

PRODUCT DATA SHEET**PW1622-14 PREMIUM WATER-BASED ANTI-SPATTER AEROSOL**

Description:

Powerweld PW1622-14 is a high-performance, water-based anti-spatter formulated for MIG welding applications. Manufactured in the USA, it protects nozzles, contact tips, and work surfaces from spatter adhesion while providing a safer and more environmentally responsible alternative to solvent-based sprays. The 14 oz. aerosol can features advanced bag-on-valve (BOV) technology for clean, efficient application and near-total product use.

Features & Benefits:

- Water-based & non-toxic — free of chlorinated solvents, safe for users and the environment
- Plant-based active ingredient — biodegradable, eco-friendly formulation
- Silicone-free — will not contaminate welds or affect finishing operations
- Corrosion inhibitor — protects treated surfaces from rust and oxidation
- Premium performance — reduces spatter adhesion, lowers cleanup time, and extends consumable life
- High-solids formula — provides durable, long-lasting protection with excellent coverage
- Non-flammable — safer for shop environments and storage

Bag-On-Valve (BOV) Delivery System Advantages:

- Product remains isolated from propellant for maximum purity and shelf life
- Sprays consistently at any angle, even upside down
- Achieves up to 99.5% product dispensing with minimal waste
- 100% recyclable packaging with environmentally friendly propellant
- Smoother, quieter application compared to traditional aerosols
