

Flexcon counter mat advertising system (“gripper” – non-adhesive)

How It Works:

Flexcon® FlexMark® 6120 is reverse printed. The white side of FlexMark® 6121 contains the adhesive and is laminated to the printed side of FlexMark® 6120, providing the white background. The result is a non-adhesive counter mat advertisement with the black “gripper” on the back. The graphic is protected by the embossed, scratch resistant clear vinyl.
