

The Amplify sauna provides SoloCarbon® heating in a robust cabin design. Simple touchpad controls and entertainment features makes the Amplify series a cost-effective and user-friendly sauna that supports your daily wellness routine, pain relief, weight loss or detox program.

KEY FEATURES

- 4 Sunlighten patented SoloCarbon® infrared light therapy heaters
- 2 full spectrum high intensity heaters
- Ultra low EMF and environmentally safe
- Chromotherapy: healing with light and colours
- Patented magnetic locking system makes assembly a snap
- Beautiful craftsmanship and solid wood construction
- Deep benches and taller height for ultimate relaxation
- Blaupunkt speakers with bluetooth connectivity
- Residential: 5 year warranty (12 months parts & labour, plus 4 yrs parts & service support)
- Optional Outdoor cover available

POWER REQUIREMENTS 220–240V, 2371 watts. Maximum Amperage 15A. Sunlighten recommends all new installations adhere to AS3000 and a circuit that is RCD protected, along with a readily accessible switch. A 3m cord exists with a 15amp male plug, exiting from back left of roof.

Minimum clear space required at back and both sides of all our Signature saunas: x = 15cm

Minimum clear space required above sauna roof: 30cm.

For long term timber protection and to prevent warping, a timber treatment is applied to the exterior of all cabin saunas during the manufacture process. This may alter the external timber colour slightly.

*Full spectrum high intensity heaters

PRE-INSTALLATION CHECKLIST

It is important to ensure there is enough space through the doors and pathways to the sauna's location in your space. Please measure any access doorway or hallway prior to purchase for easy installation.

If your sauna is being installed in a tight space, talk to your sales representative to confirm installation is possible.

In addition, please ensure any electrical works are completed prior to delivery and installation of your Sunlighten sauna. Please locate the power outlet for easy access to turn the sauna on and off at the power source after installation.
