I, for one, welcome our new Azure Automation Overlords!

Bryan Soltis | Microsoft Application Development Manager| @bryan_soltis

What does Serverless mean in Azure?

- Isolated, stand-alone code
- Azure Functions
- Azure Logic Apps
- Logic App Connectors
- Containers / Docker / Kubernetes?

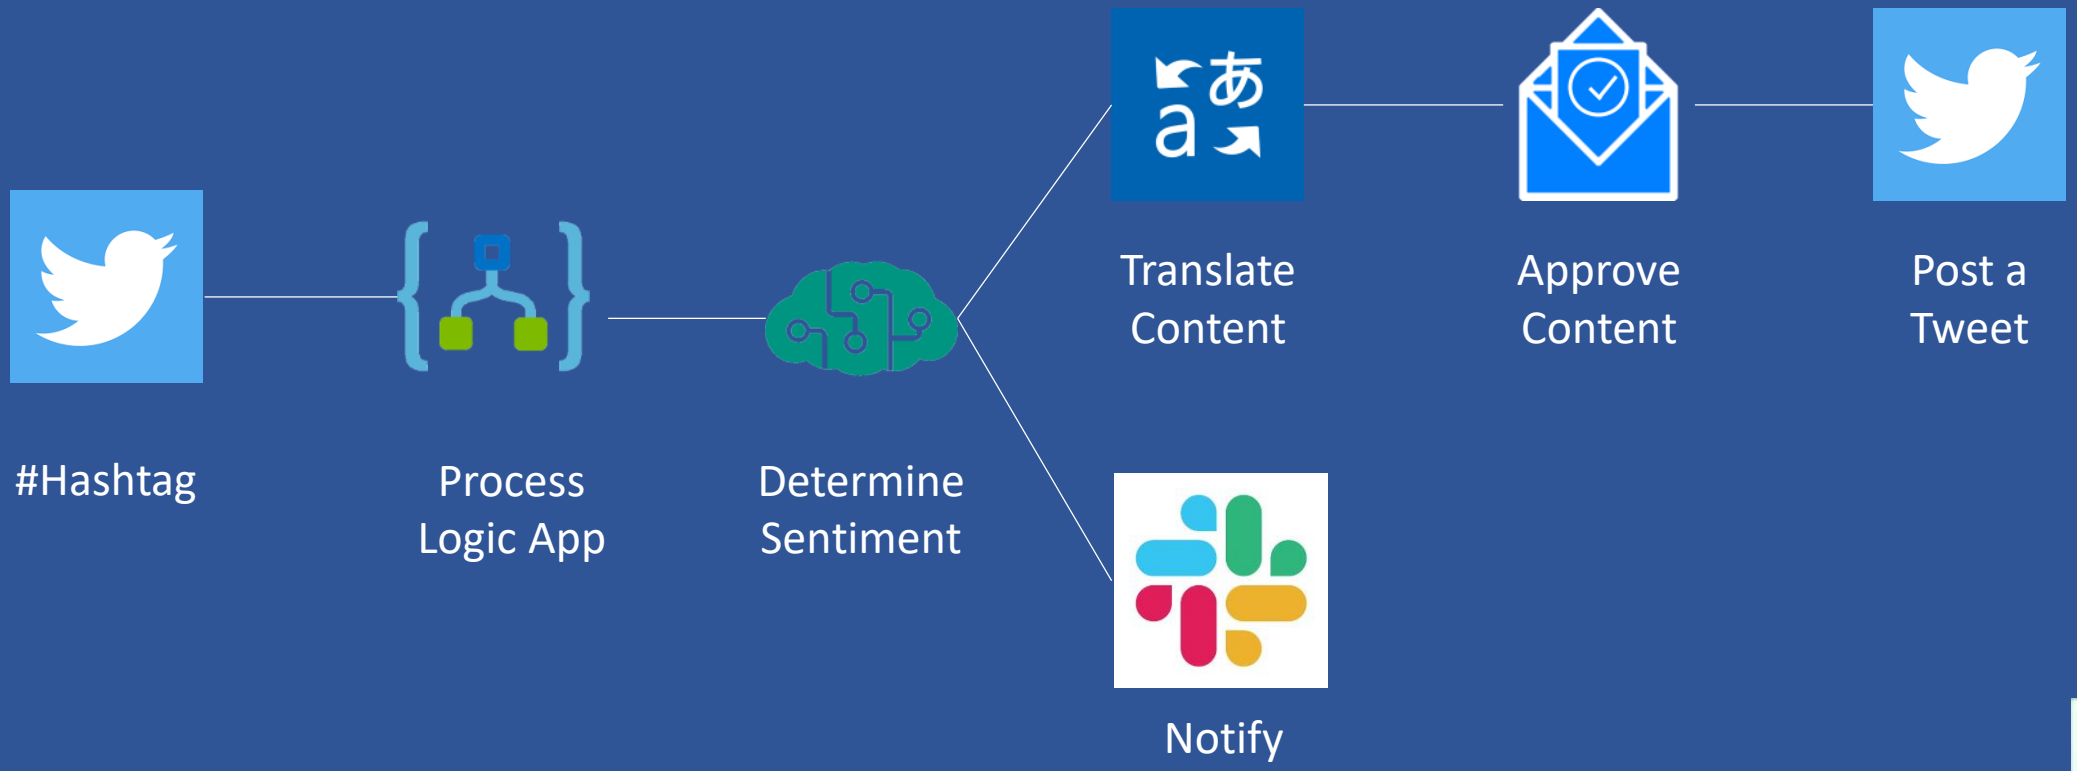
Automation

- Simplified implementation
- Integrated systems
- Triggers
- Parameters
- On-demand
- Schedules / Timers

AI / Cognitive Services

- Translations
- Sentiment
- Language detection
- Cognitive services
  - Text/Vision/Speech
  - Media content
  - Age
  - Explicit content?

The Process



#Hashtag
Process Logic App
Determine Sentiment
Translate Content
Approve Content

Let’s see it in action!

Highlights

- Logic Apps make automation super fast
- You can connect almost anything
- There are TONS of built in connectors and processes
- Azure Functions can do just about anything
- Most stuff in Azure is free for dev

Here’s some links
