

JND AutoRedact™ Wins 2026 Relativity Innovation Award

AutoRedact recognized for delivering redaction accuracy at scale inside Relativity aiR.

SEATTLE, 10/7/2026 – [JND Legal Administration](#), the U.S. leader in legal management and administration services, announced that its AutoRedact™ AI-assisted redaction tool has received the Relativity Innovation Award in the Act category at Relativity Fest 2026, the premier event in the eDiscovery industry. The Act Award honors solutions that enhance Relativity's redaction, quality control, reporting, case strategy, or production features, delivering meaningful results.

AutoRedact uses both AI and deterministic rules to find and redact sensitive information like personal data or privileged content within images stored in Relativity aiR (formerly RelativityOne). Legal teams describe in plain language what needs to be redacted, iterate and test the results on sample documents in the Detector Lab, and then apply the calibrated instructions at scale across their document populations. AutoRedact also has a dedicated detector for data subject access requests (DSARs) that redacts personal and sensitive information while keeping the requesting individual's own data visible, a common and time-consuming challenge in privacy compliance. AutoRedact provides confidence levels for redactions to assist legal teams with focusing their human QC efforts and every redaction can be reviewed and adjusted before documents are produced.

"I'm incredibly grateful to our team, whose expertise and relentless testing made AutoRedact possible," said Ben Sexton, Senior Vice President of Innovation and Strategy at JND. "We're excited about what AutoRedact can do for our clients."

"Innovation at JND has always meant building tools that deliver real, measurable results," said Jennifer Keough, CEO and Co-Founder of JND. "AutoRedact reflects the ingenuity and dedication of our team, and this award is a testament to their work. We congratulate everyone who made it possible."

Headquartered in Seattle, JND continues to solidify its status as the industry leader in end-to-end eDiscovery solutions. Its eDiscovery service line supports corporations, law firms, and government agencies in deploying the best solutions and technology to meet their goals using Relativity aiR, the market's leading cloud-based technology solution. JND is one of only two Relativity Platinum Provider Partners.

This award marks JND's second Relativity Innovation Award in three years. In 2024, Ben Sexton received the Relativity Innovation Award in the Artificial Intelligence category for his leadership in the adoption and development of generative AI tools in eDiscovery. JND's team also includes three Relativity AI Visionary award recipients.
