## Coating systems for fasteners

### Single-source coatings for fasteners

Fasteners are more than just nuts and bolts. Whether connecting the framework in a construction application or meeting the heavy-duty requirements for mining oil and gas resources, they're often bearing the weight of the world. Selecting the right coatings is critical to ensuring the performance of your fasteners over the life of their use.

PPG offers a vast array of coating technologies engineered to optimize reliability, efficiency and longevity of fasteners. For installations on land or at sea, PPG coatings are formulated with cutting-edge technology designed to prevent corrosion and chemical attack – even in the most extreme environments.

#### Unique benefits

- Abrasion and impact resistance
- Chip resistance
- Extensive color palette
- ROHS and REACH-compliant
- Part-to-part sticking (technology-specific option)
