

# Durables

Performance in the real world

# Why Flexcon

## Creating bonds every day

For nearly seven decades, Flexcon has been at the forefront of pressure-sensitive material innovation—helping customers across diverse industries achieve their goals. Through a purpose-led, collaborative approach, Flexcon engineers and manufactures high-quality pressure-sensitive labels, tapes, and functional materials that drive product performance and sustainability. Our solutions, backed by expert guidance and consistent quality, are designed to bond, protect, label, and enable the world’s most critical innovations.

Achieving UL Recognition for label materials requires passing rigorous durability tests. With an extensive portfolio of UL/cUL Recognized products, a DAP-certified lab, and strong partnerships with raw material suppliers, our UL/cUL adoption and certification programs provide unparalleled benefits to give you a competitive edge.

 10-30% post-consumer recycled materials, ideal for roll-form converting

## FlexChoice™: Fast, flexible, and ready when you are

At Flexcon, we know speed and reliability are more important than ever. That’s why our FlexChoice™ program offers select durable labeling products in custom widths, with lower minimums and a fast two-day lead time—so you can stay agile and ahead of demand. With enhanced service capabilities and a renewed focus on operational excellence, FlexChoice™ reflects our commitment to making business with Flexcon faster, easier, and more dependable. Explore available products, locations, and minimums at [www.flexcon.com/FlexChoice](http://www.flexcon.com/FlexChoice) or scan the QR code to get started.

# Topcoat Guide

## Broad-spectrum printability

Superior topcoats enhance ink adhesion, which enables consistent cross-platform printability and ultimately reduces the number of SKUs required.

## Resilient coating technology

Excellent resistance to abrasion, chemicals, UV exposure, and moisture, ensuring long-lasting and durable prints.

## Industrial strength

High-temperature-resistance designed for industrial use, offering superior scratch resistance.

## Superior surface smoothness

Designed to provide a consistently smooth surface, enhancing print quality and clarity. This smoothness also contributes to better diecutting and overall converting efficiency.

# Adhesive Guide

For nearly seven decades, Flexcon’s leadership in adhesive technologies has revolutionized thousands of products across dozens of industries. Flexcon’s adhesive technologies are engineered to meet the toughest bonding challenges across a wide variety of materials and environments.

### Versatile surface compatibility

Reliable performance on metal surfaces, including bare, powder-coated, and painted finishes, as well as a wide range of plastic substrates like polyesters, polyolefins, and low surface energy plastics.

### Consistent performance

Formulated to work effectively on textured, smooth, flexible, aluminum, and composite materials, addressing challenges such as outgassing.

### Balanced adhesive strength

Our adhesives balance tack, peel, and shear strength to ensure optimal bond performance, providing initial grab, resistance to label removal, and stability under stress.

### Precision performance

Designed for demanding environments, our adhesives offer a synergistic formula that ensures long-lasting adhesion and resistance to edge lifting or sliding.

This guide provides an overview of our high-performance adhesive solutions, categorized by type and application.

Liner Guide

Engineered for precision

Our liners offer superior layflat performance, ensuring consistent results in roll-to-sheet and sheet-fed applications.

Improved handling

Designed for high-speed dispensing and matrix stripping, these liners keep your production lines moving without compromise.

Thinner version of TracRite™ 150 is available for tight registration, high speed matrix stripping and dispensing.

Clean, reliable processing

Select liners feature an anti-static coated backside to reduce static buildup during converting—minimizing dust attraction and ensuring smooth, uninterrupted performance in high-speed and precision applications.

Even surface for strong bonding

Polyester and paper release liners provide an excellent die-cutting base and provide superior on-press performance for tight-registration graphics.

Liner	Substrate	Coating Side	Printable	Target Caliper Thickness	Converting	Additional Information
Liners				mils (microns)		
42 White PP-8	One-side extruded paper	Poly-coated one-side. Release coated on the poly-coated side.	No	3.00 ± 10% (76)	Overlaminating	Use for all grades of overlaminating films. Economy grade white overlaminating liner. Not recommended for applications when overlaminating solid dark colors or metalized films.
44PP-8	One-side extruded paper	Poly-coated one-side. Release coated on the poly-coated side.	No	3.20 ± 10% (81)	Roll	Use for applications requiring high-speed dispensing and fast-speed matrix stripping. Liner has improved smoothness and diecutability versus Kraft liners. Backside printable.
Spec 50K-8	Kraft paper (PCR available)	Release coated one-side.	Yes	3.10 ± 10% (79)	Roll	Use for applications requiring hand dispensing and thermal printer label sensing.
66 PFW	Two-side extruded paper	Poly-coated two-sides. Release coated one-side.	No	4.60 ± 10% (117)	Roll, Sheet	Reduced caliper layflat liner intended for converting roll-to-sheet.
71B PMO-8	One-side extruded paper	Poly-coated one-side. Release coated on the poly-coated side.	Yes	4.60 ± 10% (117)	Overlaminating	Use for applications requiring improved smoothness and flow-out of adhesive on the overlaminating film.
74 RB	Kraft paper	Release coated one-side.	No	5.70 ± 10% (142)	Roll, Sheet	Reduced caliper layflat liner intended for converting roll-to-sheet.
77 PRT PFW TR	Two-side extruded paper	Poly-coated two-sides. Release coated one-side. Anti-static coated backside.	No	5.45 ± 10% (138)	Roll, Sheet	Reduced caliper layflat liner intended for converting roll-to-sheet. Anti-static coated on the backside.
90 PFW	Two-side extruded paper	Poly-coated two-sides. Release coated one-side.	No	6.80 ± 10% (173)	Roll, Sheet	Standard sheet form liner. Has superior layflat qualities.
60 D/F PFW, 60 LA PFW	Two-side extruded paper	Poly-coated and differential release coated two-sides.	No	4.60 ± 10% (117)	Roll, Sheet, Specialty	Use for roll-to-roll or roll-to-sheet converting with laminating adhesive and double-faced constructions.
84 D/F PFT, 84 LA PFT	Two-side extruded paper	Poly-coated and differential release coated two-sides.	No	6.40 ± 10% (163)	Roll, Sheet, Specialty	Use for roll-to-sheet converting with laminating adhesives and double-faced constructions requiring good layflat qualities.
200 Poly FSR	Polyester film	Release coated one-side.	No	1.95 ± 5% (50)	Roll	Use for applications requiring high speed dispensing, ultra smooth adhesive clarity, and a heavier carrier than 150 Poly H-9. Used for silicone adhesives.
100 Poly H-9, TracRite™ 100	Polyester film	Release coated one-side.	No	1.05 ± 5% (27)	Roll	Thinner version of TracRite™ 150 for tight registration, high speed matrix stripping and dispensing. 1.0 mil ultra-smooth, release liner designed to provide superior on-press performance for tight-registration graphics.
92LZR	Two-side extruded paper	Poly-coated two-sides. Release coated one-side.	No	6.75 +/- 10% (171)	Roll, Sheet	Designed for use through flexographic presses and subsequent imaging in tabletop and big-box laser printers.
78K	Kraft paper	Release coated one and two-sides.	No	4.35 ± 10% (110)	Specialty	Coated 2 sides for use with silicone adhesives.
90# Air Egress	Two-sided extruded paper	Poly-coated two-sides. Release coated one-side.	No	7.25 +/- 10% (184)	Roll, Sheet	Standard sheet form liner. Has superior layflat qualities. Air egress pattern to facilitate entrapped air bubble removal in application.

# Transfer and Double-face Tape Products

## High-performance adhesives

Versatile transfer tape adhesives deliver high shear strength and excellent adhesion to metals, high-surface energy plastics, and various surfaces. Whether you're working with smooth surfaces or tackling rough and textured ones, our adhesives deliver exceptional performance, ensuring a strong and reliable bond every time.

## Engineered for demanding surfaces

Our flexible transfer tapes are precision-designed to bond confidently across rigid, flat, and flexible surfaces—smooth or textured—making them ideal for high-performance industrial, automotive, and electronics applications.

## UL certifications

Unlock fast market access and significant savings with our UL certified 969 durable transfer tapes. Experience reduced costs and quicker turnaround times, ensuring your products hit the market faster and more efficiently.

## Overlamine Products

# Durability that delivers

Providing protection against environmental factors such as UV rays, moisture, and abrasion, our overlaminates ensure your graphics maintain their integrity over time resulting in extended lifespan and reducing maintenance costs.

### Outdoor durability

Engineered to safeguard inks and the base substrate, ensuring long-lasting durability, while offering reliable protection for diverse indoor applications across various usage periods and providing outstanding 7-year outdoor anti-graffiti protection to maintain surface integrity and appearance in challenging environments.

### Gloss and matte finish

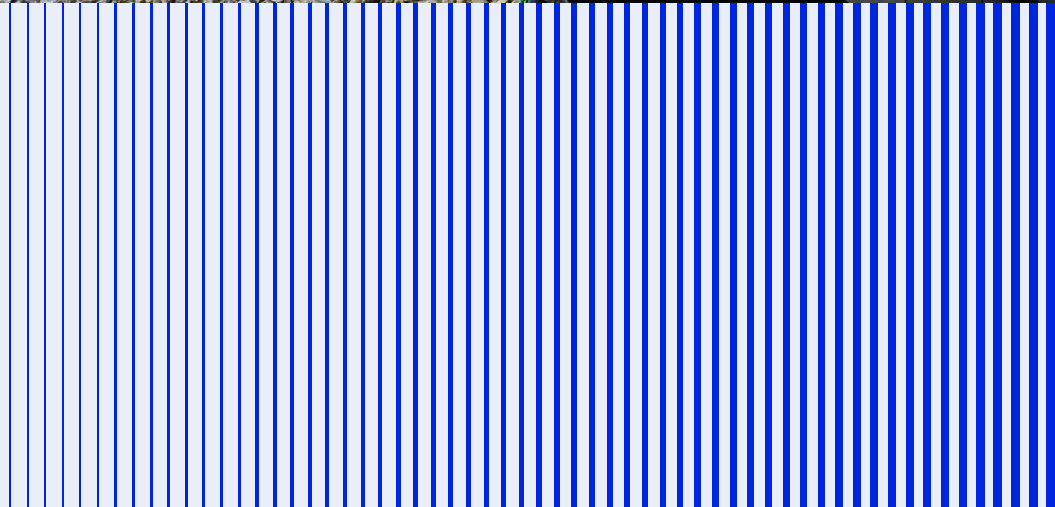

We offer a variety of finishes, including clear, gloss, velvet embossed, and matte, to enhance and protect your surfaces with both aesthetic appeal and durability.

### Printability

Our durable overlaminates protect printed graphics from UV rays, moisture, scratches, temperature extremes, abrasion, and chemicals. Select products are compatible with various printing techniques, including flexo, screen, letterpress, offset, and thermal transfer, making them ideal for durable signage, labels, and decals.

### Abrasion resistant

Provides exceptional protection against wear and tear, ensuring surfaces remain pristine and durable even under heavy use.

## Vinyl Products

### Conformable solution

Our vinyl products offer excellent dimensional stability and consistent surface smoothness, ensuring good conformability.

### Drum label solution

Excellent resistance to chemicals, moisture, smudging, and scratching, with a 2-year outdoor durability and compliance with BS 5609 Section 2 (saltwater immersion).

Strong permanent adhesive suitable for various surfaces (painted steel, fiber, and plastic drums), applicable at low temperatures, and easy removal during reconditioning.

Compatible with multiple printing methods, efficient converting and application handling, and a unique matte topcoat for extended die life and versatile printing options.

### UL certifications

Our products are UL Recognized under UL 969 (File No. PGGU2. MH10170), CSA accepted under CSA File No. 99214 for Marking and Labeling System Materials and cUL Certification for Marking and Labeling System Materials certified for Canada.

### Outdoor durability

Flexcon's vinyl products offer robust outdoor durability, maintaining their integrity for anywhere from 2 to 5 years.

### Printability

The print-receptive and topcoated surfaces are compatible with most conventional and UV ink systems, ensuring broad usability. Suitable for various printing techniques, including thermal transfer (resin and wax/resin), UV & solvent screen, UV, solvent & water flexo, laser (toner), and narrow-format UV inkjet, with a liner that supports optical sensing on most thermal transfer printers.

### Bonding

The permanent acrylic adhesive bonds well to both low- and high-surface energy plastics, painted metal, powder-coated paint, polycarbonate, and fiberglass offering high initial tack and ultimate bond strength, even on rough textured surfaces, with a high-performance modified acrylic adhesive (L-778) that is particularly aggressive on low surface energy plastics.

# Durability meets purpose.

# Polyester Products

## Color selection

We offer a variety of colors, including clear, silver, silver matte, satin silver, and white.

## UL certifications

Highly recognized for their quality and compliance, our PET products meet stringent safety and performance standards, including UL Recognized under UL 969, cUL Certified for Canada and CSA Accepted under CSA File No. 99214.

## Security labels

Designed for tamper-evident applications, featuring a strong acrylic adhesive that bonds to various surfaces, including powder-coated paint and metal. The solutions are engineered to expose a Void or Checkerboard pattern upon attempted label removal.

## Surface types and texture handling

Ensures consistent surface smoothness and excellent dimensional stability, even under varying temperatures. Our PET products offer robust resistance to chemicals, moisture, smudging, and scratching, making it ideal for handling diverse surface types and textures.

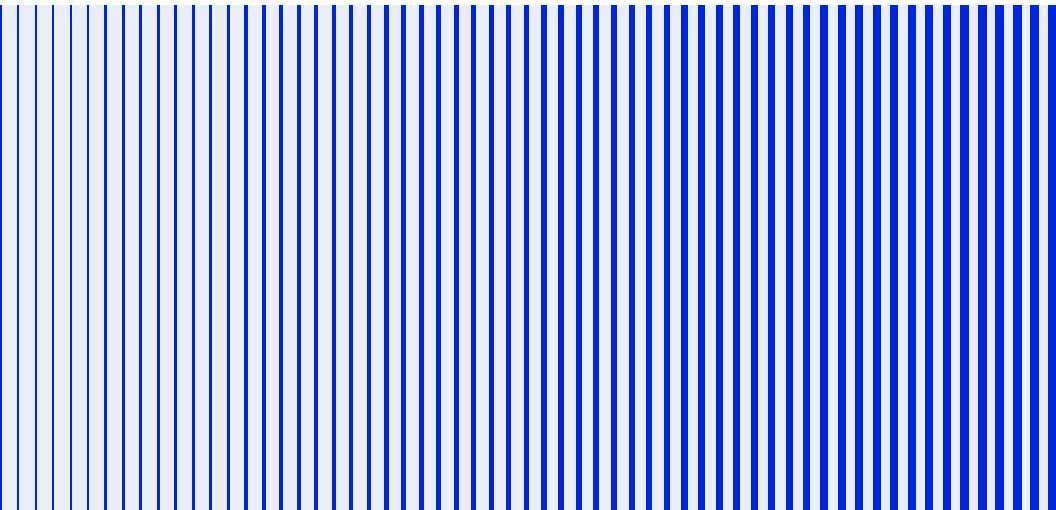

# Reflective. Reliable. Ready.

## High reflectivity

Flexcon® ReflectaMark® offers excellent scannability from greater distances, making it ideal for long-range barcode scanning in warehouse applications. Its glass bead reflective coating provides higher reflectivity and reflects from a longer distance than standard promotional grade film. Additionally, it supports versatile printability across various technologies and offers robust outdoor durability for safety and visibility applications.

## Printability

Flexcon's polyester products support a wide range of printing technologies—including thermal transfer, flexographic, screen, and UV inkjet—delivering excellent print quality with resistance to smudging and abrasion. They are compatible with both resin and wax/resin thermal transfer ribbons and are suitable for optical sensing in most thermal transfer printers.

Polyolefin Products

**UL certifications**  
UL/cUL Recognized for indoor and limited outdoor use, meeting UL 969 standards (UL File No. PGJ12.MH16635) and cUL standards for Canada (UL File No. PGJ18.MH16635) under CAN/CSA standard C22.2, No. 0.15.

**Secure and destructible**  
Our destructible white polyethylene security label is designed to destruct or distort easily, providing tamper-evident protection.

**Outdoor durability**  
Designed to withstand outdoor conditions, our polyolefin products are known for their robust durability, ensuring they meet the needs of different outdoor durability requirements.

**Printability**  
Optimized printability across a wide range of printing technologies assuring good quality and offers exceptional ink receptivity ensuring high-quality results for various applications.

**Sustainability and converting efficiency**  
These materials are engineered with recyclability in mind and also optimized for clean, efficient laser die-cutting, helping converters reduce waste and improve throughput during production.

Sustainability meets performance.

# Supporting Businesses Globally

In 1956, Myles McDonough pioneered the first pressure-sensitive film product in a Spencer garage, breaking away from the industry's focus on high-volume commodity products. His vision was to meet the unique needs of innovators seeking new applications for pressure-sensitive films.

Today, nearly 70 years later, Flexcon continues this legacy, serving diverse industries such as packaging, electronics, durables, and healthcare.

Flexcon is a trusted manufacturing partner, known for turning innovative ideas into reality. With decades of expertise, Flexcon supplies adhesives, films, and coating technologies for the durables industry, supporting applications including industrial equipment, consumer durables, automotive components, electronics, security labeling, outdoor signage and product identification across a wide range of surfaces and environmental conditions.
