

AGRONOMY

INTERNSHIP OVERVIEW

PTx is passionate about using science and technology to improve agriculture. The PTx team develops innovative products that improve the lives of growers and make agriculture more sustainable, efficient, and profitable. The PTx Agronomy Intern will receive hands-on experience in many different business areas based in Tremont, Illinois. This paid internship will focus on conducting field-based product trials as well as agronomic research. In addition, the individual will be exposed to various aspects of service, support, training, and dealership experience in working with a leading precision agriculture company.

Responsibilities:

- Participate in supporting, conducting, and executing field-based product trials
- Aid growers and dealers with installation of field trial equipment
- Help growers and dealers and ensure field trials are planted correctly
- Record and gather planting observations
- Participate in capturing field observations throughout the growing season
- Assist with field trial harvest operations
- Aid in compiling and analyzing trial data

Required Skills/Experience:

- Enrollment in college (Crop Sciences, Ag Business, Technical Systems Management or related)
- Cumulative GPA of at least 3.0/4.0
- Comfortable operating/learning to use large scale agriculture equipment
- Interest in exploring a career in Agriculture
- Detail and results oriented with the ability to work independently
- Excellent time management, organizational, and problem-solving skills
- Proficiency in MS Word, Excel, PowerPoint
- Willingness to work outside and in the office
- Personal transportation
- Willingness to relocate to the Tremont/Peoria, IL area if necessary

Desired Skills/Experience:

- Prior farm experience or internship in similar area
- Willingness to travel if necessary for multiple days at a time
