Profile Ace Mica, a leading provider of high-quality High-Pressure Laminate (HPL) sheets designed for both innovative interior and exterior applications. In a market constantly seeking a balance between functionality and aesthetic appeal, we are proud to offer solutions that meet stringent global standards and exceed client expectations. At Ace Mica, we understand that the right materials can transform a space, offering durability and style without compromise. Our HPL sheets are engineered to be highly resistant to scratches, impacts, heat, and moisture, making them an ideal, low-maintenance choice for high-traffic commercial and residential projects. **Why Partner with Ace Mica?** **Exceptional Quality and Durability:** Our HPL sheets are manufactured using high pressure and heat, ensuring a robust, long-lasting product that resists fading and wear, even under harsh environmental conditions. **Vast Design Flexibility:** We offer an extensive collection of designs, including realistic wood, stone, metallic, and a wide array of solid colors and textures. This variety allows for creative freedom and the ability to achieve high-end looks at a cost-effective price point. **Sustainability Commitment:** We utilize eco-friendly, sustainable raw materials and adhere to green building practices, ensuring our products contribute to healthier indoor air quality and environmental conservation. **Reliable Partnership & Support:** We pride ourselves on timely delivery, expert technical support, and a responsive customer service team, ensuring a seamless experience from procurement to installation. We would be delighted to discuss how our HPL solutions can enhance your upcoming projects and explore potential collaboration opportunities. Please feel free to reach out to me via phone at +916355959696 or email at sales@acemica.com to schedule a brief meeting or request samples.

Website <https://desertboard.ae/>

Profile DesertBoard® is the manufacturer of the region's most sustainable building material, Palm Strand Board (PSB®), crafted from annually regenerated date palm fronds. Registered in 2011, DesertBoard® was driven by an ambitious vision to transform abundantly available raw materials into sustainable wooden boards. During this period, we undertook extensive experimentation, research, and development to create Palm Strand Board (PSB®), laying the foundation for a revolutionary sustainable building material. A decade later, in 2021, DesertBoard® marked a major milestone with the inauguration of its factory and the successful production of the first PSB® engineered wooden board, setting a new standard in sustainable building materials. Addressing a critical environmental challenge, DesertBoard upcycles pruned palm fronds through a one-of-a-kind patented process, becoming the world's first factory to produce a Super E0 (zero-emission) grade board, equivalent in strength to Oriented Strand Board 3 & Oriented Strand Board 4.

Profile Overcoming Manufacturing Challenges — A New Era of Smart Balance As the industry pushes to meet demands in design, efficiency, and cost, WMF 2026 presents the theme: “The Smart Balance of Manufacturing.” Focusing on how manufacturers can find the right balance across these priorities, WMF showcases integrated solutions across machinery, materials, and components. Visitors will explore diverse smart production lines and high-performance material applications that support efficient, precise, and eco-conscious manufacturing. More than a machinery expo, WMF bridges system-level solutions with real production pain points. Gain insights into evolving workflows from wood pre-processing, panel production, edge banding, and surface treatment, to digitalized line integration. Combined with advanced panels, green adhesives, coatings, and smart fittings, WMF offers full-factory solutions that tackle common issues like tight deadlines, high costs, and complex processes. Furniture Tech Week: A Full-Chain, Immersive Experience Co-located with CIFF (Shanghai) and Upholstery Tech, WMF forms part of Furniture Tech Week—a holistic showcase of design, materials, craftsmanship, and smart production. Spanning categories from custom furniture, solid wood, and panels to upholstery, hardware, and surface finishing, this multi-expo platform goes beyond the traditional format to deliver stronger integration and practical insights. From designers and factory owners to sourcing teams, Furniture Tech Week is the go-to platform to explore next-gen productivity across the furniture manufacturing chain.

Profile National Paints: A Journey of Colors and Growth National Paints is a third-generation business built on a family entrepreneurial vision to provide the highest quality paints and coatings for the decorative and industrial sectors. Founded by the Sayegh family in 1969 in Jordan, National Paints has since accelerated its growth by opening factories in Jordan, the United Arab Emirates, Saudi Arabia, Egypt, Oman, Romania, Cyprus and India. Our flagship facility in Sharjah, United Arab Emirates, established in 1977, stands as the largest paint consortium in the region, spanning over 130,000 sqm, contributing to our annual production of over 500,000 MT of paint. We operate across thirteen business divisions: Decorative Coatings, Automotive Coatings, Marine Coatings, Powder Coatings, Protective Coatings, Floor Coatings, Wood Coatings, PVC, Inks, Art Paints, Sealants, Tile Adhesives and Tile Grouts, and Aerosols. National Paints Group proudly ranked 27th globally according to the Coating World Top Companies, and ranked 1st in the Middle East, with an annual capacity of over 1,000,000 MT. Our most significant accomplishment is being the first company from the MENA region to attain these rankings. Committed to staying abreast of the latest trends, we prioritize innovation and sustainability. This has led us to increase our investment in research and development, develop solutions to reduce health and environmental risks and provide exceptional service to our customers.

Website www.quebecwoodexport.com
Profile The Quebec Wood Export Bureau (QWEB) is a non-profit organization created in 1996 whose mission is to develop export markets for wood products from Quebec, to ensure access of these products on the markets and to promote the use of wood in all markets, as regional, provincial and international. QWEB has about 125 export companies in five different groups: softwood lumber and value-added softwood; hardwood lumber and added value hardwood; wood flooring; wood construction; and wood pellets. To achieve its objectives regarding market development and market access, besides the managers who work for each group, QWEB also has specialists in three overseas offices: United Kingdom (Salisbury), Japan (Tokyo) and the United States (Vermont). Finally, for several years, QWEB is actively involved in several major international negotiating tables where wood material is considered as a concrete way to tackle climate change. This is the case of the Sustainable Buildings and Climate Initiative of the United Nations Environment Programme (UNEP).
