

VT Downing European Unconstrained Income Fund

May 2021 Commentary

As markets continued to rally through May, the fund rose with the A accumulation NAV increasing from 109.2974p to 110.6315p. The two strongest performers were Aumann and ams, both stocks that had lagged in recent weeks.

Aumann reported encouraging Q1 numbers with the e-mobility business showing a material increase in order intake after the company won a major contract with a premium original equipment manufacturer (OEM) to supply automated battery assembly equipment. We expect Aumann to benefit from further orders in both coil winding equipment and related EV technology as OEM's increase their electric vehicle production capacity to meet the ambitious target they have set.

ams reported solid Q1 results, but the release was notable for confirming the loss of market share associated with the Apple iPhone contract. This had been widely feared by the market and its confirmation was met with a sharp rally suggesting the shares had been oversold in the lead up to the announcement. ams Osram (as it is now called) has a broad portfolio in optical technologies and is seeing strong demand in many of its end markets, notably in its autos business.

GTT was the largest detractor, mainly due to the placing of 10% of its shares by its largest shareholder, Engie. There were also large placings in Befesa and Fagron which weighed on their shares in the month.

We made some changes in the portfolio. We initiated a new position in FNAC-Darty, the French retailer, and Flow Traders. FNAC-Darty has proven its resilience to the threat of e-commerce over a number of years due to the strength of its omni-channel model. This also protected it through the strict pandemic restrictions. We expect a boost in sales as economies reopen in the second half of the year, but there should also be some longer-lasting benefits as the pandemic has accelerated the shift to online.

Flow Traders is Europe's leading market maker in exchange traded funds (ETFs). It is exposed to the structural growth of ETFs, but in the short term benefits from bouts of volatility. With markets grappling with concerns being brought on by inflationary pressures, Flow Traders could be in position to benefit from more market activity.

To fund these acquisitions, we sold Elekta and SIG Combibloc, both largely for valuation reasons.

Opinions expressed represent the views of the fund managers at the time of publication, are subject to change, and should not be interpreted as investment advice.

About the fund

The fund aims to have approximately 30-40 holdings*. The team seeks to generate returns by identifying high quality companies that have a long term sustainable competitive advantage, with potential to generate growth over time. At the point of entry, the valuation of the company is attractive to the fund managers, either because it has fallen out of favour in the short term, or because it is "off the radar" of many other investors.

Investment objective

The investment objective of the fund is to generate income and some capital growth over the long term (5 years or more), principally by investing in transferable securities of European issuers. We aim to ensure that at least 75% of the fund's assets are invested at all times in equities issued by companies based in a Member State of the EU, in Norway, Iceland, Turkey, Switzerland, Russia or the UK. The remainder will be invested in government securities, fixed income, closed ended collective investment schemes/vehicles (which may include those managed and/or operated by the Authorised Corporate Director (ACD) and which will provide exposure to various asset classes including equities and bonds), real estate investment trusts, money market instruments, deposits, cash and near cash.

The fund will not have any particular industry or economic sector focus and as such weightings in these may vary as required.

* Please note, this is not a requirement or restriction of the fund.

Fund Manager
Mike Clements

Mike has more than 20 years' experience in the industry and over 12 years' experience managing European equity portfolios. His investment career began in 1999 as a European equity analyst at UBS Asset Management. In 2008, he moved to Franklin Templeton Investments where he managed the €3 billion Franklin European Growth Fund and related mandates. Between 2014 to 2020, he was Head of European Equities at Syz Asset Management, managing a range of Pan European and Europe ex. UK funds, including the Oyster Continental European Income Fund.

Fund Manager
Pras Jeyanandhan

Pras has over 11 years' investment experience. He began his career in 2005 with KPMG, qualifying as a Chartered Accountant (ACA), before moving to HSBC as a strategy analyst. In 2011, Pras joined Berenberg Bank as an equity analyst, leading coverage on the Financials sector before joining Mike Clements at Syz Asset Management in 2015 as an investment analyst and then portfolio manager. From January 2019, Pras co-managed the Oyster European Opportunities Fund alongside Mike as well as providing support across the other portfolios.

Risk warning: Your capital is at risk. Investments into this fund should be held for the long term (5+ years). The value of your investment and income derived from it can fall as well as rise and investors may not get back the full amount invested. The fund does not have any particular industry or economic sector focus and as such weightings in these may vary as required and investments may be in the same sectors. Values may be affected by fluctuations in currency exchange rates and may cause the value of your investment to go up and down. The portfolio is constructed independently of a benchmark index. Reduced liquidity may have a negative impact on the price of assets. The use of derivatives may result in gains or losses that are greater than the original amount invested. The fund may invest in smaller companies which are higher risk compared to investments in blue chip companies. Past performance is not a guide to future returns. Please refer to the latest fund Prospectus and KIID before investing; your attention is drawn to the risk, fees and taxation factors contained therein.
