SAFETY PADLOCKS AND DEVICES

THE ESSENTIALS FOR ACHIEVING OSHA LOCKOUT COMPLIANCE

Master Lock offers a comprehensive portfolio of safety lockout products for customized protection in diverse industries. OSHA released Standard 29 CFR 1910.147 The Control of Hazardous Energy in order to establish lockout tagout compliance requirements for general industry. Included in 29 CFR 1910.147 were five criteria set forth by OSHA that safety products must meet.

Per 29 CFR 1910.147, OSHA Requires All Safety (LOTO) Padlocks and Devices to be:

DURABLE:

Withstands the environment where used.

SUBSTANTIAL:

Prevents removal without use of excessive force.

STANDARDIZED:

Standardize within facility by color, shape, or size.

IDENTIFIABLE:

Clearly identifies the employee who installed the padlock or device.

SINGULARLY IDENTIFIED:

Visually distinguished for exclusive safety lockout use; must not be used for security purposes.

Master Lock offers a wide selection of safety padlocks and devices. All are compliant with these requirements.

Master Lock ensures that all our safety padlocks and lockout devices are compliant with the OSHA standards to effectively keep workers safe during lockout, wherever it is being performed.

- Master Lock safety products must endure rigorous testing under various conditions to be certain of **durability** within any industry.
- Master Lock safety products are always constructed of quality materials to ensure a **substantial** nature and prohibit accidental removal.
- Master Lock safety padlocks are available in a variety of colors and shackle lengths to support the needs of any lockout program and allow for **standardization** across a facility. The selection of lock colors and shackle options also makes it easy for safety locks to be **singularly identified** versus security padlocks within a facility.
- Master Lock offers a variety of marking options – write-on padlock labels, photo ID labels, and laser engraving. Each of these methods allows the padlock owner to be clearly **identifiable**.

Master Lock provides additional safety features and services to assist in designing fully customized safety systems.

- **High security, restricted-for-safety keyway** means duplicate keys are only available through Master Lock, which prevents duplicates from being unintentionally introduced.
- **Complimentary LifeGuard™ key charting services** record all key codes distributed to a customer to ensure they aren't duplicated within a facility; complies with "one lock, one worker, one key" industry guideline.
- **Custom keying options** are available to build out padlock systems so that they adhere to the lockout program for each facility: keyed different, keyed alike, master keyed.

LEADING SAFETY FORWARD

This selection of Master Lock Safety products represent items particularly suited for safe and compliant **lockout** during maintenance at **any facility**.

SAFETY PADLOCKS

410 Series

S1100 Series

Laser Engraving

Photo I.D. Labels

- **Durable** anodized aluminum and thermoplastic models withstand chemicals and temperature extremes
- **Substantial** locking mechanisms and product designs prevent accidental removal
- Enhanced employee **identification** with write-on and photo ID labels or permanent laser engraving
- Multiple colors and shapes allow a site to **standardize** padlocks specific to Lockout
- Exclusive-to-Safety cylinders maintain safety system integrity

SAFETY LOCKOUT HASPS

- **Durable** steel construction
- Pry resistant jaws prevent removal without excessive force

421

418

SAFETY TAGS

- Photo ID tags provide immediate **identification** of employees
- Guardian Extreme™ models are made with **durable** polypropylene that holds up to UV, temperature extremes and abrasive materials
- Metal Detectable Tag option available

497A

S4002

S4002MT

VALVE LOCKOUT DEVICES

S3920

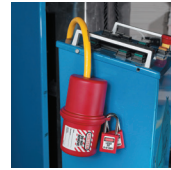

S3068

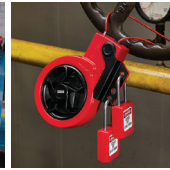

484

- Butterfly, ball and gate valve lockout devices cover and effectively isolate handles in the off position
- **Substantial** designs resist unauthorized removal attempts
- Write-on labels **identify** authorized worker performing lockout

ELECTRICAL LOCKOUT DEVICES

487

S856

S3823

S3822

- **Durable** materials and **substantial** designs resist unauthorized removal and prevent accidental re-activation:
 - Circuit breaker lockout devices clamp on toggles in off position
 - Plug and hose covers rotate to conceal ends
- Write-on labels **identify** worker performing lockout

GROUP & MULTI-POINT LOCKOUTS

S600

S3650

S856/S866

- Group lock boxes with **durable** stainless steel construction
- Portable or wall mounted group lock box designs accommodate different group lockout methods
- Retractable cable lockout features **substantial** design with cable reel to make operation easier and ensure a more secure lockout.

PADLOCK STATIONS

1483BP1106

S1518

- Store **standardized** lockout padlocks in a centralized location for worker access during maintenance procedures
- **Durable** polypropylene or steel construction withstands harsh conditions

for all Safety Lockout products

Master Lock and American Lock offer a broad portfolio security products to meet business needs for security, weatherability, keying flexibility, key control and access management.

PADLOCK SECURITY

TOUGH ENVIRONMENT PADLOCKS

Reliable operation in extreme conditions. Special cylinders, shackle seals and keyway covers protect locking mechanisms from dirt, grit, and grime.

HIGH SECURITY PADLOCKS

Heavy duty steel bodies, shackle shrouds and boron shackles withstand abuse.

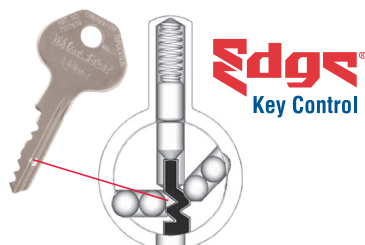

GENERAL SECURITY PADLOCKS

Compact lock bodies, hardened steel shackles and non-rekeyable cylinders provide reliable security.

EDGE® KEY CONTROL

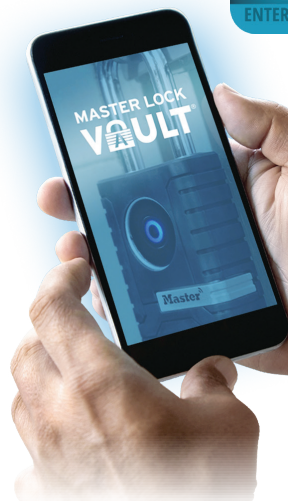

This patented system provides affordable key control, eliminating the risk of unauthorized key duplication.

ACCESS MANAGEMENT SOLUTIONS

SMART. SIMPLE. SECURE.

The Master Lock® Vault Enterprise software and suite of Bluetooth enabled hardware provided businesses a convenient way to control access, manage assets and improve accountability. This proven security innovation eliminates the cost, security risk and complexity of physical keys.

INNOVATIVE FEATURES:

- Efficiently manage access to ensure the right users have the right access
- Easily monitor access with robust data and audit trails
- Automatically map lock and lock box locations via smartphone
- Assured back-up entry method using manual, directional or numeric code on locks and lock boxes
- Simplify security set-up with bulk user uploads and fast lock scanning for registration
- Leverage the security of 256-bit, military-grade encryption
