Website www.abalon-hardwood.com

Profile We are one of the largest European hardwood companies with mills in Heiligenkreuz (Austria) and Schwalmstadt (Germany). Our annual cutting potential is approximately 250.000m³. We are specializing in Beech. We are producing edged, lightly steamed, carefully kiln-dried (KD 8-10%) lumber in an extensive product range and two product lines: - Our standard products are pre-planed after KD before grading. - XXL is our second line of products. The boards in this product line are all 25cm wider and remain rough sawn. Invoice thickness is still 52mm, in reality they measure about 53-54mm. - thicknesses: 23 – 80mm - lengths: 2,05m – 4,05m - grades: 9 standards grades, additional special-grades. In addition we produce substantial volumes of packaging material in form of cants or boards with the following potential additional features: groved, heat-treatment according ISPM 15, kiln-dried, etc.. Our mills are eco-certified according to FSC-, as well as PEFC-standard. Our grading system is proprietary, but based on the American NHLA and our standard grades are globally recognized by demanding customers (SUPERIOR, CABINET, CUSTOM SHOP, COMMON SHOP, 1-FACE-grades, COLOUR-grades). They enable to choose the most suitable and the most economical material for a specific application. In addition to our standard grades we also offer special customer driven grades to provide flexibility for adapting to market trends. Our products are sold worldwide to industry and distribution. Besides the quality of our products our customers especially appreciate the quality of our business relationships, as we put great value to it. We respect our customers as partners and their success becomes ours!

DesertBoard

Contact Name DesertBoard
Email marketing@eccgroup.ae
Website https://desertboard.ae/
Profile DesertBoard is the manufacturer of the region's most sustainable building material, Palm Strand Board (PSB®), crafted from annually regenerated date palm biomass. Founded in 2011, the company was driven by the ambitious vision of transforming abundantly available raw materials into innovative and sustainable solutions. With the region's vast date palm groves, substantial quantities of palm biomass are generated each year, which, if left to decompose, would emit harmful methane gas, and if incinerated, it releases CO2 - both major contributors to climate change. DesertBoard addresses this environmental challenge by upcycling palm biomass using a patented process, becoming the world's first factory to produce a Super E0 (zero-emission) grade panel, equivalent in strength to Oriented Strand Board 3 & Oriented Strand Board 4.

EUROCOM EXPANSION S.A.

Contact Name EUROCOM EXPANSION S.A.
Email ibolya.sandu@expansion.ro
Website www.expansion.ro

Profile We provide service since 1992 with proud!! In 1992, Viorel POPESCU was founding a Wood Trading Company – EUROCOM EXPANSION S.A., becoming its General Manager. As the activity of the Company grew, EXPANSION started also to produce and sell timber and wood by-products. Nowadays, our activity is taking place in Băiculești, ARGEȘ County, where we have a platform of around 180.000 sqm, always prepared and equipped for producing timber and half-finished materials, mainly but not exclusively from beech. We are the best choice in this field – and it is easy to understand why. First, we are bordering the Southern Carpathians, one of the most impressive forest districts in Romania. Therefore, we have access to a major forest area in the country as a source of high quality logs. Secondly, our technical and technological resources are reaching a high standard. We have the latest technology and equipment for processing the logs and all are handled and maintained by qualified and motivated people who form a reliable team of which we are always proud. Our warehouses as well are modern and highly efficient, assuring the best conditions for storing and preserving the goods. Above all these, our emplacement was strategically chosen to facilitate our relationship with national and international partners: we are 140 km away from Bucharest and Otopeni International Airport, being connected via highway with this major business and economic center.

FLORIAN S.P.A.

Contact Name FLORIAN S.P.A.

Email marketing@florianinc.com

Website www.florianinc.com

Profile Florian: Innovation and Sustainability in the Use of Wood. The Florian Group with headquarters in Italy, manages a complete wood chain, controlling the entire production process, from the forest to the finished product, guaranteeing maximum quality and minimum waste of resources. with over 60 years of activity, it is leader in the wood market and includes specialized companies in Italy and Europe. From Forest to Finished Product: An Integrated Supply Chain The focus on the environment is on Florian's DNA, which is committed to sustainable development at every stage of the wood production cycle, from the procurement of the raw material in controlled areas to using renewable energy. Each log is selected and processed into a range of products, minimizing waste. The processing begins with sawn timber, available in a variety of essences, qualities and sizes, making them versatile for different applications. Thanks to a thorough drying, a suitable humidity is guaranteed for each specific application. The most popular products include boards, slats and elements. Florian also specialises in the production of laminated profiles and beams. The Wood is carefully selected to create products such as FLO.LAM OAK, an oak laminated beam made of comb-jointed lamellas, ideal for prestigious residential construction. A product that helps to preserve the natural cycle of forests and increase resilience and resistance, which are key factors in mitigating the effects of climate change. Florian continues the transformation of wood with floors with an elegant and durable design. Thanks to the quality of materials and careful processing, they reflect a commitment to sustainability and resource optimization. Family® is an example of this philosophy: a natural, high-performance floor that contributes to well-being and the environment. The production process is zero-emission and uses clean energy. Among Florian's various productions, the line of tables also stands out, born from the encounter of natural, solid woods with linear metal elements that enhance the raw material. These tables are transformed into objects of distinctive design, as unique as the logs from which they originate, in which the warmth of wood contrasts harmoniously with metal and steel modelled into clean shapes. The last important step in Florian's '0 waste' integrated supply chain is the Woody Fire line. It includes a complete range of natural biofuels, produced exclusively from virgin wood without glues or chemical additives. These fuels are obtained from the recovery and reuse of high-quality raw materials from hardwoods, processed in the form of logs and all their derivatives, including refiles and sawdust. Within the Woody Fire range, we find different solutions for heating and cooking: pellets, briquettes, sticks and firewood. Commitment to Sustainability and Renewable Energy. Florian is also committed to the production of renewable energy through biomass plants for heat in the evaporation, drying and thermo-treatment cycles. These green technologies position Florian as a leader in sustainability, demonstrating that innovation and respect for the environment can coexist. Florian owns one of the largest biomass plants in Europe, a true symbol of our commitment to clean energy and reduced emissions. Our plant is strategically located in Din Novoselec, Zagreb, no more than 100 km from any of the group's raw material sources, allowing an efficient use of the short supply chain. In addition, photovoltaic systems have been installed in the Florian Group's main companies, producing over 14 million kWh of energy per year. This energy, together with that generated by the biomass plants, is used for self-consumption, contributing significantly to the reduction of environmental impact. Thanks to a corporate strategy focused on innovation and sustainability, Florian demonstrates that it is possible to combine industrial growth and respect for the environment, offering advanced solutions for the global market. To find out more, visit our website: www.florianinc.com/en/

RED OCTOBER LLC

Contact Name RED OCTOBER LLC
Email ilyas@ro1910.ru
Website <https://www.ro1910.com/>
Profile

"Red October" is an ultra-modern factory for the production of 100% birch plywood, and softwood sawn timber located in Perm, Russia. 1. SAWN TIMBER. The Company's standard specification contains spruce (white wood) (50%) and pine (red wood) (50%) boards in various sizes and length. Monthly production volumes are 10000-12000m3 of sawn timber. Our sawmill holds Sustainable Forest Certificate FT (analogue FSC/PEFC) and strength grading certifications (CE, EN 14081-1:2005+A1:2011). Moreover, our company is certified for ISO 9001, ISO 14001, ISO 45001. All of timber undergoes chamber drying till it reaches 18 +/-2% which protects timber damaging by fungal infections, blue stain and rot, and improves timber performance characteristics. Deeper drying to 12 or 10 +/-2% is also possible under special order. Due to the fact that the supply of raw materials to our production does not depend on weather conditions and 80% consist of our own harvesting we are able to provide super-stable supplies for you in any season. We have our own wagons, trucks, fuel supply system and river fleet. 2. BIRCH VENEER and PLYWOOD. From 2024 we started the production of BIRCH VENEER and PLYWOOD for construction, furniture, doors, etc. Total capacity of the factory is about 5000 m3 of rotary cut veneer and 5000m3 of Birch Plywood MONTHLY. Our brand of plywood, a general-purpose building material, the layers of which are glued together with resin-formaldehyde glue. In 4Q 2024 we started the production of film-faced plywood with a smooth and anti-slip coating. Produced in accordance with GOST 3916.1-96 and GOST 3916.2-96, recognized in all CIS countries. We also take into account the requirements of the European standard EN 13986. Birch is harvested in owned areas by own equipment and ensures that the plant is fully supplied with fresh raw materials all year round. The supply of raw materials is carried out by rail and sea transport, which helps the plant to be completely independent of weather conditions. The main WBP plywood format is 2440*1220 mm, 1220*2440 mm and 2500*1250 mm, which is most in demanded in construction in critical areas.

Website https://www.holycranewood.com

Profile Shandong Heyang Wood Industry Co., Ltd. was founded in 1993 and registered in 1999. Its headquarters is located in Linyi City, Shandong Province. It is a national high-tech enterprise focusing on the production and processing of wood-based panels (particleboards, fiberboards), wood-based panel veneers and comprehensive utilization of wood resources. The company has now become a large-scale board production enterprise with an annual output of 350,000 cubic meters of ecological particle particleboards and 210,000 cubic meters of high-quality pine fiberboards. Its main products include high-quality particleboards, medium- and high-density fiberboards (MDF) and ecological particle particleboards that meet the national standard E1/E0, US P2, and Japanese F★★★★ standards, which are widely used in whole-house customization, furniture manufacturing and other fields. Relying on imported pine wood from the Americas and local wood resources, the company has established a unique raw material base, formed a complete industrial chain, and adhered to the concept of green production to promote the integration of environmental protection and innovation. Heyang Wood Industry attaches great importance to technological innovation and cooperates with scientific research institutions such as Tsinghua University and Beijing Forestry University. In 2019, it established an academician workstation to promote the research and development of smart factories and MES systems. The company has 31 patents and 6 software copyrights, and related projects have been listed as municipal key science and technology projects. With innovation and quality, the company has won the honors of "Science and Technology Innovation Enterprise" of Lingang Economic Development Zone, "Specialized and New" Enterprise of Linyi City, "High-tech Enterprise of Shandong Province", "Well-known Trademark of China", "Green Environmental Protection Product of China", "National Quality and Integrity AAA Brand Enterprise", etc. At the same time, it actively gives back to the society and won the title of "Charitable Love Unit". The company has passed ISO9001 quality management system certification and many international certifications such as US CARB P2 and FSC forest system, winning the trust of global customers.

Contact Name ZHEJIANG JIASHAN FENGHE WOOD PRODUCTS CO., LTD.
Email hughsong@fhvener.com
Website www.fhvener.com
Profile Zhe Jiang Jiashan Feng He Wood Products Co., Ltd. was established in 1998. We are one of the largest veneer factories in China. Our factory covers an area of over 50,000 m² area. Feng He is specialized in producing high quality natural veneer in various species, such as American species, like Red Oak, White Oak, Walnut, Cherry, Maple, Hickory, Red Alder, Sycamore, Figured Maple and so forth. The family, whose second generation is closely involved in the factory management today, has a love for veneer which ensures Feng He stays at the forefront of its own field and become the leading manufacturer in China. Our factory is located in Jiashan City, ZheJiang province, which is about one and half hour drive from PVG, Shanghai. The factory is equipped with the most advanced and efficient machinery for the workforce. Our factory's production capacity is 3,000 Cubic Meters per month, which is about producing 5 containers of logs everyday. Feng He is equipped with 4 Capital Vertical slicers, 3 of them use the most up-to-date Merritt Vacuum Table. 1 Merritt UP Cut Slicer. Differed from traditional hydraulic dogs, vacuum table is allowed us to provide high yield and less production defects by slicing log flitch more thinner and smoother. Also we have 4 modern dryers to ensure a stable control of moisture and flatness for our veneer. Our log buyers in the US has 30 years of experience in log buying. They work diligently through the whole year to search and inspect high quality logs. Every sheet of veneer comes from the beginning of a log, we focus on the true origin and purchase those logs that we are confident in the result of veneer, which in other words to meet our customers' requirement. Our factory has an organized warehouse to store all the veneer in good condition. It's clean and cosy showroom gives our customers a warm welcome feeling to inspect their products in a comfortable condition. Feng He's sales team is always on hand to deal with any of our customers' requirements at any time.
