

TEXCAN

A Sonepar Company

BUILDING WIRE

CATALOGUE

WHY CHOOSE TEXCAN?

Our expertise lies in providing solutions tailored to each customer's individual needs. Texcan has been a leader in the wire and cable industry since 1978, consistently going above and beyond to serve our customers. As one of the largest wire and cable suppliers in Canada, Texcan specializes in serving the electrical market and offers an extensive range of products and specialized services.

LOCAL INVENTORY WHAT YOU WANT, WHEN YOU NEED IT!

Texcan takes pride in our extensive inventory, offering a diverse selection of wire and cable options to meet customers' specific requirements. We prioritize convenience, ensuring that our customers have easy access to the products they need, when they need them.

LOCAL EXPERTISE WITH A GLOBAL PRESENCE

Texcan is a proud member of the Sonepar Group. Founded in 1969, the Sonepar Group of companies is an independent family-owned company and global market leader in B to B distribution of electrical products, solutions, and related services.

PRODUCT SOURCING

Texcan's preferred partners are selected based on their reputation for excellence, reliability, and expertise in their respective fields. These partnerships are built on mutual trust, shared values, and a commitment to delivering exceptional customer experiences. By collaborating with industry-leading manufacturers and suppliers, Texcan ensures that it consistently offers outstanding products and solutions to its diverse customer base.

Southwire®

Belden

LIVE 24/7, 365 DAY EMERGENCY SUPPORT

Texcan recognizes the crucial importance of continuous, year-round operations. We understand that during emergencies, disruptions can pose significant risks and expenses. That's why we are fully committed to delivering prompt assistance whenever it is required. Our dedicated team is available 24/7 to provide live help, ensuring that your operations can swiftly resume without any unnecessary delays. To access our live assistance, simply call our toll-free number, 1.800.665.1025.

We are ready to provide the support you need, anytime, anywhere.

ENGINEERING SUPPORT

By choosing Texcan, you gain access to our dedicated in-house engineering and product management team, along with manufacturer support for your project. The sooner you engage us, the greater the value we can provide.

When you collaborate with us, we can assist in reviewing your bill of materials, ensuring accuracy and efficiency. Our team specializes in streamlining cabling specifications, optimizing designs, and technical compliance throughout the project lifecycle. Our expertise allows us to streamline processes and enhance overall project efficiency.

To Place an Order - For many of the products in the catalogue, you will find everything that you need to place an order. Should you need any assistance or require special orders, please contact your sales representative. A complete list of our sales offices can be found on the back cover of this catalogue.

Introduction

Texcan carries a wide variety of both copper and aluminum building wire. Our building wire is available in multiple colours and construction types. Designed for applications that may involve wet or dry locations, building wire comes in armoured and non-armoured versions. Texcan's wide array of building wire provides safety and efficiency when installing in commercial and retail establishments such as low and high-rise offices as well as residential housing or apartment buildings.

Applications

Building wire is used to carry electricity into or within buildings and structures. It is utilized in the construction of most commercial, industrial and residential properties, including applications such as electrical wiring systems, power generators, motors and electrical lights.

As there are multiple building wire applications, there are also multiple building wire constructions. For example, ACWU and NMWU are well-suited for direct earth burial; however, ACWU wiring is also suitable for hazardous locations. Building wire is mainly used in power distribution applications, service entrance and branch circuit applications.

CAUTION NOTICE

In case of fire, well maintained early warning smoke detectors will give an alarm long before non-metallic coverings become combustible. However, the Electrical and Electronic Manufacturers Association of Canada has suggested that all purchasers of PVC insulated / jacketed products be advised of the following:

- Non-metallic coverings of electrical cables can burn and may transmit fire when ignited.
- Burning non-metallic coverings may emit acid gases which are toxic and may generate dense smoke.
- Emission of acid gases may corrode metal in the vicinity e.g. sensitive instruments and reinforcing rods in cement.

The installer and/or user assumes all liability for the consequences of the installation and/or use of any of the products in violation of any applicable law, regulation, or code.

Building Wire

Texcan's building wire ranges from 300 to 1kV and consists of both copper and aluminum product lines, suitable for commercial or residential applications. Each building wire product is available in various constructions as outlined below:

Copper Building Wire

AC90 – CSA C22.2 No.51-95 certified. Solid or stranded bare copper conductor with Cross-Linked Polyethylene (XLPE) or PVC insulation and a bare solid or stranded copper bonding wire.

Bare Copper – ASTM certified. Soft, annealed solid or stranded bare copper conductor.

Green Ground – CSA FT4, CSA C22.2 No. 38 and TC approved for 1/0 AWG or larger. Compact or compressed stranded bare copper conductor with Cross-Linked Polyethylene (XLPE) insulation and green PVC jacket.

NMD90 – CSA FT1, CSA C22.2 No.48-M90 and RoHS compliant. Solid or stranded bare copper conductor with flame-retardant, PVC c/w Nylon sheath insulation or Cross-Linked Polyethylene (XLPE) insulation and PVC jacket.

NMWU – CSA FT1 and CSA C22.2 No.48. Annealed, soft copper with compressed or compact stranding conductor, PVC insulation and black PVC jacket.

RA90 – CSA FT4, AG14, CSA C22.2 No.123-96, RoHS compliant and lead free. Single copper conductor, Cross-Linked Polyethylene (XLPE) insulation and sunlight resistant, low-temperature, low acid and gas and low flame spread PVC jacket.

RW90 – CSA C22.2 No.38. Annealed Class B compressed solid or stranded soft drawn plain copper conductor. Heat and moisture resistant, low-temperature, Cross-Linked Polyethylene (XLPE) insulation. Rated at 600 volts.

RWU90 – CSA C22.2 No. 38. Annealed Class B compressed solid or stranded soft drawn plain copper conductor. Heat and moisture resistant, low-temperature, Cross-Linked Polyethylene (XLPE) insulation. Rated at 1000 volts.

T90 – CSA FT1, CSA C22.2 No. 75 and UL 83. Annealed solid or stranded, soft copper conductor, heat and moisture resistant PVC insulation and nylon jacket.

TW75 – CSA FT1, CSA C22.2 No.75 and lead free. Annealed solid or stranded, soft copper conductor with flame-retardant, heat and moisture resistant PVC insulation.

TWU – CSA FT1 and CSA C22.2 No.75-03. Annealed solid or stranded, soft copper conductor, flame-retardant, low-temperature and moisture resistant PVC insulation.

Aluminum Building Wire

AC90 – CSA C22.2 No.51. Bare ACM aluminum compact or compressed Class B strand conductor. RW90, Cross-Linked Polyethylene (XLPE) or PVC insulation and flexible interlocked aluminum armour.

ACWU – CSA FT4, CSA C22.2 No. 51 and 174, IEEE 1202 and 383, UL 1581, ICEA T-30-520 and OSHA acceptable. Bare ACM aluminum compact or compressed Class B strand conductor. Cross-Linked Polyethylene (XLPE) insulation, flexible interlocked aluminum armour and flame-retardant, moisture and sunlight resistant, black PVC jacket.

NMD90 – CSA FT1 and CSA C22.2 No.48. Bare ACM aluminum compact or compressed Class B strand conductor. Cross-Linked Polyethylene (XLPE) or PVC insulation, bare ACM aluminum ground (bonding) conductor and sunlight and moisture resistant PVC jacket.

RA90 – CSA FT4. Bare ACM aluminum compact or compressed Class B strand conductor. Heat and moisture resistant, low-temperature, Cross-linked Polyethylene (XLPE) insulation, vapour tight solid corrugated aluminum sheath armour and flame-retardant, moisture and sunlight resistant PVC jacket overall.

RW90 – CSA C22.2 No.38. Bare ACM aluminum compact or compressed Class B strand conductor. Heat and moisture resistant, low-temperature, Cross-Linked Polyethylene (XLPE) insulation. Rated at 600 volts.

RWU90 – CSA C22.2 No.38. Bare ACM aluminum compact or compressed Class B strand conductor. Heat and moisture resistant, low-temperature, Cross-Linked Polyethylene (XLPE) insulation. Rated at 1000 volts.

AC90 Cable 600V

PVC or XLPE/AIA

SPECIFICATIONS

• CSA C22.2 No. 51

CONSTRUCTION

Conductor: Solid or stranded bare copper

Insulation: Cross-Linked Polyethylene (XLPE) Type RW90 or Polyvinyl Chloride (PVC)

Ground (Bonding) Conductor: Bare solid or stranded copper bonding wire

Armour: Flexible Aluminum Interlocked Armour (AIA)

Conductor Temperature: Low-temperature, -40°C to + 90°C

Options: Aluminum conductor or Galvanized Steel Interlocking Armour available upon request

CONSTRUCTION

Conductor: Annealed class B compressed stranded soft drawn plain copper

Insulation: Heat and moisture resistant, low-temperature Cross-Linked Polyethylene (XLPE) Type RW90, -40°C to +90°C

Options: Solid conductor and multiple colored insulations available upon request
PVC jacket (FT1 Rating) and aluminum conductor available upon request

ACWU90 Cable 600V XLPE/AIA/PVC

SPECIFICATIONS

- CSA FT4
- CSA C22.2 No. 51 & 174
- IEEE 1202 & 383
- UL 1581
- ICEA T-30-520
- OSHA Acceptable

*Refer to CE Code for details

CONSTRUCTION

Conductor: Bare ACM aluminum compact or compressed Class B strand

Insulation: Cross-Linked Polyethylene (XLPE) Type RW90

Ground (Bonding) Conductor: Stranded bare aluminum

Armour: Aluminum Interlocked Armour (AIA)

Outer Jacket: Flame-retardant (FR), moisture and sunlight resistant Polyvinyl Chloride (PVC), black

Options: Other coloured outer jacket and constructions available upon request

CABLE MANAGEMENT PROGRAM

CUSTOM TAGGING

We offer custom reel tags with project specific item identifiers and details, easing material management. Options include weather-proof, colour-coded stainless steel, printed RFID, or project specific templates.

SPECIALIZED PACKAGING

We can custom pack orders according to almost any specifications. Whether it's specified reel sizes, bug-free reels, or shrink wrapped pallets, we make sure it's packed right.

LOCAL AND INTERNATIONAL LOGISTICAL EXPERIENCE

Our team ensures your shipping standards, including custom packaging, are monitored, and met while keeping your project schedule in mind.

LAGGING

For long-distance transit, including export, bad weather, and rough terrain, we use wood covers or other suitable durable packaging to protect the reels.
