

Club Car

TEMPO™ AND TEMPO™ 2+2

## ***SHOW UP AND STAND OUT***

Tempo and Tempo 2+2 transports guests around your resort, college, or corporate campus in style without compromising on price, quality, or comfort.

## EASE OF USE AND REDUCED MAINTENANCE COSTS

Maximize vehicle uptime and quality with Li-Ion batteries.

The Tempo Lithium Ion battery was developed for the automotive industry. We built on that foundation to deliver an innovative battery with automotive-grade safety and performance features designed to save you time and money.

Club Car's new Lithium Ion vehicle offers top performance, range, and safety, while reducing total cost of ownership. Its AC Lithium Ion battery ensures reliable, high-performance cars for any task.

An independent front suspension system and comfortable, ergonomic seats provide a smooth ride for up to 4 passengers, keeping the focus on your guest experience.

### New Auto Park Brake

*OPTIONAL on Tempo Lithium 2 Passenger and Tempo Lithium 2+2 Vehicles*

The Electronic Park Brake System automatically stops the car based on speed, eliminating the need to stomp the brake. Responsive mechanical braking provides consistent, reliable feel, unlike competitors' drive-by-wire systems.

### Redesigned Dash

The redesigned Tempo dashboard offers sleek two-tone styling, an integrated FNR control, phone holders, four cupholders, and built-in golf ball/tee holders for added style and functionality.
