

Why Superior Glove for Cold Protection

Our cold protection products are extensively tested in-house to enable us to maximize warmth and range of motion in winter conditions. Our line also incorporates protection against other hazards such as cut, impact, puncture, abrasion, arc flash, and heat.

Cold Protection Explained

Cold protection for our products is represented by the following icon that clearly communicates the lowest temperature at which hands may remain warm based on lab testing. Individual results may vary.

-45°C
-49°F
