

## Baptist Occupational Health provides the following alcohol tests:

### **Breath Alcohol Testing**

The breath alcohol testing that is performed will provide:

- The estimated level of alcohol in the individual's system.
- A confirmation of non-negative testing after a 15 to 30-minute waiting period.
- A notification provided to the employer of all non-negative results.

Upon employers' request, a blood alcohol test can be performed to confirm the level of alcohol present in the individual's system.

### **Blood Alcohol Testing**

The blood alcohol testing that is performed will provide:

- The amount of ethyl alcohol (drinking alcohol) present in the donor's blood.
- Results will be released within 48 to 72 hours.
