

I, for one, welcome our new Azure Automation Overlords!

Bryan Soltis | Kentico Technical Evangelist | Microsoft Azure MVP | @bryan_soltis

What does Serverless mean in Azure?

- Azure Functions
- Azure Logic Apps
- Logic App Connectors
- Docker / Kubernetes?

Automation

- Simplified implementation
- Integrated systems
- Triggers
- Parameters
- On-demand
- Schedules / Timers

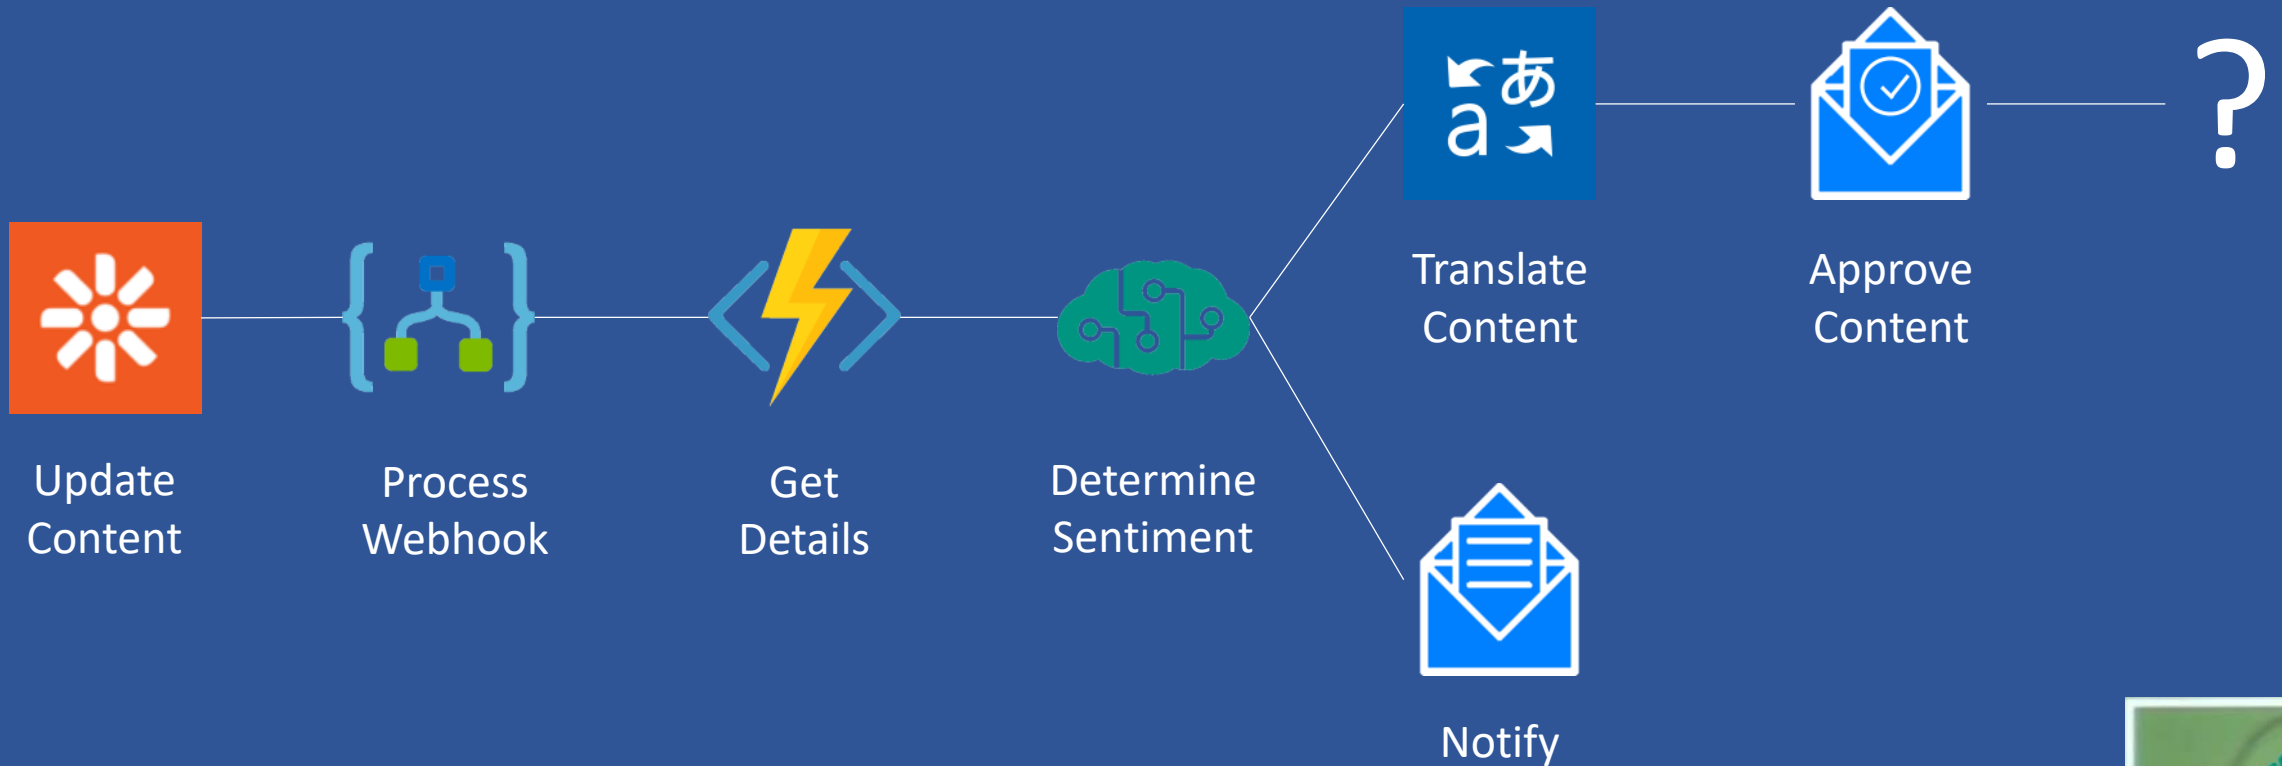

AI / Cognitive Services

- Translations
- Sentiment
- Language detection
- Cognitive services
 - Media content
 - Age
 - Tone
 - Explicit content?

The Process

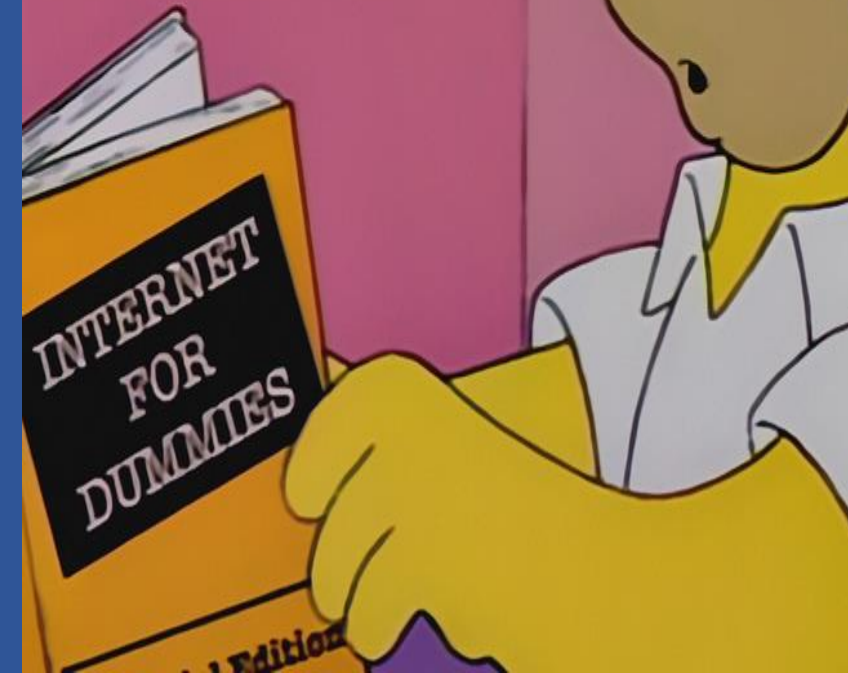

Let's see it in action!

Here's some links

- Azure Functions
<https://azure.microsoft.com/en-us/services/functions/>
- Connectors for Azure Logic Apps
<https://docs.microsoft.com/en-us/azure/connectors/apis-list>
- Azure Cognitive Services
<https://azure.microsoft.com/en-us/services/cognitive-services/>
- Microsoft Translator API
<https://www.microsoft.com/en-us/translator/business/>
- Kentico Cloud
<https://kenticocloud.com>

Questions?

Let's keep talking!

Highlights

- Logic Apps make automation super fast
- Azure Functions can do just about anything
- You can connect almost anything
- There are TONS of built in connectors and processes
- Most stuff in Azure is free for dev

Nacho nacho man.
