

2022 Code on the Beach Azure Logic Apps Workshop

Bryan Soltis – Microsoft Cloud Solution Architect

Serverless in Azure

- Azure Functions
 - Single executions
 - Durable functions
- Azure Logic Apps
 - Workflows
 - Integrations
- Platform as a Service (PaaS)
 - Web Apps
 - Mobile Apps
 - APIs
- Software as a Service (SaaS)
 - Office365
 - Dynamics CRM
- Databases
 - Azure SQL Database
 - Azure Cosmos DB
- Anything where you don't worry about/access the OS

Azure Logic Apps

- Low Code / No Code workflows
- Rapid development
- Integrate services/systems
- Quickly configure complex workflows
- Detailed reporting / logging

Identifying a Workflow

- Business process
 - Machine to Machine communication
 - Event processing
- Manual workflows
 - Data manipulation/replication
 - Recurring actions
- System integrations
 - B2B/B2C
- Notifications

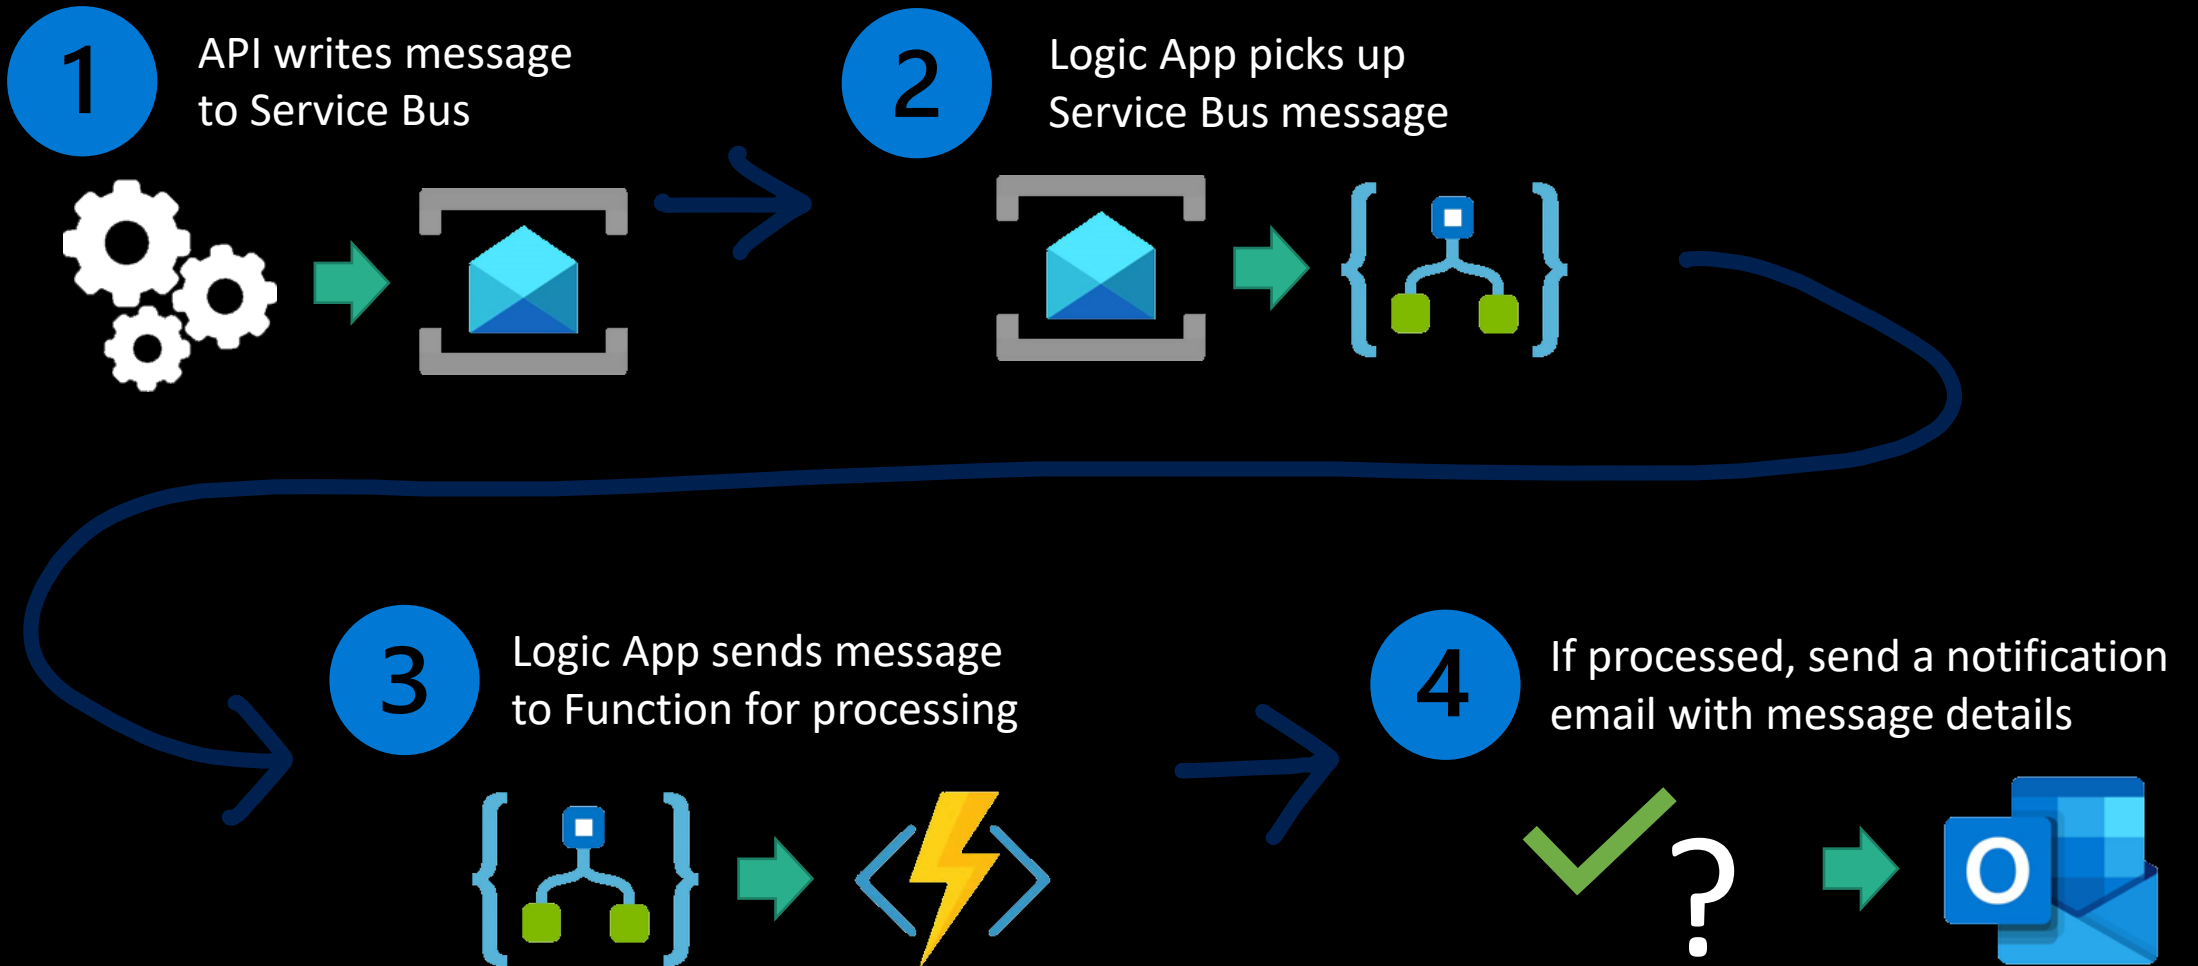

Workflows

- Recipes vs Blank Templates
- Connect Functions, Logic Apps, CRM, Office
- Automated executions
- “Peek-lock receive a Service Bus Message and complete it”
- “Process and Post a message when an FTP file is uploaded”
- “Once a day, process Azure Storage files and send a summary”
- “Watch Twitter for a hastag and translate it to Klingon”

Sample Approach

Get the Labs!

<https://aka.ms/2022COTBLogicApps>

<https://aka.ms/2022COTBLogicApps>

#1: Basic HTTP Request

- Level: **Beginner**
- Audience: General
- Easy to implement in any environment
- Basic data handling

#2: Convert Azure Blob Storage JSON to CSV

- Level: **Moderate**
- Audience: Developer / Data
- Interaction with Azure Blob Storage
- JSON data handling

#3: Deploy a container on a schedule

- Level: **Moderate**
- Audience: Developer / Infrastructure
- Requires deploying Azure Container Instance
- Requires an Azure Container Registry (included in lab)

#4: Call An Azure Function and Post to Slack

- Level: **Advanced**
- Audience: Developer
- Interaction with Azure Functions
- Requires building/deploying an Azure Function (demo source code provided in lab)
- Data Manipulation

#5: Automate GitHub Pull Request Merging

- Level: **Moderate**
- Audience: General/Developer
- Interaction with GitHub/Slack team
- Requires GitHub project
- Requires Slack team (demo team provided in lab)

Shameless Plug
