PULL AHEAD

with Prefab Twisted Cable

ServicePlex® is an assembly of single conductors twisted to create a uniform construction. This solution pulls like a single cable without the jamming that occurs with traditional parallel pulls. Featuring ServicePRO-X® Insulation—No Lubrication Required (#6 AWG and larger) and available with numbered, striped, or colored conductors for quick and easy phase identification.

FASTER WIRE PULLS *vs. Traditional Methods*

THE BENEFITS

Cost Savings

Reduces scrap (no long/short legs) and pulls from a single reel, reducing storage, setup, and waste on the jobsite.

Ease of Installation

Unified diameter eliminates jamming and provides uniform pulling tension. Available with factory-installed pulling heads for even faster pulls.

Engineered Advantages

XLPE (thermoset) insulation performs substantially better than T90. It's Hospital Grade, rated for 600V or 1kV, and can withstand colder temperatures.

Distributed by

DEPENDABLE LEAD TIMES

Eliminate inventory and ship direct to the jobsite with quick leads and dependable, damage-free delivery from any of our nationwide manufacturing facilities.

INSTALLATION:

Available with **PRE-INSTALLED PULLING HEADS**

CONDUIT

Eliminates jamming in conduit for easier pulls into the raceway.

CABLE TRAY

Simple, orderly installation into cable tray, with fewer tie-downs required.

DIRECT BURIAL

ServicePlex® is available in direct burial rated RW90.

“The pull is unbelievable... ten times more efficient than paralleled wire, from setup through installation.”

CONSTRUCTION MANAGER
Fisk Electric

TESTIMONIALS

“We would have spent a better part of the day working our way through mud to set up four individual reels. ServicePlex® eliminated this problem and our pulls went great.”

PROJECT FOREMAN, *Guarantee Electric*

“We made our pull from one reel and needed only one man to feed it into the conduit. In tight spaces, you can only fit so many people.”

PROJECT FOREMAN, *Summit Electric*
