

# THE CRC SMARTWASHER<sup>®</sup> A SMARTER & SAFER SOLUTION

The CRC SmartWasher<sup>®</sup> is a manual parts washer that replaces traditional solvent or aqueous alternatives. It uses a non-hazardous, non-flammable, water-based degreasing solution that offers a superior cleaning performance as powerful as solvents while being safer for the user. The SmartWasher<sup>®</sup> will meet the needs of modern businesses' parts washing requirements.

The CRC SmartWasher<sup>®</sup> utilizes the natural process of bioremediation to break down and convert oil, grease and carbon-based contaminants into harmless by-products of CO<sub>2</sub> and water.

The bioremediation process reduces liquid hazardous waste streams and reduces the release of harmful pollutants into the environment.

## AN EASY & EFFECTIVE 3-STEP SOLUTION

**1**  **The SmartWasher<sup>®</sup>**  
 A high-quality, durable Parts Washer that heats the OzzyJuice<sup>®</sup> fluid and allows for the magic of bioremediation to take place. Designed specifically for heavy duty applications, with the flexibility to suit almost any working environment.

**2**  **The OzzyJuice<sup>®</sup>**  
 A water-based, industrial strength, pH neutral, non-corrosive, non-flammable, cleaning fluid for use in the CRC SmartWasher<sup>®</sup> system. The advanced OzzyJuice<sup>®</sup> formula cleans as well, if not better, than traditional solvent technologies. All OzzyJuice<sup>®</sup> solutions are NSF A1 Registered.

**3**  **The OzzyMat<sup>®</sup>**  
 A revolutionary, Multi-Layer Filter Mat that not only traps particulates, but most importantly contains the advanced Microbes that will fall into the OzzyJuice<sup>®</sup> solution as it passes through. The microbes then get to work breaking down and cleaning the fluid so it can be re-used over and over again.

## WHY THE CRC SMARTWASHER<sup>®</sup>?

-  Bioremediation Technology
-  Powerful Cleaning Performance
-  No Hazardous Waste Generation
-  Safer for the Environment  
Reduces harmful waste
-  Self-Cleaning
-  Non-Flammable
-  Safer For Employees  
No contact with traditional solvents
-  Technical Service Excellence
-  Lower Operating Cost

TOGETHER, WE GET IT DONE.™

## OZZYMAT®

The OzzyMat® is what separates SmartWasher® from the rest. A high-quality, multi-layer filter mat containing state of the art microbes that allow the bioremediating, circular system.

Designed for applications with normal to heavy usage, the FL-4 Multi-Layer OzzyMat® has (4) white layers and (1) blue layer. The white layers on the mat trap any particulate larger than 50 microns and should be peeled away once a week for optimum performance. The blue layer is the support structure that contains the microbes (Ozzy®) and delivers them into the system. These microbes (Ozzy®) migrate from the OzzyMat® into the OzzyJuice®, located in the SmartWasher® tank, and break down oil and grease.
