# Styler Tips & Techniques

Follow the lines, or don't! It's up to you!

**Lines:** Squeeze & slide slowly against the surface.

**Dots:** One quick squeeze against the surface!

Combine dots & lines to spell out your name!

INSTRUCTIONS AND IDEAS FOR THE  
**STYLE & STORE VANITY™**

# Design, then assemble!

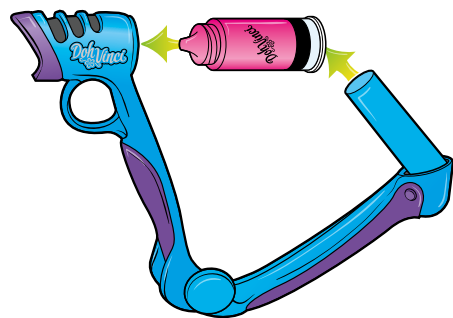

1

Choose a DECO POP tube.

2

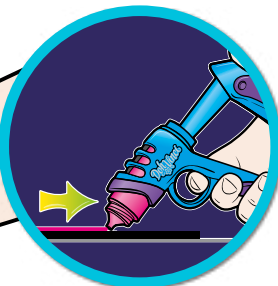

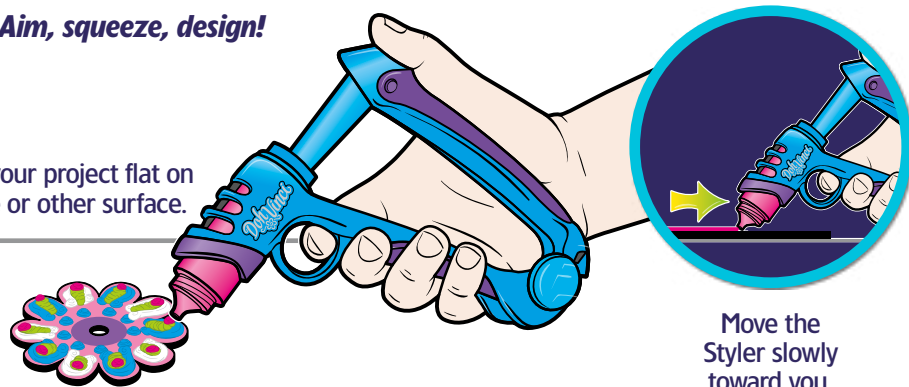

Pop it into the Styler.

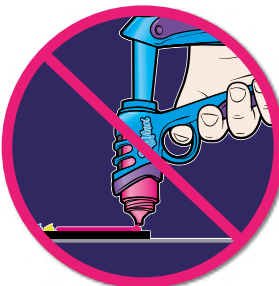

3

Aim, squeeze, design!

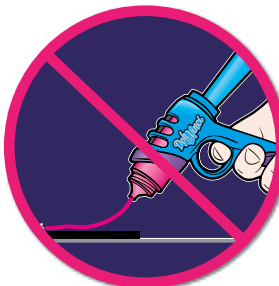

Keep your project flat on a table or other surface.

Move the Styler slowly toward you.

Hold the Styler at an angle.

Make sure the Styler tip touches the surface.

**Do you want your design to look like the one on the box?**  
Match your DECO POP color with the lines on the template, then trace them with your Styler!  
Results vary depending on child's age and level of skill.

## Troubleshooting

**Is it hard to get compound out of a new DECO POP tube?**  
Squeeze a little harder and it'll get easier.

**Need to start over?**  
Wipe it off before it dries and try again!

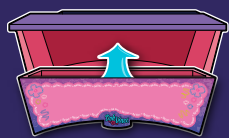

**Are your lines looking a little uneven?**  
Move the Styler slowly for best results.

**Compound won't stick?**  
Press the tip against the surface, make a dot, and release the Styler.

**Dried compound jamming the specialty tip?**  
Unscrew it from the DECO POP tube and soak the tip in water for 2 hours.

## Assemble Your Project After Designing

1

2

3

4

Avoid putting compound on the green area so you can attach the flower!

5

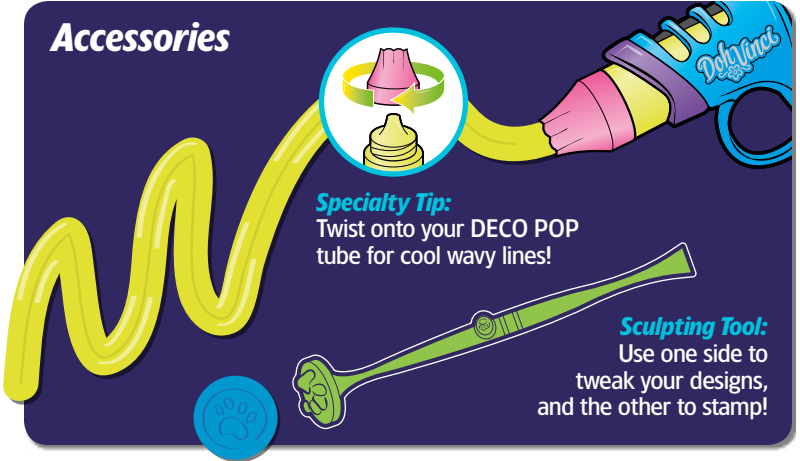

Stick pieces together by using the design compound like glue!  
The rest is up to you!

## Accessories

**Specialty Tip:**  
Twist onto your DECO POP tube for cool wavy lines!

**Sculpting Tool:**  
Use one side to tweak your designs, and the other to stamp!

Put the cap back on the tube when you're done designing to keep your color fresh for next time!

**To Change Deco Pop Tube:**  
Push tube backward out of the Styler and insert a new one.

**To Clean:**  
Remove excess compound, allow to dry, then scrape or vacuum deposits away.

Let your design dry and harden overnight!
