

Edwards PASCAL Precision Transcatheter Valve Repair System

Stabilizer Rail System
and Reusable Accessories

Stabilizer Rail System (SRS)

Provides stability for your PASCAL Precision system procedures

Increased stability

a rail-based system with multiple stabilizers to advance, retract, and torque catheters

Intuitive design

secure stabilizers to allow for stable, incremental movements and fine adjustments

Simplified operation

ease-of-use enhancements help reduce unintended catheter movements throughout the procedure

Reusable Accessories

Compatible with the PASCAL Precision system
and a pipeline of future innovation

Stable

foundation for your
PASCAL Precision system
TEER procedures

Adjustable

ergonomic and intuitive controls
to adjust height and tilt as needed

Sustainable

reduce the amount of plastic
waste post procedure

Compact storage

enabled by the foldability and
low profile of the reusable platform

Leading the way in MR and TR innovation

Edwards is committed to advancing the treatment of mitral regurgitation (MR) and tricuspid regurgitation (TR) for the patients who can be treated and to significantly improve their quality of life^{1,3}

2019

PASCAL Implant System for MR

Introduction of PASCAL repair system uniquely designed to enhance leaflet capture and close the coaptation gap¹

2020

PASCAL Implant System for TR

PASCAL Implant System for TR expanded indication for even challenging tricuspid anatomies^{2*}

PASCAL Ace Implant System for MR and TR

A narrower profile designed for ease-of-navigation in complex anatomies

2021

PASCAL Stabilizer Rail System

Enhanced stability to advance, retract, and torque catheters

2022

PASCAL Precision System

Delivery system catheters, handles, and stabilizers optimally designed for versatility, accuracy, and control

2023

Edwards Reusable Accessories

Provide stability for procedures using the PASCAL Precision system
