

Social Distancing on a Cable Pull

Keep your project on track while keeping your social distance

Our Southwire® SIMpull Solutions® paralleled and stacked reels allow you and your team to practice social distancing on the job. These paralleled reels reduce labour requirements, increase safety for workers, and deliver a faster cable installation.

Features & Benefits

- Maneuver and set up a reel weighing up to 6,000lbs with only one person
- Speed up cable installations with stacked reels with multiple pulls on one reel
- Reduce on-site handling requirements with customized feeder lengths and cable types/ colours
- Reduce labour requirements with pre-installed SIMpull Head® pulling grips

SIMpull Solutions® Options

- Standard and NoLube® SIMpull RW90, RWU90, and T90 product options are available
- Accessories include: MAXIS® 6K Cable Pullers (6,000 lb capacity), MAXIS® XD10 Extreme Cable Pullers (10,000 lb capacity), MAXIS® Grips™, QWIKrope®, Swivels for 90 degree bends, SIMpull™ Reel cradles, SIMpull™ Flange, A-Frames, and more.

We carry one of the largest inventories of industrial, commercial and residential wires and cables in Canada.

One Reel, One Pull: Safety First for Electrical Installers

Safety and productivity are key on the job site

At Texcan, we can help you combine multiple pulls onto a single reel, which reduces the number of electrical installers required in a specific area. Call us at 1-800-665-1025 today to learn how we can help you on the job.
