# Overview of Online Application Process

Primary Eligibility Pathway

Students Need to Create Online Accounts

As Program Director, you'll share instructions for creating online accounts with your students.

1

Verify Your Students' Accounts

When a student sets up an account, we'll ask you to review and verify or reject the account request. Once approved, the student can log in.

2

Students Apply Online

When a student is within three months of graduation, we'll let them know they can complete and submit their application online.

3

Log into our Program Directors' website for more details, including screenshots and full instructions.
