

TEXCAN

A Sonepar Company

UNARMoured MEdIUM VOLTAGE CAbLE CATALOGUE

WHY CHOOSE TEXCAN?

Our expertise lies in providing solutions tailored to each customer's individual needs. Texcan has been a leader in the wire and cable industry since 1978, consistently going above and beyond to serve our customers. As one of the largest wire and cable suppliers in Canada, Texcan specializes in serving the electrical market and offers an extensive range of products and specialized services.

LOCAL INVENTORY WHAT YOU WANT, WHEN YOU NEED IT!

Texcan takes pride in our extensive inventory, offering a diverse selection of wire and cable options to meet customers' specific requirements. We prioritize convenience, ensuring that our customers have easy access to the products they need, when they need them.

LOCAL EXPERTISE WITH A GLOBAL PRESENCE

Texcan is a proud member of the Sonepar Group. Founded in 1969, the Sonepar Group of companies is an independent family-owned company and global market leader in B to B distribution of electrical products, solutions, and related services.

PRODUCT SOURCING

Texcan's preferred partners are selected based on their reputation for excellence, reliability, and expertise in their respective fields. These partnerships are built on mutual trust, shared values, and a commitment to delivering exceptional customer experiences. By collaborating with industry-leading manufacturers and suppliers, Texcan ensures that it consistently offers outstanding products and solutions to its diverse customer base.

LIVE 24/7, 365 DAY EMERGENCY SUPPORT

Texcan recognizes the crucial importance of continuous, year-round operations. We understand that during emergencies, disruptions can pose significant risks and expenses. That's why we are fully committed to delivering prompt assistance whenever it is required. Our dedicated team is available 24/7 to provide live help, ensuring that your operations can swiftly resume without any unnecessary delays. To access our live assistance, simply call our toll-free number, 1.800.665.1025.

We are ready to provide the support you need, anytime, anywhere.

ENGINEERING SUPPORT

By choosing Texcan, you gain access to our dedicated in-house engineering and product management team, along with manufacturer support for your project. The sooner you engage us, the greater the value we can provide.

When you collaborate with us, we can assist in reviewing your bill of materials, ensuring accuracy and efficiency. Our team specializes in streamlining cabling specifications, optimizing designs, and technical compliance throughout the project lifecycle. Our expertise allows us to streamline processes and enhance overall project efficiency.

To Place an Order - For many of the products in the catalogue, you will find everything that you need to place an order. Should you need any assistance or require special orders, please contact your sales representative. A complete list of our sales offices can be found on the back cover of this catalogue.

Introduction

Unarmoured Medium Voltage cables are a key component for the distribution and powering of electricity through a broad range of commercial, industrial, and utility facilities. CSA and the Canadian Electrical code recognize the need for both Concentric Neutral cables as well as Power Shielded cables in today's applications, because both products have their own unique characteristics.

Concentric Neutral cables are available in both aluminum and copper conductor constructions to provide a variety of applications for distribution networks. Power Shielded cables are available in copper and consist of Copper Tape Shield.

Applications

Unarmoured Medium Voltage cables are suitable for use in multiple industry segments. Installations include above ground, in open air, in conduit, direct buried, in underground duct or suspended aerially with a messenger wire. Typical applications include underground and power feeders where voltages of 5kv to 46kv are required.

Whether it's Concentric Neutral cable for electrical distribution or Power Shielded cable for equipment, Texcan stocks a wide variety of Unarmoured Medium Voltage cable solutions.

Specifications

- CSA FT1 & FT4
- CSA C68.5, C68.10, C96.1
- ICEA S-94-649
- ICEA S-93-639/NEMA WC74
- AEIC CS8

*Refer to CE Code for details

CAUTION NOTICE

In case of fire, well maintained early warning smoke detectors will give an alarm long before non-metallic coverings become combustible. However, the Electrical and Electronic Manufacturers Association of Canada has suggested that all purchasers of PVC insulated / jacketed products be advised of the following:

- Non-metallic coverings of electrical cables can burn and may transmit fire when ignited.
- Burning non-metallic coverings may emit acid gases which are toxic and may generate dense smoke.
- Emission of acid gases may corrode metal in the vicinity e.g. sensitive instruments and reinforcing rods in cement.

The installer and/or user assumes all liability for the consequences of the installation and/or use of any of the products in violation of any applicable law, regulation, or code.

Unarmoured Medium Voltage Cable

Unarmoured Medium Voltage include Concentric Neutral cables, Copper Tape cables and Airguard cables. Each cable is available in various constructions.

In this catalog, Texan references common types of Unarmoured Medium Voltage cables. The voltages referenced are up to 35kV, however Texcan stocks a range of 5kV to 46kV.

These products are available in a variety of insulations, jackets, voltages, and conductor types. They are suitable for both grounded and ungrounded insulation levels. Texcan also stocks a complete line of accessories to ensure medium voltage terminations are complete.

Concentric Neutral Cables– Used in wet or dry locations, for a wide variety of types of installations. The conductors are typically annealed, bare stranded copper or aluminum. The concentric neutral conductor, from which the cable derives its name, is bare or tin-coated copper wire, applied helically over the insulation shield. These wires act as the metallic component of the shield and the neutral, at the same time. Available in both 1/3rd size neutral or full size neutral.

Copper Tape Cables– The basic construction for power cables begins with a conductor of annealed, bare copper which may be compact or compressed. This is followed by an extruded semi-conducting shield applied over the conductor as well as includes an extruded semi-conducting shield over the insulation. Applied over the insulation shield is a copper tape shield. The copper tape's sole purpose is to shield the cable. Power cables carry a low temperature of -40°C and up to a maximum jacket temperature of 105°C.

Concentric Neutral- Copper Conductor

TRXLPE/PVC

SPECIFICATIONS

- CSA Approved
- CSA C68.5

CABLE MANAGEMENT PROGRAM

CUSTOM TAGGING

We offer custom reel tags with project specific item identifiers and details, easing material management. Options include weather-proof, colour-coded stainless steel, printed RFID, or project specific templates.

SPECIALIZED PACKAGING

We can custom pack orders according to almost any specifications. Whether it's specified reel sizes, bug-free reels, or shrink wrapped pallets, we make sure it's packed right.

LOCAL AND INTERNATIONAL LOGISTICAL EXPERIENCE

Our team ensures your shipping standards, including custom packaging, are monitored, and met while keeping your project schedule in mind.

LAGGING

For long-distance transit, including export, bad weather, and rough terrain, we use wood covers or other suitable durable packaging to protect the reels.
