

TEXCAN

A Sonepar Company

DATA & TELEPHONE COMMUNICATION CABLE CATALOGUE

WHY CHOOSE TEXCAN?

Our expertise lies in providing solutions tailored to each customer's individual needs. Texcan has been a leader in the wire and cable industry since 1978, consistently going above and beyond to serve our customers. As one of the largest wire and cable suppliers in Canada, Texcan specializes in serving the electrical market and offers an extensive range of products and specialized services.

LOCAL INVENTORY WHAT YOU WANT, WHEN YOU NEED IT!

Texcan takes pride in our extensive inventory, offering a diverse selection of wire and cable options to meet customers' specific requirements. We prioritize convenience, ensuring that our customers have easy access to the products they need, when they need them.

LOCAL EXPERTISE WITH A GLOBAL PRESENCE

Texcan is a proud member of the Sonepar Group. Founded in 1969, the Sonepar Group of companies is an independent family-owned company and global market leader in B to B distribution of electrical products, solutions, and related services.

PRODUCT SOURCING

Texcan's preferred partners are selected based on their reputation for excellence, reliability, and expertise in their respective fields. These partnerships are built on mutual trust, shared values, and a commitment to delivering exceptional customer experiences. By collaborating with industry-leading manufacturers and suppliers, Texcan ensures that it consistently offers outstanding products and solutions to its diverse customer base.

LIVE 24/7, 365 DAY EMERGENCY SUPPORT

Texcan recognizes the crucial importance of continuous, year-round operations. We understand that during emergencies, disruptions can pose significant risks and expenses. That's why we are fully committed to delivering prompt assistance whenever it is required. Our dedicated team is available 24/7 to provide live help, ensuring that your operations can swiftly resume without any unnecessary delays. To access our live assistance, simply call our toll-free number, 1.800.665.1025.

We are ready to provide the support you need, anytime, anywhere.

ENGINEERING SUPPORT

By choosing Texcan, you gain access to our dedicated in-house engineering and product management team, along with manufacturer support for your project. The sooner you engage us, the greater the value we can provide.

When you collaborate with us, we can assist in reviewing your bill of materials, ensuring accuracy and efficiency. Our team specializes in streamlining cabling specifications, optimizing designs, and technical compliance throughout the project lifecycle. Our expertise allows us to streamline processes and enhance overall project efficiency.

To Place an Order - For many of the products in the catalogue, you will find everything that you need to place an order. Should you need any assistance or require special orders, please contact your sales representative. A complete list of our sales offices can be found on the back cover of this catalogue.

Introduction

Communications would not be as advanced as it has become without the assistance of Data and Telephone Communication cables. Whether used in telephone networks (both indoor and outdoor) or underground, structured copper cables are used to provide power and information to numerous devices throughout a network system.

As networks evolve so do the cables, which require faster modes of speed, shielding requirements and fire safety approvals. Ethernet cables or category un-shielded twisted pairs (UTP) products are built and verified to TIA (Telecommunications Industry Association) specifications.

Applications

Data and Telephone Communication cables contain multiple constructions which allow them to be installed in indoor, outdoor, overhead and burial applications. They are available from Texcan's stock in armoured, shielded, filled, multi-paired or Figure 8 constructions.

Usage includes but is not limited to entrance facilities, horizontal plenums, backbone cabling, premise wiring and telecommunication rooms and enclosures.

CAUTION NOTICE

In case of fire, well maintained early warning smoke detectors will give an alarm long before non-metallic coverings become combustible. However, the Electrical and Electronic Manufacturers Association of Canada has suggested that all purchasers of PVC insulated / jacketed products be advised of the following:

- Non-metallic coverings of electrical cables can burn and may transmit fire when ignited.
- Burning non-metallic coverings may emit acid gases which are toxic and may generate dense smoke.
- Emission of acid gases may corrode metal in the vicinity e.g. sensitive instruments and reinforcing rods in cement.

The installer and/or user assumes all liability for the consequences of the installation and/or use of any of the products in violation of any applicable law, regulation, or code.

Data & Networking Cables

Texcan's Data and Networking cables are available in various constructions, for multiple uses, as outlined below:

Category 3 Cable – Solid bare annealed copper conductor with flame-retardant Polyvinyl Chloride (PVC) insulation and jacket.

Category 5E Cable – Solid bare annealed copper conductor with either a Polyolefin, Fluoropolymer or high density Polyethylene (HDPE) insulation option. Polyester-backed aluminum foil shield and flame-retardant Polyvinyl Chloride (PVC) jacket.

Category 6 Cable – Solid bare annealed copper conductor with either a Polyolefin, Fluoropolymer or high density Polyethylene (HDPE) insulation option. Polyester-backed aluminum foil shield, tinned copper drain wire and flame-retardant Polyvinyl Chloride (PVC) jacket.

25PR Category 5E Cable – Solid bare annealed copper conductor with a Polyolefin insulation and flame-retardant Polyvinyl Chloride (PVC) jacket.

Armoured Category 5E Cable – Solid bare annealed copper conductor with either a Polyolefin, Polyvinyl Chloride (PVC) or high density Polyethylene (HDPE) insulation. Aluminum/ Mylar foil shield, Polyvinyl Chloride (PVC) inner jacket, Aluminum Interlocked Armour (AIA) and Polyvinyl Chloride (PVC) jacket.

Patch Cable – Stranded tinned copper conductor and a lead free, dark blue, Polyvinyl Chloride (PVC) jacket.

Telephone Communication Cables

Telephone Communication cables are available in various constructions, for multiple uses, as outlined below:

Category Filled Cable – Solid bare annealed copper conductor with a Polyolefin insulation and a UV and abrasion resistant Polyethylene (PE) jacket.

Filled Cable – Solid annealed copper conductor with a dual layer insulation of foamed Polyolefin surrounded by solid Polyolefin skin. A Corrugated-copolymer coated tape shield, ETPR filling compound and and linear low density Polyethylene (LLDPE) jacket.

Gopher Resistant Cable – Solid bare annealed copper conductor with a solid high density Polyethylene insulation. Color coded telephone twisted pairs, corrugated-copper bearing tape shield and ETPR filling compound. Linear low density Polyethylene (LLDPE) jacket.

Aircore Cable – Solid annealed copper conductor with a solid high density Polyethylene insulation. Color coded telephone twisted pairs and corrugated-copolymer coated tape shield. Linear low density Polyethylene (LLDPE) jacket.

Figure 8 Cable – Solid annealed copper conductor with a solid high density Polyethylene insulation. Color coded telephone twisted pairs, corrugated-copolymer coated tape shield and 1/4" 7 strand galvanized steel fully flooded support messenger. Linear low density Polyethylene (LLDPE) jacket.

CABLE MANAGEMENT PROGRAM

CUSTOM TAGGING

We offer custom reel tags with project specific item identifiers and details, easing material management. Options include weather-proof, colour-coded stainless steel, printed RFID, or project specific templates.

SPECIALIZED PACKAGING

We can custom pack orders according to almost any specifications. Whether it's specified reel sizes, bug-free reels, or shrink wrapped pallets, we make sure it's packed right.

LOCAL AND INTERNATIONAL LOGISTICAL EXPERIENCE

Our team ensures your shipping standards, including custom packaging, are monitored, and met while keeping your project schedule in mind.

LAGGING

For long-distance transit, including export, bad weather, and rough terrain, we use wood covers or other suitable durable packaging to protect the reels.
