEA's annual reimbursement.

RMTS Process- Medical vs Educational

TEA

4

What has changed & What has not?

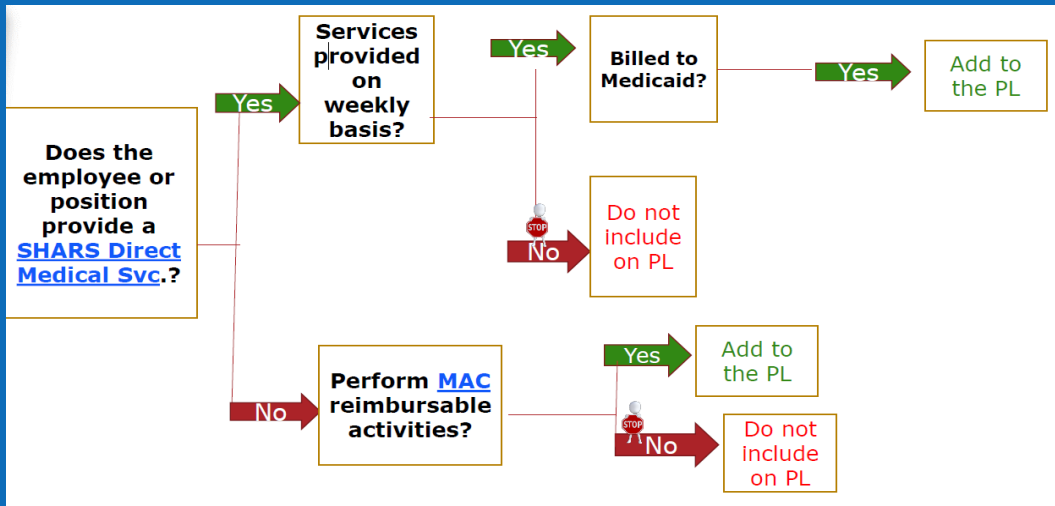

Procedure has not changed/ coding has changed:

- Original FFY 2022 RMTS percentage: 43.61%.
- Recalculation FFY 2022 RMTS percentage: lower 20%.
- Example moment response: “helping student with math problems” & “monitor student in PE”
 - Possible previous coding- direct medical
 - Possible current coding- not direct medical (educational)

5

Spec. Ed. Dept. Activities – Participant List

6

Spec. Ed. Dept. Activities – Allowable PCS

Examples of ADLs:

- Bathing
- Eating
- Assisting with toileting
- Dressing
- Assisting with walking

Examples of IADLs:

- Laundry
- Light housework
- Meal preparation

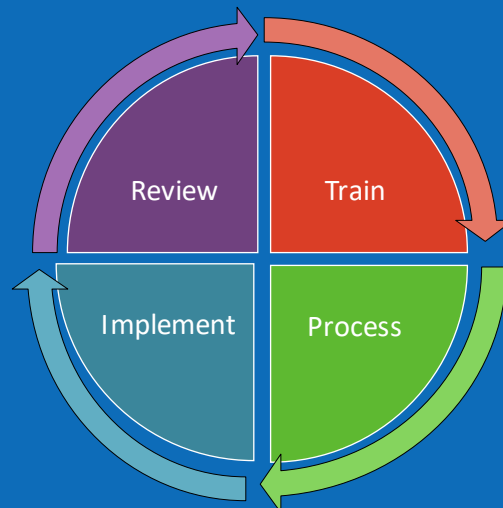

PCS does not include :

- ADLs, IADLs, or HMAs that a typically developing child could not perform alone
- Respite care or childcare
- Restraint of a student
- Stand-by supervision
- Teaching a life skills curriculum
