

BUILT FOR SAFETY DESIGNED FOR COMFORT

Beyond Compliance –
The New Generation of Safety Harnesses

Miller H500 Series

Honeywell
MILLER

THE WORKER-CENTRIC SAFETY HARNESS

Two important goals of ergonomics are the comfort and the health & safety of workers. In many ways, these are mutually compatible, for where health and safety are jeopardized, discomfort results. When it comes to working at height, few tasks are more dangerous than steel erection and scaffolding. Not only are construction workers at risk of fall, but long hours spent in a restrictive non-ergonomic heavy harness can lead to muscular fatigue due to restricted freedom of movement, overexertion, repetitive tasks, load exposure, sweat and heat build-up...often resulting in frustration and complacency. These states can cause or contribute to critical errors, such as eyes and mind

not on the task and bad posture, leading workers to be less compliant to their harness (incorrect fit and adjustment, no anchor point attachment, etc.) which may increase the risk of musculoskeletal disorders (MSDs) and fall.

Honeywell recognized the need for change and revolutionized a new generation of safety harnesses, the Miller H500 series, around four key worker-centric value drivers: ergonomic safety, usability, style and performance.

The new Honeywell Miller® H500 integrates evidence-based “best-in-class” anatomically and ergonomically designed pressure-relief breathable paddings for

more comfort and freedom of movement, and introduces a variety of other new smart and intuitive safety features.

The Honeywell Miller® H500 safety harness synthesizes safety, quality and comfort. Whereas some other harnesses may protect workers from serious injury at the expense of their long-term well-being, the Honeywell Miller® H500 aims beyond compliance to keep workers safe and supported – making their jobs easier and keeping them more safe.

A NEW AGE OF SAFETY HARNESSES

1 Greater freedom of movement

- **New** specially formulated webbing flexes to accommodate movement and body contours for optimum comfort around legs/shoulders
- **New** patented shoulder/back padding design minimizes overhead muscular fatigue (overexertion)
- Waist pad with adequate foam density for optimum lumbar support
- Lighter-than-ever harnesses

2 More breathability

- **New** “best-in-class” anatomically and ergonomically designed pressure-relief breathable shoulder/back padding keeps workers drier and cooler
- **Three times more breathable** compared to the next best alternative (less water vapour resistance – RET)*

3 Smart anti-tangle for a hassle-free donning experience

4 Dedicated SRL web link for easy attachment of personal SRLs

5 User-friendly resettable lanyard keepers

- Allows users to attach lanyard when not in use

6 Clearly identifiable smart impact indicators for hassle-free inspection

7 Optimized label protection with self-contained and practical Velcro®-label pouch

8 Improved visible stitch pattern for easy inspection

9 Rated to 420 lb (max. weight capacity)

*As per the Satra Technology technical report.

NEW MODERN DESIGN FOUR CORE MODELS

The modern ergonomic design provides higher visibility, smarter features and safer, more comfortable functionality.

Select from four models, available in three sizes.

HONEYWELL MILLER® H500

CONSTRUCTION COMFORT (CC)

- Highly breathable, lightweight, ergonomic shoulder/back padding
- Robust and ergonomic pressure-relief waist pad
- Specially formulated, comfortable leg and shoulder webbing
- User-friendly lanyard keepers

CONSTRUCTION STANDARD (CS)

- Robust and ergonomic pressure-relief waist pad
- Specially formulated, comfortable leg and shoulder webbing
- User-friendly lanyard keepers
- Smart anti-tangle easy-donning solution
- Soft, removable shoulder pads

INDUSTRY COMFORT (IC)

- Highly breathable, lightweight, ergonomic shoulder/back padding
- Specially formulated, comfortable leg and shoulder webbing
- User-friendly lanyard keepers

INDUSTRY STANDARD (IS)

- Smart anti-tangle easy-donning solution
- Specially formulated, comfortable leg and shoulder webbing
- User-friendly rebar hook lanyard keepers
- Soft, removable shoulder pads

BREATHABILITY DATA

The **lower** the RET (water vapor resistance) value is, the **higher the breathability**.

FEATURES

- Lightweight, ergonomic, breathable harness
- Comfortable around the legs, waist, back and shoulders
- Increased freedom of movement
- Smart rebar hook/lanyard keepers and SRL web link
- Quick and easy-to-fit and adjust
- Improved visible stitch pattern
- Clearly identifiable fall-impact indicators
