

Technical Bulletin

Smart. Innovation.

The HemoSphere monitor helps you stay ahead of critical moments. For individualized patient management across a diversity of patient profiles and care settings, HemoSphere monitor offers compatibility with a range of sensors and catheters.

With the ForeSight tissue oximetry sensor, you have access to a comprehensive view of tissue oximetry and advanced hemodynamics on one monitor to help ensure your patient is adequately perfused.

HemoSphere Advanced Monitoring Platform Technical Bulletin - CC001

We are committed to evolving our solutions to enhance your experience. Our technical bulletins summarize the latest developments and enhancements on your monitoring platform. These bulletins will be periodically updated throughout the year to keep you informed.

Feature updates

ForeSight tissue oximetry integration:

- Delivers accurate performance in tissue oximetry with a confident decision and a variation range of approximately $\pm 3.05\%$.* ForeSight sensor accounts for a range of tissue and skin tones and gives you oxygenation insights you can act on

Acumen IQ sensor interface enhancements:

- Streamlined screen layout enhances focus on arterial pressure and select key dynamic parameters

Cybersecurity and system improvements:

- Added improvements to security controls as part of a continual process to manage cybersecurity risk across our various product lines and execute our cybersecurity post-market product surveillance and support program

Notable resolved issues

User navigation workflows:

- Resolved issue with key parameters changing on Focus screens

* At one Standard Deviation for cerebral StO_2 measurements using the large sensor

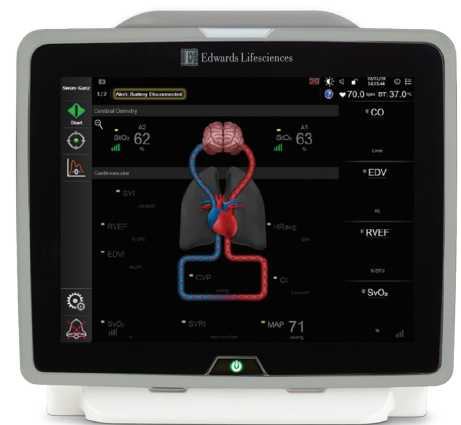

An Edwards Representative will schedule a time to update your hospital monitors with the latest updates. If you would like to learn more, please contact your Edwards Representative or call Edwards Technical Support: 1-800-822-9837.
