Coating systems for water valves

Single-source coatings for water valves

Transporting, controlling and regulating one of the Earth's greatest natural resources is a full-time job. Whether you manufacture water valves, fire hydrants, fittings or accessories, PPG has a broad portfolio of coatings engineered to withstand extreme environments.

PPG's extensive line of powder, liquid, electrocoat and pretreatment products are engineered to optimize reliability, efficiency and longevity of your products. These sophisticated products can be applied to obtain a smooth and durable coating that provides exceptional physical and chemical resistance.

Product Benefits

- Excellent corrosion and impact resistance
- NSF/ANSI 61-approved options available
- UL 262-listed options available
- Coatings to meet AWWA standards available
- Broad color palette
- Consistent product quality
- Multiple technologies compatible with a variety of substrates
