

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Hasbro (NASDAQ: HAS) is a global play and entertainment company committed to making the world a better place for all children, fans and families. Hasbro delivers immersive brand experiences for global audiences through consumer products, including toys and games; entertainment through eOne, its independent studio; and gaming, led by the team at Wizards of the Coast, an award-winning developer of tabletop and digital games best known for fantasy franchises MAGIC: THE GATHERING and DUNGEONS & DRAGONS. The Company's unparalleled portfolio of approximately 1,500 brands includes MAGIC: THE GATHERING, NERF, MY LITTLE PONY, TRANSFORMERS, PLAY-DOH, MONOPOLY, BABY ALIVE, DUNGEONS & DRAGONS, POWER RANGERS, PEPPA PIG and PJ MASKS, as well as premier partner brands. For over the past decade, Hasbro has been consistently recognized for its corporate citizenship, including being named one of the 100 Best Corporate Citizens by 3BL Media and one of the World's Most Ethical Companies by Ethisphere Institute.

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

Operational control

C0.8

(C0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

Indicate whether you are able to provide a unique identifier for your organization	Provide your unique identifier
Yes, a Ticker symbol	HAS

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

Position of individual(s)	Please explain
Board-level committee	At the board level, Hasbro's Nominating, Governance and Social Responsibility Committee [the Committee] has the highest responsibility and oversight for climate-related issues. The Committee oversees Hasbro's ESG agenda, including sustainability and climate-related matters. In concert with the full Board, the Committee reviews and assesses Company policies and practices regarding climate and other ESG-related issues. Also, Hasbro's full Board are regularly updated and consider climate strategy and sustainability matters, including climate-related risks and opportunities, in their decision-making. For example, the Committee has ratified our climate-related policies, including our Climate Change Commitment, our EHS Policy, our Paper and Forest Procurement Policy, as well as initiatives like eliminating plastic from our packaging and our toy recycling program.

C1.1b

(C1.1b) Provide further details on the board’s oversight of climate-related issues.

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Scope of board-level oversight	Please explain
Scheduled – some meetings	Reviewing and guiding strategy Reviewing and guiding major plans of action Reviewing and guiding risk management policies Reviewing and guiding annual budgets Reviewing and guiding business plans Setting performance objectives Monitoring implementation and performance of objectives Overseeing major capital expenditures, acquisitions and divestitures Monitoring and overseeing progress against goals and targets for addressing climate-related issues	<Not Applicable>	The Board has specific oversight of climate activities through the Nominating, Governance and Social Responsibility Committee of the Board. Climate, along with other ESG topics, are regular agenda items for the Committee, which analyzes these issues and related corporate conduct relevant to the company’s business and makes recommendations to the full Board. In addition, the Audit Committee of the Board oversees SEC and public disclosures in specific areas like climate risk and enterprise risk. The full Board receives regular updates, and at least quarterly reports, regarding our progress on ESG-related issues.

C1.1d

(C1.1d) Does your organization have at least one board member with competence on climate-related issues?

	Board member(s) have competence on climate-related issues	Criteria used to assess competence of board member(s) on climate-related issues	Primary reason for no board-level competence on climate-related issues	Explain why your organization does not have at least one board member with competence on climate-related issues and any plans to address board-level competence in the future
Row 1	Yes	Experience overseeing Sustainability/ESG programs	<Not Applicable>	<Not Applicable>

C1.2

(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.

Name of the position(s) and/or committee(s)	Reporting line	Responsibility	Coverage of responsibility	Frequency of reporting to the board on climate-related issues
Other C-Suite Officer, please specify (Chief Purpose Officer)	<Not Applicable>	Both assessing and managing climate-related risks and opportunities	<Not Applicable>	Quarterly

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

Climate-related issues are overseen by the Chief Purpose Officer, who reports to the CEO and is a member of senior management. The Chief Purpose Officer sets strategic direction for our global ESG strategy and performance, including our climate strategy and performance. The sustainability and ESG functions both are under the Chief Purpose Officer, who ensures the integration of ESG and climate strategy throughout the global organization and supply chain. The Chief Purpose Officer also chairs the executive ESG Committee, which is composed of members of our Executive Leadership Team, meets several times a year to ensure rigorous management oversight of the company’s ESG strategy, impact and performance, identifying gaps and opportunities.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

	Provide incentives for the management of climate-related issues	Comment
Row 1	Yes	For employees directly involved in sustainability and CSR, including our Chief Purpose Officer, Vice President of Global Sustainability and Human Rights, Senior Director of EHS & Sustainability, Director of CSR, Senior Manager of ESG, and EHSS Manager, sustainability progress is part of performance evaluations and annual bonuses. The measurements include progress against our stated goals including emissions reduction, energy reduction, water usage reduction, and waste-to-landfill reduction goals. Our Facilities managers are also incentivized on environmental performance and progress in our owned and operated facilities.

C1.3a

(C1.3a) Provide further details on the incentives provided for the management of climate-related issues (do not include the names of individuals).

Entitled to incentive	Type of incentive	Activity incentivized	Comment
Corporate executive team	Monetary reward	Emissions reduction target Efficiency target Behavior change related indicator	Hasbro has instituted an ESG performance element to Executive Named Officers compensation based company performance against ESG areas including environmental and climate-related matters.
Other C-Suite Officer	Monetary reward	Emissions reduction target Efficiency target Behavior change related indicator	For employees directly involved in sustainability and CSR, including our Chief Purpose Officer, Vice President of Global Sustainability and Human Rights, Senior Director of EHS & Sustainability, Director of CSR, Senior Manager of ESG, and EHSS Manager, sustainability progress is part of performance evaluations and annual bonuses. The measurements include progress against our stated goals including emissions reduction, energy reduction, water usage reduction, and waste-to-landfill reduction goals. Our Facilities managers are also incentivized on environmental performance and progress in our owned and operated facilities.
Business unit manager	Monetary reward	Energy reduction project Efficiency target Behavior change related indicator	For employees directly involved in sustainability and CSR, including our Chief Purpose Officer, Vice President of Global Sustainability and Human Rights, Senior Director of EHS & Sustainability, Director of CSR, Senior Manager of ESG, and EHSS Manager, sustainability progress is part of performance evaluations and annual bonuses. The measurements include progress against our stated goals including emissions reduction, energy reduction, water usage reduction, and waste-to-landfill reduction goals. Our Facilities managers are also incentivized on environmental performance and progress in our owned and operated facilities.
Environmental, health, and safety manager	Monetary reward	Emissions reduction target Behavior change related indicator	For employees directly involved in sustainability and CSR, including our Chief Purpose Officer, Vice President of Global Sustainability and Human Rights, Senior Director of EHS & Sustainability, Director of CSR, Senior Manager of ESG, and EHSS Manager, sustainability progress is part of performance evaluations and annual bonuses. C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

Materiality/priority at Hasbro is based on a combined analysis of Risk Impact and the Risk Trend. We evaluate the overall impact of each risk which may be financial, operational or reputational and evaluate the magnitude of the risk and the effectiveness of our monitoring and mitigating activities in assessing the potential severity of a risk to Hasbro. We also consider how the risk is trending to determine if any additional mitigating actions are required. We use a color-coding system on our reports and dashboards to indicate if our risk is High, Moderate or Low and use arrows for our trend indication to quickly draw attention to risks which are trending up for Hasbro.

C2.2

(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

Medium-term
Long-term

Description of process

Hasbro has developed an enterprise risk management (ERM) process that guides the identification, assessment and actions taken related to potential developments that can have impact on our business. The process incorporates an interdisciplinary group with a diverse set of skills to assess the potential risks that issues may pose for the company. Proposed and final regulatory actions and other developments related to climate change are considered as part of this risk management process. Oversight of Hasbro's robust, company-wide risk assessment and risk management process is provided by the full board of directors and board committees. For significant risks related to social and environmental issues, including climate change, environmental sustainability, human rights, and ethical sourcing, the Nominating, Governance and Social Responsibility Committee has oversight for the risks and efforts to manage risks to the company in those areas. Upstream, as part of our efforts to identify and manage climate risks in our supply chain, Hasbro is the first toy company to engage the Higg Index from the Sustainable Apparel Coalition with our manufacturing suppliers. This is helping us better measure our environmental impacts in the supply chain and pinpoint areas for improvement. There are also environmental impact assessments included in our annual audits of suppliers as part of our annual audit process. Downstream, Hasbro has implemented several programs to help reduce our environmental impact. We use third-party programs to improve the environmental footprint of our logistics operations. For example, Hasbro has been a member of the U.S. Environmental Protection Agency (EPA) SmartWay® Transport Partnership since 2012. This program helps business move products as efficiently as possible while utilizing transportation SmartWay members. While not a requirement, we have a preference to work with SmartWay carriers. In 2016, we met our goal of shipping over 90 percent of our domestic U.S. freight using SmartWay carriers. In Southern California, we utilize the PierPass program, which relieves congestion, shortens wait times at security checkpoints and improves air quality at the ports of Los Angeles and Long Beach by encouraging off-peak activity. Reducing container movement during peak hours means fewer trucks on the road during heavy traffic periods, reducing fuel consumption and emissions. In 2016, 50 percent of our containers at these ports were moved during off-peak hours. We remain committed to finding ways to optimize our logistics network to reduce our environmental impacts while meeting our business needs. In 2017, we carried out a project to better understand the carbon footprint of our U.S. export logistics with the goal of understanding the carbon emissions of various modes of transportation to help inform future logistics strategies. And, in partnership with our ocean carriers, Hasbro has also engaged in the Clean Cargo initiative from BSR. Through this program, we work with our shippers to collaborate with other companies to create cleaner, more climate friendly ways of shipping goods to market.

C2.2a

(C2.2a) Which risk types are considered in your organization's climate-related risk assessments?

	Relevance & Inclusion	Please explain
Current regulation	Relevant, always included	Hasbro is subject to climate-related regulations at national and local levels worldwide. Changes in the laws governing Hasbro can have a direct impact on our business. Through its trade associations and on its own, Hasbro monitors and/or participates in public policy debate and regulatory developments related to key issues, including environmental issues impacting our operations and manufacturing. Hasbro's Global Government Affairs team, led by our EVP and Chief Purpose Officer directs and oversees public policy engagement, working closely with regional and country-level staff on the ground as well. This includes engaging on significant environmental policy. For example, chemical and materials management is an important aspect of our business and the regulatory environment can vary greatly by jurisdiction. In the United States, it varies state by state which can create confusion in the market and make it difficult to adhere to each standard. Our Global Government Affairs team worked collaboratively with U.S. Congress and NGO partners to encourage development of one uniform national standard for chemical safety. This led in 2016 to the passage of the Chemical Safety Improvement Act (CSIA), which was the first substantial revision to chemical laws in the U.S. since 1976.
Emerging regulation	Relevant, always included	Hasbro is subject to climate-related regulations at national and local levels worldwide. Changes in the laws governing Hasbro can have a direct impact on our business. For example, we anticipate that governments globally will implement climate regulations to reduce their country's impact on the environment and contribution to global climate change. Additionally, regulators, like the US SEC in response to increased investor demands for such disclosures, are considering requiring companies to disclose more on their environmental impacts as well as the risks and opportunities they face in their business from climate change, which we expect will increase pressure on companies to drastically reduce their emissions. Hasbro has taken proactive measures to address this risk through its environmental policies and emissions reductions goal. Also, through its trade associations and on its own, Hasbro monitors and/or participates in public policy debate and regulatory developments related to key issues, including environmental issues impacting our operations and manufacturing. Hasbro's Global Government Affairs team, led by our Chief Purpose Officer, who also serves as EVP of Government, Regulatory Affairs and CSR, directs and oversees public policy engagement, working closely with regional and country-level staff on the ground as well.
Technology	Relevant, not included	Hasbro is currently evaluating technology tools to help with our transition to a low carbon environment. We plan to include this is a risk element at a future date.
Legal	Relevant, always included	Our Chief Purpose Officer, an attorney, leads our Government, Regulatory Affairs and CSR organization. Members of the team also include lawyers with expertise in their specific regions (Europe, Latin America, Asia-Pacific) and other professionals. As such, all of our risk management activity takes place in close coordination with Hasbro legal counsel. Furthermore, we engage with outside counsel on marketing claims related to sustainability and other issues to assure that our programs meet or exceed legal requirements. For example, prior to our release of our Monopoly Go Green and Mr. Potato Head Goes Green products, which were made with eco-preferred and sustainably sourced materials, all sustainability claims including in marketing materials and e-commerce copy, as well as on- and in-box claims, were sent to outside counsel for review and approvals before launch.
Market	Relevant, sometimes included	On the demand side, providing products that consumers cherish is a two-way process. We respond to concerns about our products and suggestions on how we can improve them. Through our global online communities, we learn about issues that matter to families and how we can help. Through this process, we learn what issues matter most to parents and their families including issues regarding product sustainability and our environmental impact and changing consumer habits. This influences our product direction and strategic decisions. For example, in 2019 Hasbro set the goal to eliminate virtually all single-use plastic in packaging by the end of 2022. We are also developing products that use more eco-preferred materials such as bio- and recycled plastics. Lastly, Hasbro was the first toy company to launch a toy recycling program which is now available in six of our top markets and growing. For our supply chain, our logistics and supply chain operations also consider climate-related risks in their strategy and planning, including mapping at-risk facilities (such as those in frequent hurricane paths) and creating back-up plans should a facility need to close due to climate-related activity.
Reputation	Relevant, always included	We also recognize that our stakeholders, including consumers, review our progress and performance in these areas influences their perception which in turn can influence our corporate and/or product brands reputation. For example, we have set a goal to eliminate plastic from our packaging in part to help us stay ahead of changing stakeholder attitudes about single-use plastics and their environmental impact.
Acute physical	Relevant, always included	Acute physical risks from climate change are an integral part of our annual and ongoing frequent planning processes. For example, the largest concentration of our outsourced manufacturing is located in the Pearl River Delta region of Southeast China in the Guangdong Province. As climate change has increased, so has the frequency and severity of weather events in the region which, in some severe cases, could impact our supply chain. Impacts could include flooding or port closure due to increasingly powerful and frequent typhoons, or, as seen in 2020, electricity shortages due to abnormally high temperatures. Mitigating this risk requires diversifying the supplier base to more regions and diversifying the ports we use. Our long-term goal is to continue to diversify our manufacturing base so that we balance our volumes around the key supply hub, while bringing our manufacturing as close as possible to our current and future sales markets. Alongside this effort, we are also diversifying our distribution channels and processes to ensure supply chain resilience, including better ability to respond to climate-related issues impacting any one region. For example, we now use multiple ports at both the origin and destination should any one of them be impacted due to severe weather or any unforeseen disaster.
Chronic physical	Relevant, always included	Chronic risks from climate change are also considered in our strategy and planning. For example, in 2016, we met our goal of shipping over 90 percent of our domestic U.S. freight using SmartWay carriers. In Southern California, we utilize the PierPass program, which relieves congestion, shortens wait times at security checkpoints and improves air quality at the ports of Los Angeles and Long Beach by encouraging off-peak activity. In 2017, we carried out a project to better understand the carbon footprint of our U.S. export logistics with the goal of understanding the carbon emissions of various modes of transportation to help inform future logistics strategies. We now use that data in our planning. And, in partnership with our ocean carriers, Hasbro has also engaged in the Clean Cargo initiative from BSR. Through this program, we work with our shippers to collaborate with other companies to create cleaner, more climate friendly ways of shipping goods to market. Moreover, Hasbro has been diversifying our distribution channels and processes to ensure supply chain resilience, including better ability to respond to climate-related issues impacting any one region. For example, we now use multiple ports at both the origin and destination should any one of them be impacted due to severe weather or any unforeseen disaster.

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

<Not Applicable>

Company-specific description

Most of our third-party manufacturing is located in the Asia-Pacific region and severe weather events in this area due to climate change could significantly impact our

operations and ability to produce product and/or get it to market. For example, the largest concentration of our outsourced manufacturing is located in the Pearl River Delta region of Southeast China in the Guangdong Province. As climate change has increased, so has the frequency and severity of weather events in the region which, in some severe cases, could impact our supply chain. Impacts could include flooding or port closure due to increasingly powerful and frequent typhoons, or, as seen in 2021, natural gas shortages and abnormally high temperatures.

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

Approximately 52% of our global suppliers were based in China as of the end of 2021, with nearly all of them in Guangdong Province. While we consider the financial impact confidential, in the extremely unlikely event that a climate-related event shuts down all production in this region, the financial impact would be the lost revenue from production in this region for the period of closure.

Cost of response to risk

Description of response and explanation of cost calculation

Mitigating this risk requires diversifying the supplier base to more regions and diversifying the ports we use. Diversifying our supplier base requires sourcing and capacity building at new factories with vendors that may not be experienced with our industry or products, among other costs (see below for details). Case Study: Hasbro has been actively working to diversify our supplier base for the past several years, reducing reliance on sources of supply from China. The company went from having 55% of global suppliers based in China to 52% in 2021. This work has meant investing in building manufacturing capacity in Vietnam, India and Mexico as well as evaluating opportunities for near- or onshore production in Europe, the US and Brazil. Our long-term goal is to continue to diversify our manufacturing base so that we balance our volumes around the key supply hub, while bringing our manufacturing as close as possible to our current and future sales markets. As per December 26, 2021, 48% of third-party product manufacturing was sourced outside of China and approximately 20% of the products sold in the USA are made in the USA. We consider the specific cost of these activities confidential, but costs include new tooling, production ramp up, training, revamping supply routes to build up capacity in new regions, government fees, and more. As Hasbro is already shifting its production to new sites, the funding for this mitigation effort is already considered in our costs and we expect this risk to continue to diminish as we increasingly diversify the locations of our supplier base.

Risk 2

Where in the value chain does the risk driver occur?

Direct operations

Risk type & Primary climate-related risk driver

Emerging regulation	Carbon pricing mechanisms
---------------------	---------------------------

Primary potential financial impact

Increased direct costs

Climate risk type mapped to traditional financial services industry risk classification

<Not Applicable>

Company-specific description

We anticipate that governments globally will implement climate regulations to reduce their country’s impact on the environment and contribution to global climate change. For example, a number of governments in regions, in which Hasbro has offices and contracts for manufacturing of our products, have introduced ambitious plans to reduce greenhouse gas emissions by 2030: The EU is debating a plan to reduce greenhouse gas emissions by 55% compared to 1990 levels; the UK has pledged a 68 percent reduction; and China, which has made less ambitious promises, says it will reduce carbon intensity by more than 65% in 2030 compared to 2005 levels. Additionally, regulators, like the US SEC in response to increased investor demands for such disclosures, are requiring companies to disclose more on their environmental impacts as well as the risks and opportunities they face in their business from climate change, which we expect will increase pressure on companies to drastically reduce their emissions.

Time horizon

Medium-term

Likelihood

Likely

Magnitude of impact

High

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

We expect that governments in our major markets will increasingly look to put a price on carbon as a policy tool to reduce greenhouse gas emissions in their fights against climate change. Hasbro's 2021 CO2 emissions were about 554,826 tCO2e including all Scope 1 and Scope 2 emissions and Scope 3 for tier 1 manufacturing facilities, ocean, air and trucking between warehouse and factory product transport, 3rd party distribution centers, and employee air travel. The financial impact would be the price set for carbon (depending on the boundaries and conditions of the law) multiplied by the amount of Hasbro carbon emissions in scope for the legislation.

Cost of response to risk

Description of response and explanation of cost calculation

We do not have cost estimates at the moment, but to respond to this risk, Hasbro has invested in renewable energy in the markets in which we operate and we are implementing plans to lower the carbon emissions throughout our value chain, including by using lower impact product and packaging materials, and implementing energy efficiency initiatives in our operations. Also, through its trade associations and on its own, Hasbro monitors and/or participates in public policy debate and regulatory developments related to key issues, including environmental issues impacting our operations and manufacturing. Hasbro's Global Government Affairs team, led by our Chief Purpose Officer, who directs and oversees public policy engagement, working closely with regional and country-level staff on the ground as well. Case study: In 2019, Hasbro set a goal to remove virtually all single-use plastic in new product packaging by the end of 2022, and the company is on track to complete this goal. We also have a stated policy of using at least 90% recycled or FSC certified sustainability sourced paper. In addition, our plastic-free packaging goal will make our packaging more easily recyclable across markets which contributes to lower carbon emissions in the marketplace. We expect to avoid an estimated 19.5 million pounds of plastic by the end of 2022 on an annual basis through this elimination of plastic in our packaging.

Where in the value chain does the risk driver occur?

Direct operations

Risk type & Primary climate-related risk driver

Market	Changing customer behavior
--------	----------------------------

Primary potential financial impact

Decreased revenues due to reduced demand for products and services

Climate risk type mapped to traditional financial services industry risk classification

<Not Applicable>

Company-specific description

On the demand side, providing products that consumers cherish is a two-way process. We respond to concerns about our products and suggestions on how we can improve them. Through our Consumer Care organization, we monitor and track customer inquiries related to climate, the environment, and a range of CSR-related issues. And through our global communities and Global Insights organization we monitor and analyze trends in the market, including those related to our products and their impact on the environment, to help us stay ahead of changing consumer habits. Through these processes, we learn what issues matter most to parents and their families including issues regarding product sustainability and our environmental impact. We know that consumer preferences are changing and the use of plastics, primarily in packaging, is a rising concern. This could lead to consumers increasingly making decisions based on factors like company reputation and commitment to the environment, or perceived environmental friendliness of products and their packaging, and the materials that go into them. Hasbro needs to be aware and stay ahead of such trends are risk losing significant market share in the future.

Time horizon

Long-term

Likelihood

Very unlikely

Magnitude of impact

High

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

Nearly 70% of consumers in the U.S. and Canada said it is important that a brand is sustainable or eco-friendly, according to a 2019 study by IBM and the National Retail Federation. Globally, more than a third (40%) of the respondents said they were purpose-driven consumers, who select brands based on how well they align with their personal beliefs. Furthermore, a third of respondents said they will stop buying a product if they lose trust in the brand. Another third had already ditched their favorite brands in 2019. We consider the results of such studies and based on evolving consumer expectations, we forecast that should Hasbro not pursue eco-friendly and climate-friendly policies and product development, there could be a significant loss of revenue from our consumer products. The financial impact on Hasbro would be the lost revenue, should we not institute measures to address this risk.

Cost of response to risk

Description of response and explanation of cost calculation

While we have not seen significant evidence that consumers have changed their sentiment regarding our products and policies, Hasbro has been working for over a decade on creating more eco-friendly products and packaging. For example, in 2019 we began eliminating plastic from packaging with a goal of all new product packaging being

virtually single-use plastic free by the end of 2022. We also continue to implement new eco-preferred materials in our products. In 2020, we released Mr. Potato Head Goes Green and Monopoly Goes Green, in which we used more sustainable materials throughout including plant-based plastics made from renewable sources, 100% FSC certified wood for game pieces, and 100% recycled paper-based materials for game boards, cards, instructions, and packaging including any in-box packaging. In 2021, the company set a target to transition the Potato Head brand to plant-based or renewable materials by the end of 2024 and game lines to recycled or renewable materials by 2033. The learnings from these efforts have informed our strategy for developing future toys and games using recycled and renewable materials across our portfolio of iconic brands like MONOPOLY, PLAYSKOOL, NERF and PLAY-DOH.

Tool is providing wrong drop downs for Opportunity Type v. Primary climate-related opportunity driver

Company-specific description

Hasbro has been diversifying our distribution channels and processes to ensure supply chain resilience, including better ability to respond to climate-related issues impacting any one region. For example, we now use multiple ports at both the origin and destination should any one of them be impacted due to severe weather or any unforeseen disaster. Case study: the port of Yantian, China, from which most of our product has traditionally been shipped, was shut down during a COVID-19 outbreak. (We estimate the impact would be similar should a climate-related event shut down one of the major ports we use). Because of the diversification we have implemented, we were able to redirect our volume through seven other ports to get our product to their markets around the globe. To support the overall diversification effort, we also activated four new ports in the US where we can bring our supply in from alternate ports at origin. We are also diversifying our ocean carrier base tripling the number of carriers in the last year. This provides us with enough coverage should one or more be impacted by any unforeseen climate-related scenario.

Time horizon

Short-term

Likelihood

Magnitude of impact

High

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

By diversifying our supply chain and outgoing and inbound ports, we are building more resiliency into our supply chain to withstand severe climate-related events in any one area. As noted above, this recently allowed us to shift outbound shipping from our most used port to others to minimize any delay in orders. We were able to meet retailers' expectations and get our product to market to realize revenue that may have otherwise been lost.

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation

We consider the cost to diversify our ports, suppliers, and shipping carriers confidential, but we estimate these costs include increased linehaul and drayage costs at origin and destination, increased cost of setting up new lane pairings on non-frequented lanes, increased customs and brokerage costs, increased internal and external headcount (for our service providers), and other such costs to support a more diversified, wider and extensive end-to-end distribution network.

Comment

Identifier

Opp2

Where in the value chain does the opportunity occur?

Direct operations

Opportunity type

Products and services

Primary climate-related opportunity driver

Development and/or expansion of low emission goods and services

Primary potential financial impact

Increased revenues resulting from increased demand for products and services

Company-specific description

We are seeing increasing demand from retailers (our customers) and consumers, as well as from governments, for easier to recycle packaging. One of the primary hinderances to packaging recycling today is the use of plastic. In 2019, Hasbro announced plans to eliminate all plastic from packaging by the end of 2022. We believe this presents an advantage for Hasbro and will increase demand for Hasbro products over competitors as we shift completely to plastic-free packaging. Additionally, we expect some of our major markets will pass legislation that restricts acceptable packaging or shifts the burden of packaging disposal costs to the producer. For example, the state of Maine recently passed legislation that requires producers be responsible for the cost of packaging disposal. The law requires producers pay into a fund that local governments can use to pay for packaging management costs. The law also includes an eco-modulation system meant to incentivize companies to create packaging that is easier to recycle and reuse. Oregon is expected to follow shortly as are a number of other states. Similar legislation is proposed in Canada and the EU. We believe Hasbro's shift to plastic-free packaging will allow us to not only benefit from reduced regulatory fees in these markets due to nearly entirely paper-based (using at least 90% recycled or FSC certified paper) packaging that is easily recyclable in most of our leading markets but will also make our products preferred by retailers and consumers alike.

Time horizon

Medium-term

Likelihood

Virtually certain

Magnitude of impact

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

By shifting to plastic-free packaging now and setting an ambitious goal of the end of 2022, we think we will be more ready for these shifts in law as well as government & consumer sentiment as these issues impact the market more. We project that this would result in a revenue increase from consumers and retail customers preferring our products. We consider the financial impact from these gains confidential

Cost to realize opportunity**Strategy to realize opportunity and explanation of cost calculation**

By shifting to plastic-free packaging now and setting an ambitious goal of end of 2022, we think we will be more ready for these shifts in law and government & consumer sentiment as they increasingly impact markets. Our strategy to realize this plan is to redesign our packaging or design new packaging to remove all possible plastic (exceptions are tape, glue and adhesives for which there is no plastic-free alternative at the moment) to meet our plastic-free packaging goal by the end of 2022. We consider the cost of this opportunity confidential, but this effort is already underway, and a number of our product lines are already on shelves without plastic in the packaging. The action also makes our paper-based packaging easier to recycle in many markets, which helps to make it a preferred selection by consumers and retailers.

Comment**Identifier**

Opp3

Where in the value chain does the opportunity occur?

Direct operations

Opportunity type

Resilience

Primary climate-related opportunity driver

Participation in renewable energy programs and adoption of energy-efficiency measures

Primary potential financial impact

Reduced direct costs

The Primary climate-related opportunities do not seem to match the opportunity type selected. Resource Efficiency seems to be more appropriate for "Participation in renewable energy programs". This may be a glitch in the platform. We responded with the Primary Climate-related opportunity driver we felt most aligned with this response. If allowed, we'd select Resource Efficiency for the opportunity type.

Company-specific description

We anticipate that governments globally will implement climate regulations to reduce their country's impact on the environment and contribution to global climate change as noted above in Risk 2. Such legislation, as well as increasing investor and consumer concern about company responses to climate change, can have a positive impact on our business by incentivizing our transition to a low-carbon business. For example, our current 2025 environmental goal for our owned and operated facilities (using a 2015 baseline) to reduce energy consumption by 25% is an incentive to drive efficiencies in our business.

Time horizon

Medium-term

Likelihood

Very likely

Magnitude of impact

Low

Are you able to provide a potential financial impact figure?

No, we do not have this figure

Potential financial impact figure (currency)

<Not Applicable>

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

While we consider the financial impact figures confidential, we estimate that the financial impact would be based on the average energy costs from base year to current year and extrapolating those savings based on meeting our 25% energy reduction goal by 2025.

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation

We consider the costs confidential, but we estimate the costs to realize this opportunity will be based on continuing to implement energy savings programs in our owned and operated facilities. For example, over the past few years we have implemented a number of energy saving initiatives that have saved us an estimated 150 metric tons of CO2e in 2021. These projects include switching to energy efficient lighting; replacing HVAC systems with new, energy efficient systems; and engaging with employees to create a culture of environmental efficiency.

C3. Business Strategy

C3.1

(C3.1) Does your organization’s strategy include a transition plan that aligns with a 1.5°C world?

Row 1

Transition plan

No, but our strategy has been influenced by climate-related risks and opportunities, and we are developing a transition plan within two years

Publicly available transition plan

<Not Applicable>

Mechanism by which feedback is collected from shareholders on your transition plan

<Not Applicable>

Description of feedback mechanism

<Not Applicable>

Frequency of feedback collection

<Not Applicable>

Attach any relevant documents which detail your transition plan (optional)

<Not Applicable>

Explain why your organization does not have a transition plan that aligns with a 1.5°C world and any plans to develop one in the future

Hasbro is in the process of completing an in-depth climate risk analysis. Once this analysis is complete, the company will begin development of its climate transition plan to align with 1.5 degree scenario analysis.

Explain why climate-related risks and opportunities have not influenced your strategy

<Not Applicable>

C3.2

(C3.2) Does your organization use climate-related scenario analysis to inform its strategy?

	Use of climate-related scenario analysis to inform strategy	Primary reason why your organization does not use climate-related scenario analysis to inform its strategy	Explain why your organization does not use climate-related scenario analysis to inform its strategy and any plans to use it in the future
Row 1	No, but we anticipate using qualitative and/or quantitative analysis in the next two years	Other, please specify (Currently in Process)	This climate-related scenario analysis is in process at Hasbro.

C3.3

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.

	Have climate-related risks and opportunities influenced your strategy in this area?	Description of influence
Products and services	Yes	Hasbro has a long history of sustainability in our products and packaging in response to growing climate and environmental issues such as eliminating polybags for instructions in 2009 and wire ties in 2010. In 2013, we eliminated PVC from our packaging and in 2015 implemented our Paper and Forest Procurement Policy to use at least 90% recycled or sustainably sourced paper for packaging and in-box content. In 2017, we introduced the How2Recycle labeling on products sold in the US and Canada, to help and encourage consumer to recycle the packaging correctly. In 2018, we became the first toy company to launch a nationwide toy recycling program which has since expanded to 12 countries as we continue to explore opportunities in more markets for a global recycling program. We are also working with industry associations around the world to create industry-wide toy recycling programs that benefit the entire industry while benefitting the planet. And in 2019, we set our goal to eliminate virtually all single-use plastic from new product packaging by the end of 2022. We are now exploring alternative materials for our products to reduce our overall environmental impact. In 2020, we have released two products, Mr Potato Head Goes Green and Monopoly Go Green, made from alternative, plant-based plastics and other sustainable materials. We are now using the lessons from these efforts to develop an overall strategy for our products as we continue to pursue alternative materials that meet our needs to create fun, safe and quality toys. All these efforts are driven by our commitment to making the world a better place for all children, fans and families which means doing our part to address climate change and its impacts.
Supply chain and/or value chain	Yes	We have been measuring our GHG footprint and analyzing for opportunity to reduce emissions in product transportation and manufacturing in our supply chain for many years. For example, in 2016, we met our goal of shipping more than 90 percent of our domestic U.S. freight using SmartWay carriers. In Southern California, we utilize the PierPass program, which relieves congestion, shortens wait times at security checkpoints and improves air quality at the ports of Los Angeles and Long Beach by encouraging off-peak activity. In 2017, we carried out a project to better understand the carbon footprint of our U.S. export logistics with the goal of understanding the carbon emissions of various modes of transportation to help inform future logistics strategies. We now use that data in our planning. And, in partnership with our ocean carriers, Hasbro has also engaged in the Clean Cargo initiative from BSR. Through this program, we work with our shippers to collaborate with other companies to create cleaner, more climate friendly ways of shipping goods to market. In 2018, we became the first toy company to pilot the Higg Index to understand the environmental impact of our supply chain. 100 % of our suppliers participated and we have since engaged fully with the Higg Index as a way of not only measuring the environmental impact of our supply chain to help us set emission reduction and energy savings goals in our supply chain but to also to better understand the environmental impact of the materials we use in our products. For us sustainability is a journey, not a destination and always informs our activity as we seek to continuously improve our business and our products to make a better world for all children, fans and families.
Investment in R&D	Yes	Hasbro is committed to investing in research & development to improve the environmental footprint of our business. For example, in 2019 and 2020, we piloted the use of plant-based plastics and other renewable materials in two new products, Mr Potato Head Goes Green and Monopoly Go Green. We saw this as a not only a learning opportunity for us and how we make our products, but also to help our consumers better understand our commitment to environmental stewardship now and into the future. We are now using the lessons from these efforts to develop an overall environmental sustainability strategy for our products as we continue to pursue alternative materials that meet our needs to create fun, safe and quality toys that are help improve climate change. All of these efforts are driven by our commitment to making the world a better place for all children, fans and families which means doing our part to address climate change and its impacts.
Operations	Yes	Hasbro is committed to investing in renewable energy and addressing GHG emissions from our owned and operated global operations. For example, in 2021 Hasbro purchased 21,626 megawatt-hours (MWh) of renewable energy certificates (RECs) to address virtually 100 percent (99.4%) of our 2021 global electricity consumption for owned and operated facilities. We then purchased 5% more RECs than needed for local markets where available. In 2021, Hasbro also installed a new, more efficient chiller in our headquarter offices. This is part of our ongoing effort to look for efficiencies in our operations. Moreover, through our Sustainability Center of Excellence, we bring leaders from throughout the company together to raise climate-related risks and opportunities and work collaboratively to address them throughout our operations, in our products, our facilities, our supply chains, and our culture

C3.4

(C3.4) Describe where and how climate-related risks and opportunities have influenced your financial planning.

	Financial planning elements that have been influenced	Description of influence
Row 1	Revenues Direct costs Indirect costs Capital expenditures Capital allocation Acquisitions and divestments Access to capital Assets Liabilities	Revenue: Hasbro is committed to using alternative materials for our products and reducing the environmental impact of our products. For example, in 2021, we launched two new products, Mr Potato Head Goes Green and Monopoly Go Green, using plant-based plastics and other renewable materials. We saw this as a not only a learning opportunity for us and how we make our products, but also to help our consumers better understand our commitment to environmental stewardship now and into the future. We are now using the lessons from these efforts to develop an overall environmental sustainability strategy for our products as we continue to pursue alternative materials that meet our needs to create fun, safe and quality toys that are help improve climate change. We expect to make a public announcement about these efforts, including target dates, soon. All these efforts are driven by our commitment to making the world a better place for all children, fans and families which means doing our part to address climate change and its impacts. For example, we invest in renewable energy programs around the world, in the markets in which we operate, through the purchase of Renewable Energy Certificates (RECs). In 2021, we invested beyond our needs, purchasing 5% more RECs a than needed to cover the energy we used in our owned and operated facilities. We are currently investing in research of new materials for making our products.

C6.7

(C6.7) Are carbon dioxide emissions from biogenic carbon relevant to your organization?

No

C6.10

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure

1.48

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)

9515

Metric denominator

unit total revenue

Metric denominator: Unit total

6420

Scope 2 figure used

Location-based

% change from previous year

36.48

Direction of change

Decreased

Reason for change

Revenue increased while global scope 1 and 2 emissions decreased due to remote work, sold assets, natural gas shortages, and improvement in data quality and accuracy.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?

Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

Greenhouse gas	Scope 1 emissions (metric tons of CO2e)	GWP Reference
CO2	3486	IPCC Fourth Assessment Report (AR4 - 100 year)
CH4	8	IPCC Fourth Assessment Report (AR4 - 100 year)
N2O	8	IPCC Fourth Assessment Report (AR4 - 100 year)
HFCs	104	IPCC Fourth Assessment Report (AR4 - 100 year)
SF6	0	IPCC Fourth Assessment Report (AR4 - 100 year)
NF3	0	IPCC Fourth Assessment Report (AR4 - 100 year)

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

Country/Region	Scope 1 emissions (metric tons CO2e)
Other, please specify (US/Canada)	2271
Other, please specify (Latin America)	129
Other, please specify (Europe, Middle East, & Africa)	1195
Other, please specify (Asia Pacific)	10

C7.3

(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.

By business division

C7.3a

(C7.3a) Break down your total gross global Scope 1 emissions by business division.

Business division	Scope 1 emissions (metric ton CO2e)
US/Canada	2271
Asia-Pacific	10
Europe, Middle East & Africa	1195
Latin America	129

C7.5

(C7.5) Break down your total gross global Scope 2 emissions by country/region.

Country/Region	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)
Other, please specify (USA/Canada)	3526	0
Other, please specify (Latin America)	343	0
Other, please specify (Europe, Middle East, Africa)	1261	15
Other, please specify (Asia-Pacific) <i>RECs not available for two markets in Asia-Pacific: New Zealand and Korea. Hasbro purchased more RECs than needed in each market to help mitigate this issue. That is not reflected in these numbers.</i>	780	33

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.

By business division

C7.6a

(C7.6a) Break down your total gross global Scope 2 emissions by business division.

Business division	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)
US/Canada	3526	0
Latin America	343	0
EMEA	1261	15
Asia-Pacific	780	33

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

Decreased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.

	Change in emissions (metric tons CO2e)	Direction of change	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption		<Not Applicable>		
Other emissions reduction activities	300	Decreased		Emission reductions initiatives like HVAC improvements, lighting upgrades, and employee engagement.
Divestment	62	Decreased		Sold eOne Music and removed 5 locations from Hasbro's portfolio (Paris, London, NY, Munich, and Sydney).
Acquisitions		<Not Applicable>		
Mergers		<Not Applicable>		
Change in output		<Not Applicable>		
Change in methodology		<Not Applicable>		
Change in boundary		<Not Applicable>		
Change in physical operating conditions	2861	Decreased		Emissions reduction as a result of COVID 19 office and utility optimization.
Unidentified		<Not Applicable>		
Other		<Not Applicable>		

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Location-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	Yes
Consumption of purchased or acquired steam	No
Consumption of purchased or acquired cooling	Yes
Generation of electricity, heat, steam, or cooling	No

C8.2a

(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total (renewable and non-renewable) MWh
Consumption of fuel (excluding feedstock)	Unable to confirm heating value	0	16484	16484
Consumption of purchased or acquired electricity	<Not Applicable>	21626	123	21749
Consumption of purchased or acquired heat	<Not Applicable>	0	1292	1292
Consumption of purchased or acquired steam	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired cooling	<Not Applicable>	0	30	30
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Total energy consumption	<Not Applicable>	21626	17929	39555

C8.2b

(C8.2b) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of heat	Yes
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

Sustainable biomass

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

1

Country/area of origin (generation) of the low-carbon energy or energy attribute

Portugal

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

European Legislation Directive 2009/28/EC - 2021 (01/21-12/21)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

Romania

Tracking instrument used

Other, please specify (Guarantee of Origin - Any Technology)

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

3

Country/area of origin (generation) of the low-carbon energy or energy attribute

Romania

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

European Legislation Directive 2009/28/EC - 2021 (01/21-12/21)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

South Africa

Tracking instrument used

I-REC

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

2

Country/area of origin (generation) of the low-carbon energy or energy attribute

South Africa

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

The International REC Standard (I-REC Standard) - 2021 (07/20-03/22)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

Spain

Tracking instrument used

Other, please specify (Guarantee of Origin - AIB Any)

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

318

Country/area of origin (generation) of the low-carbon energy or energy attribute

Spain

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

European Legislation Directive 2009/28/EC - 2021 (01/21-12/21)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

Switzerland

Tracking instrument used

Other, please specify (Guarantee of Origin - AIB Any)

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

37

Country/area of origin (generation) of the low-carbon energy or energy attribute

Switzerland

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

European Legislation Directive 2009/28/EC - 2021 (01/21-12/21)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

Japan

Tracking instrument used

J-Credit

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

37

Country/area of origin (generation) of the low-carbon energy or energy attribute

Japan

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

Comment

J-Credit Implementation Rule (v.4.2) - 2021 (01/18-12/21)

Sourcing method

Unbundled energy attribute certificates (EACs) purchase

Energy carrier

Electricity

Low-carbon technology type

Renewable energy mix, please specify (Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric)

Country/area of low-carbon energy consumption

Malaysia

Tracking instrument used

I-REC

Low-carbon energy consumed via selected sourcing method in the reporting year (MWh)

17

C9. Additional metrics

C9.1

(C9.1) Provide any additional climate-related metrics relevant to your business.

Description

Energy usage

Metric value

39555

Metric numerator

MWh

Metric denominator (intensity metric only)

% change from previous year

5.96

Direction of change

Decreased

Please explain

Energy use decreased due to natural gas shortages, sale of eOne music facilities, employees working remotely, and increased data accuracy.

C10. Verification

C10.1

(C10.1) Indicate the verification/assurance status that applies to your reported emissions.

	Verification/assurance status
Scope 1	Third-party verification or assurance process in place
Scope 2 (location-based or market-based)	Third-party verification or assurance process in place
Scope 3	Third-party verification or assurance process in place

C10.1a

(C10.1a) Provide further details of the verification/assurance undertaken for your Scope 1 emissions, and attach the relevant statements.

Verification or assurance cycle in place

Annual process

Status in the current reporting year

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?

No, but we are actively considering verifying within the next two years

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?

No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?

No

C11.3

(C11.3) Does your organization use an internal price on carbon?

No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our suppliers
Yes, our customers/clients
Yes, other partners in the value chain

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement

Information collection (understanding supplier behavior)

Details of engagement

Collect climate change and carbon information at least annually from suppliers

% of suppliers by number

100

% total procurement spend (direct and indirect)

100

% of supplier-related Scope 3 emissions as reported in C6.5

100

Rationale for the coverage of your engagement

To better understand and address our environmental footprint throughout the value chain.

Impact of engagement, including measures of success

Measurement of complete GHG footprint to identify opportunities for reduction.

Comment

Type of engagement

Engagement & incentivization (changing supplier behavior)

Details of engagement

Run an engagement campaign to educate suppliers about climate change

% of suppliers by number

100

% total procurement spend (direct and indirect)

100

% of supplier-related Scope 3 emissions as reported in C6.5

100

Rationale for the coverage of your engagement

Through customer engagement (see C12.1b) suppliers report climate-related data and support ongoing Hasbro climate initiatives directly with customers.

Impact of engagement, including measures of success

Work with Hasbro to reduce packaging waste and environmental impact to meet customer goals.

Comment

C12.1b

(C12.1b) Give details of your climate-related engagement strategy with your customers.

Type of engagement & Details of engagement

Other, please specify	Other, please specify (Both Education/Information Sharing and Collaboration and Innovation)
-----------------------	---

% of customers by number

% of customer - related Scope 3 emissions as reported in C6.5

Please explain the rationale for selecting this group of customers and scope of engagement

Hasbro regularly engages with its customers including Walmart, Target, Tesco, and Amazon on climate issues including most recently on our plastic-free packaging initiative.

Impact of engagement, including measures of success

Partnerships to reduce packaging waste and environmental impacts.

C12.1d

(C12.1d) Give details of your climate-related engagement strategy with other partners in the value chain.

We contract manufacture products from all around the world with the majority coming from Asia. Our product travels great distances to serve our changing market needs that continue to evolve as our business expands and grows. We contract with a vast logistics network — including trucks, railroads, barges, airplanes, and container ships — to transport our products from factories through distribution centers to retail stores. An important challenge we face is meeting the delivery needs of our customers and managing the costs of delivery, while keeping in mind the environmental impact of the required mode of transportation. Each mode of transportation has a different impact on the environment through their energy usage and resulting carbon emissions. To improve cost efficiency while minimizing the environmental impacts, we pursue a variety of transportation strategies, including: We also utilize third-party programs to improve the environmental footprint of our logistics operations. For example, Hasbro has been a member of the U.S. Environmental Protection Agency (EPA) SmartWay® Transport Partnership since 2012. This program helps business move products as efficiently as possible while utilizing transportation SmartWay members. While not a requirement, we have a preference to work with SmartWay carriers. In 2016, we met our goal of shipping over 90 percent of our domestic U.S. freight using SmartWay carriers. In Southern California, we utilize the PierPass program, which relieves congestion, shortens wait times at security checkpoints and improves air quality at the ports of Los Angeles and Long Beach by encouraging off-peak activity. Reducing container movement during peak hours means fewer trucks on the road during heavy traffic periods, reducing fuel consumption and emissions. In 2016, 50 percent of our containers at these ports were moved during off-peak hours. We aim to unload as many containers as possible off-peak. We remain committed to finding ways to optimize our logistics network to reduce our environmental impacts while meeting our business needs. In 2017, we will pilot a project to better understand the carbon footprint of our U.S. export logistics with the goal of understanding the carbon emissions of various modes of transportation to help inform future logistics strategies.

C12.2

(C12.2) Do your suppliers have to meet climate-related requirements as part of your organization’s purchasing process?

No, but we plan to introduce climate-related requirements within the next two years

C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

Direct or indirect engagement that could influence policy, law, or regulation that may impact the climate

Yes, we engage indirectly through trade associations

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?

Yes

Attach commitment or position statement(s)

This year, we are excited to announce the launch of our Climate Action Plan, a comprehensive, two-part climate strategy to protect our planet. The Climate Action Plan will strengthen and accelerate existing design, supply chain and facilities sustainability initiatives and incorporate new ones. Coupling both our current work to date with a strong strategic plan will enable us to achieve our environmental goals for GHG reduction and climate resilience. To drive this strategy, we formally committed to setting science-based targets through the Science-Based Target Initiative. We are in the process of finalizing our near- term and net-zero GHG reduction goals and are on track to submit them for verification to SBTi in Q3 2022. As part of our Climate Action Plan, we will outline how current and new environmental initiatives are directly helping us achieve our SBTs.

Hasbro Announces Commitment to Set Ambitious, Science-Based Targets to Cut Emissions.pdf

Describe the process(es) your organization has in place to ensure that your engagement activities are consistent with your overall climate change strategy

Primary reason for not engaging in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

Explain why your organization does not engage in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

C12.3b

(C12.3b) Provide details of the trade associations your organization engages with which are likely to take a position on any policy, law or regulation that may impact the climate.

Trade association

Federation of Indian Chambers of Commerce & Industry (FICCI)

Is your organization’s position on climate change consistent with theirs?

Consistent

Has your organization influenced, or is your organization attempting to influence their position?

We publicly promote their current position

State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)

Hasbro is a leader in the Toy Association (US – Board member) and Toy Industries of Europe (TIE - board member). We are also the first toy company to join the Responsible Business Alliance (formerly EICC), and we were a founding member of Business for Social Responsibility (BSR) and a founding member of the Southeast Asia Toy Association.

Hasbro also serves in a variety of capacities on regional associations including the following:

In Asia, Hasbro is serves on the Australia Toys Association (ATA) (board member to be), Japan – Japan Toys Association (JTA) member, and India FICCI (Federation of Indian Chamber of Commerce and Industry) Toy Sector Committee – Co-chair

In Europe, Hasbro is a member of Chamber of Commerce to the EU and a number of country-based toy associations across Europe including in France and Britain, where Hasbro serves on the board.

Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)

Describe the aim of your organization's funding

<Not Applicable>

Have you evaluated whether your organization's engagement with this trade association is aligned with the goals of the Paris Agreement?

No, we have not evaluated

Trade association

Other, please specify (Toy Associations (US, Japan, Southeast Asia, Australia, Chamber of Commerce to EU))

Is your organization's position on climate change consistent with theirs?

Consistent

Has your organization influenced, or is your organization attempting to influence their position?

We publicly promote their current position

State the trade association's position on climate change, explain where your organization's position differs, and how you are attempting to influence their position (if applicable)

C15. Biodiversity

C15.1

(C15.1) Is there board-level oversight and/or executive management-level responsibility for biodiversity-related issues within your organization?

	Board-level oversight and/or executive management-level responsibility for biodiversity-related issues	Description of oversight and objectives relating to biodiversity	Scope of board-level oversight
Row 1	Yes, executive management-level responsibility	In concert with the Board, the Committee shall review and assess Company policies and practices with respect to significant issues of corporate social responsibility, including, without limitation, compliance with the Company's Code of Conduct, product safety, environmental sustainability and climate change, human rights and ethical sourcing (prohibiting all forms of forced labor, including but not limited to human trafficking and modern slavery), diversity, gender and inclusion, human capital management, responsible marketing, transparency, public policy matters, community relations and charitable contributions.	<Not Applicable>

C15.2

(C15.2) Has your organization made a public commitment and/or endorsed any initiatives related to biodiversity?

	Indicate whether your organization made a public commitment or endorsed any initiatives related to biodiversity	Biodiversity-related public commitments	Initiatives endorsed
Row 1	Yes, we have made public commitments and publicly endorsed initiatives related to biodiversity	Commitment to no conversion of High Conservation Value areas	SDG

C15.3

(C15.3) Does your organization assess the impact of its value chain on biodiversity?

	Does your organization assess the impact of its value chain on biodiversity?	Portfolio
Row 1	No, but we plan to assess biodiversity-related impacts within the next two years	<Not Applicable>

C15.4

(C15.4) What actions has your organization taken in the reporting year to progress your biodiversity-related commitments?

	Have you taken any actions in the reporting period to progress your biodiversity-related commitments?	Type of action taken to progress biodiversity-related commitments
Row 1	Yes, we are taking actions to progress our biodiversity-related commitments	Land/water management

C15.5

(C15.5) Does your organization use biodiversity indicators to monitor performance across its activities?

	Does your organization use indicators to monitor biodiversity performance?	Indicators used to monitor biodiversity performance
Row 1	Yes, we use indicators	Response indicators

C15.6

(C15.6) Have you published information about your organization's response to biodiversity-related issues for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Report type	Content elements	Attach the document and indicate where in the document the relevant biodiversity information is located
No publications	<Not Applicable>	<Not Applicable>

C16. Signoff

C-FI

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

No additional information

C16.1

(C16.1) Provide details for the person that has signed off (approved) your CDP climate change response.

	Job title	Corresponding job category
Row 1	Chief Purpose Officer	Other C-Suite Officer

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

Hasbro regularly engages with its customers including Walmart, Target, Tesco, and Amazon on climate issues including most recently on our plastic-free packaging initiative.

SC0.1

(SC0.1) What is your company's annual revenue for the stated reporting period?

	Annual Revenue
Row 1	6420

SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.

Requesting member

Please select

Scope of emissions

Please select

Allocation level

Please select

Allocation level detail

<Not Applicable>

Emissions in metric tonnes of CO2e

Uncertainty (±%)

Major sources of emissions

Verified

Please select

Allocation method

Please select

Market value or quantity of goods/services supplied to the requesting member

Unit for market value or quantity of goods/services supplied

Please select

Please explain how you have identified the GHG source, including major limitations to this process and assumptions made

Customer base is too large and global supply chain too complex to accurately estimate emissions allocation by customer.

SC1.2

(SC1.2) Where published information has been used in completing SC1.1, please provide a reference(s).

Not Available

SC1.3

(SC1.3) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?

Allocation challenges	Please explain what would help you overcome these challenges
Customer base is too large and diverse to accurately track emissions to the customer level	Unknown

SC1.4

(SC1.4) Do you plan to develop your capabilities to allocate emissions to your customers in the future?

No

SC1.4b

(SC1.4b) Explain why you do not plan to develop capabilities to allocate emissions to your customers.

Most customers do not request emissions data.

SC2.1

(SC2.1) Please propose any mutually beneficial climate-related projects you could collaborate on with specific CDP Supply Chain members.

Requesting member

Please select

Group type of project

New product or service

Type of project

New product or service that has a lower upstream emissions footprint

Emissions targeted

Actions that would reduce our own supply chain emissions (our own scope 3)

Estimated timeframe for carbon reductions to be realized

Other, please specify (Ongoing)

Estimated lifetime CO2e savings

Estimated payback

Cost/saving neutral

Details of proposal

Hasbro regularly engages with its customers including Walmart, Target, Tesco, and Amazon on climate issues including most recently on our plastic-free packaging initiative.

SC2.2

(SC2.2) Have requests or initiatives by CDP Supply Chain members prompted your organization to take organizational-level emissions reduction initiatives?

No

SC4.1

(SC4.1) Are you providing product level data for your organization's goods or services?

No, I am not providing data

Submit your response

In which language are you submitting your response?

English

Please confirm how your response should be handled by CDP

	I understand that my response will be shared with all requesting stakeholders	Response permission
Please select your submission options	Yes	Public

Please confirm below

I have read and accept the applicable Terms
